THE PAPER USED IN THIS CATALOGUE
FURNISHED BY
E. A. BOUER COMPANY
MILWAUKEE

TO THE TRADE

We herewith submit our latest General Catalogue in which we have illustrated and described our entire line in a plain, compact form.

Make void all previous Catalogues and Price Lists and refer to numbers and descriptions in this book when ordering goods.

Each section is a catalogue in itself, and by referring to the department index at the front of this book you can quickly turn to the section desired by means of the thumb index along the front edge. The binder is constructed in such a manner that any section may be removed and a new one inserted.

We earnestly request you to insert the New Sections immediately upon their arrival.

Lists used are in most cases OUR OWN, and discounts will be quoted on application.

Our MAIL ORDER DEPARTMENT is at your service, and all mail orders are filled promptly and at lowest prices.

We wish to sincerely thank our friends and customers for the many favors extended us during the past 65 years, and hope that this Catalogue may become their reference book of information, and aid us in accomplishing the end we desire, which is an increased business.

Very truly yours,

John Pritzlaff Hardware Co.

DEPARTMENTS

	Pages.
No. 1—Mechanics' and Edge Tools, . . .	***1 to 326***

No. 14—Blue, for 1¼ in. 14 Gauge Common Wire Nails..... **7.25**

Weight Each About 2 Pounds.

The Pearson Automatic Nailer has no complicated parts to get out of order. Nails can be driven at the rate of 125 per minute. Works just as easily while wearing gloves or mittens. Nails can be driven quite as easily through tin as wood. It can be used on any pitch roof with either right or left hand. The Pearson Automatic Nailer is particularly adapted for shingling, but is equally useful for any job where 3d 1¼ in. nails are used.

Larger Sizes Made to Order.

When ordering Saw Mandrels, send sketch and give distance from the Saw to end of Mandrel, if the pulley is between the bearings. If the Pulley is on the end of Mandrel, give distance from Saw to inside edge of Pulley. Also, whether the Pulley is on the right or left hand side of Mandrel when Saw is running towards you. Our Mandrels are made with Pulley on right hand side with left hand thread, unless otherwise ordered.

Circular Saws.

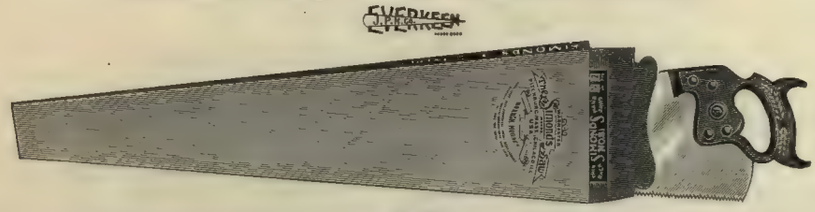
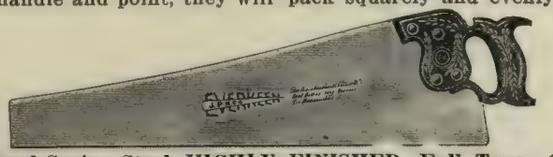
Hand, Rip and Panel Saws.



The above illustration shows the Method of Packing Everdureen and **Simonds Hand Saws.** The advantages are that, when a saw is sold, it is ready to hand to a customer without further doing up. The cases are so marked with the size of the saw, number of points to the inch and whether Rip or Hand, that this information shows plainly, no matter how the cases are placed on the shelf. By arranging the saws handle and point, they will pack squarely and evenly on the shelf.



No. E23—Everdureen, Extra Quality, Refined Spring Steel, HIGHLY FINISHED, Full Taper Ground, SKEW BACK, Full Beveled Filed Teeth, HIGHLY POLISHED AND CARVED MAHOGANY HANDLE, Five Nickel Screws; this Saw is a Masterpiece of the Saw Makers' Art.

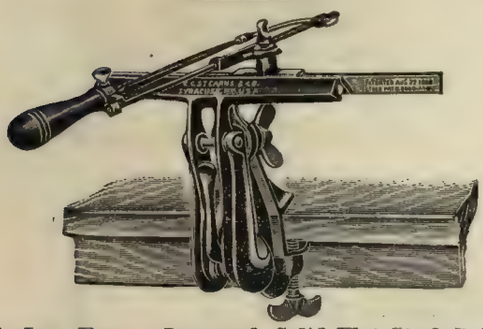
Saw Filing Guides.

STEARNS'



Malleable Iron Frame, Japanned, Solid Flat Steel Guide Bar, Malleable Iron File Attachment.

Each

No. 6—10½ in. Noiseless Rubber Cushioned Jaw Vise, 16 in. Solid Guide Bar with Handle and File..$3.00

Weight Each About 8¾ Pounds.

The Guide has three rigid positions in which it holds the file; one position for filing the saw on first side, another for filing it on the opposite side, a third for use in filing rip saws only. By means of the Ball and Socket Joint the Guide may be set at either of these positions; when thus set the file is rigidly held at the proper angle and incline for filing, and it is then impossible to file the teeth inaccurately.

One in a Box.

DISSTON'S

Malleable Iron Frame, Japanned, Steel Guide Rod, Malleable Iron File Attachment.

Each

No. D8—12½ in. Plain Face Jaw Vise, 16½ in. Slide, with Handle and File.....$3.90

Weight Each About 20 Pounds.

The Guide has 3 marks on the upper hub of the swivel attachment and one mark on the other. One of the three marks shows when it is in position for first side and the other designates when it is in position for filing other side. The third or center mark shows it in position for filing rip saws.

One in a Box.

STEARNS' OVERHANGING

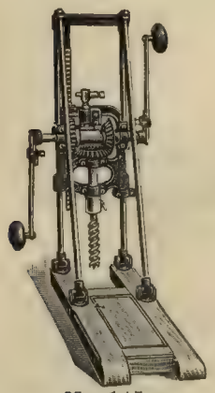
Boring Machines.

MILLERS FALLS



No. 145.

Wood Bottom Board, Steel Upright and Angle Rods, Spindle and Cranks, Adjustable Cranks Regulating Speed and Power.

Without Augers. Each

No. 145—25 in. High, Bores 12 in. **$12.80**

Weight Each, Boxed, About 45 Pounds.

Bores vertically or at any angle from the vertical within an arc of 50°. Depth of hole regulated by stop. Auger removed from hole by pushing a latch and continuing revolution of cranks in same direction as when boring. Frame locked in topmost suspension automatically. Released by pressure upon a thumb latch.

One in a Box.

Steel Base, Upright and Angle Rods, Spindle and Cranks, Adjustable Cranks Regulating Speed and Power.

Without Augers. Each

No. 146—25½ in. High, Bores 12 in. **$14.50**

Weight Each, Boxed, 49 Pounds.

Bores vertically or at any angle from the vertical within an arc of 50°. Depth of hole regulated by adjustable stop. Auger removed from hole by a few backward revolutions of cranks to loosen worm of Bit, pressure with Cranks to the left, automatically engaging a clutch, and forward revolution of the Cranks. Frame locked in topmost suspension automatically, released by pressure upon a thumb latch.

One in a Box.

No. 146

UPRIGHT

No. 20.

Varnished Hardwood Base, Malleable Iron Arch Gears and Crank, Steel Spindle, Chuck and Axle, Upright Firmly Bolted, Graduated Ways.

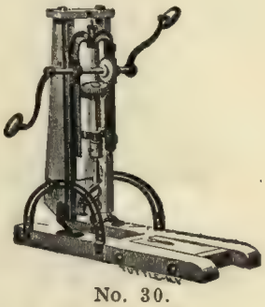
Without Augers. Each

No. 20—25 in. High, Width of Base 7½ in., Length of Base 29 in. **$6.35**

Weight Each, Boxed, 50 Pounds.

One in a Box.

ANGULAR



No. 30.

Varnished Hardwood Base, Malleable Iron Arch, Gears and Crank, Steel Spindle, Chuck and Axle, Uprights Firmly Bolted, Graduated Ways.

Without Augers. Each

No. 30—25 in. High, Width of Base 7½ in., Length of Base 29 in. **$7.00**

Weight Each, Boxed, 55 Pounds.

One in a Box.

PHILLIP'S ANGULAR

Self-Withdrawing, Malleable Iron Adjustable Cranks, Wood Base and Frame, **Furnished for Round or Square Shank Augers.**

Without Augers. Each

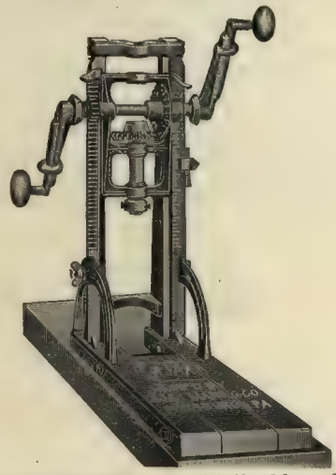
No. 40—26½ in. High, Width of Base 8 in., Length of Base 30 in. **$11.65**

Weight Each, Boxed, About 50 Pounds.

This machine is constructed of good material. The self-withdrawing of the auger while in motion is easy, without stop or jerk, and by once setting the gauge any number of holes can be bored to precisely the same depth.

One in a Box.

AJAX IMPROVED



Self-Withdrawing, Malleable Iron Arch and Crank, Wood Base, Graduated Ways, Will Take Any Style of Auger or Brace Bit, Either Long or Short, Round or Square Shank.

Without Augers. Each

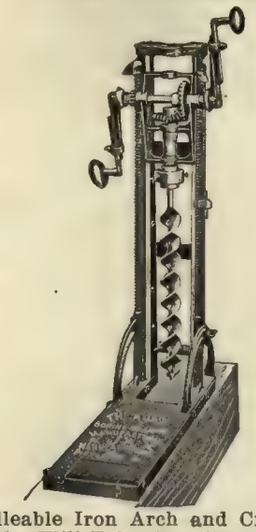
No. 50—22 in. High, Width of Base 7½ in., Length of Base 28 in. **$10.00**

Weight Each, Boxed, About 42 Pounds.

This machine will do all that other Wood Boring Machines do and does not require a special Auger. Can be used upright or at any angle. Can be set to bore any depth of hole and when the required depth is reached, withdraws quickly by same motion (automatically) without stopping. Folds compactly. Has extension arms.

One in a Box.

AJAX SPECIAL



Malleable Iron Arch and Crank, Adjustable, Will Take Any Auger that has a Screw or Spur and of which Shank is not More than 1⅛ in. at Greatest Diameter.

Without Augers. Each

No. 60—32½ in. High, Width of Base 7½ in., Length of Base 28 in. **$17.80**

Weight Each, Boxed, About 60 Pounds.

This machine is designed for work on heavy timbers for bridges and trestle construction and will bore through 20 inches of timber at one operation. To bore through 20 in. timber would require an auger with a twist of about 18 or 19 in. at least and the shank should be 2 in. or over. The length of the entire auger is immaterial as long as the twist is not more than 20 in. long.

Weight Each About 6¾ Pounds.

One in a Box.

The peculiar feature of the Yankee Hand and Breast Drills is found in the shifter on Cylinder between the small Gears. With Slide in **First** Notch, it is a Plain Drill; in **Second**, a Left Hand Ratchet; in **Third**, a Right Hand Ratchet; in **Fourth**, a Double Ratchet where any movement of the crank forward or backward causes the drill to cut continuously, a time saver and convenience when working in corners where crank cannot be turned. In **Fifth**, Gearing, Etc., is locked to open or close chuck.

The Side Handle can be unscrewed and has on it a screw driver bit to take care of all the screws on the tool. The end of the shell of chuck is so constructed that it permits the use of a monkey wrench for tightening large drills, instead of the common practice of holding the chuck shell in vise.

FRAY'S

Changeable Speed, Japanned Frame, Breast Plate and Large Gear, Polished Chuck.

Each

PERFECT HANDLE

Machinists'.

No. 998—One Piece Drop Forging from Hammer Head to Driver Tip, Square Shank, Oval Handle, Waterproofed, Finished in Natural Color.

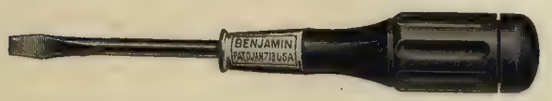
Length, Inches	4½	5
Size of Square, Inches	1/16	9/128
Width at Point, Inches	½	¾
Approx. Weight Per Dozen, Lbs.	8	12
Per Dozen	$13.35	14.45

Put a wrench onto the Square Shank when you want to tighten or loosen cap screws, set screws, etc. It will stand the strain.

One-half Dozen in a Box.

The handles of the Perfect Handle Screw Drivers are treated with a special waterproofing process which renders them impervious to water. The oval shape handle gives a greater leverage and fits the hand better than common round handles.

BENJAMIN FRICTION DRIVE



The **Friction Drive Cap** revolves freely, transferring friction from palm of hand to friction clutch, preventing chafing or blistering. The ordinary pressure of driving screws causes friction clutch to instantly engage handle without loss of motion. The spring releases clutch on reverse motion and holds blade firmly in screw slot while driving. The rotating cap allows free running screws to be driven rapidly by thumb and fingers of one hand.

Standard.

High Grade Tool Steel Blade, Hardened and Oil Tempered, Special Selected Hardwood Handle and Cap, Rubberoid Baked Enamel Finish.

No. B43—¼ in. Diameter Blade.

Adjustable Iron Planes.

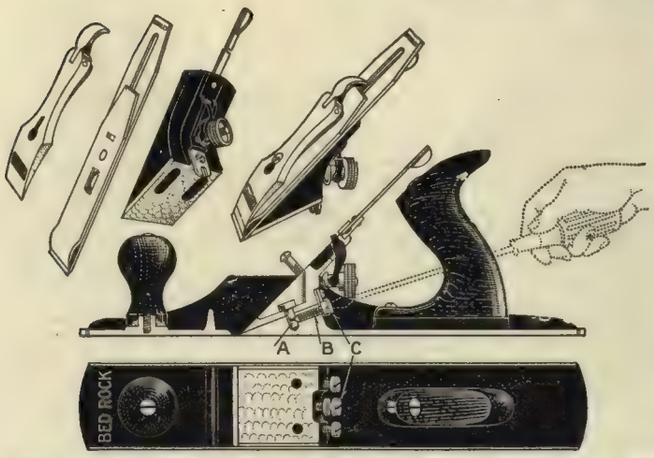
STANLEY "BED ROCK" PLANES



The absolute solidity and one-piece effect of the "Bed Rock" Plane is as much a fact as if the parts were all one, for the reason that the entire under surface of the Frog is in perfect contact with the solid seat cast in the Plane Bottom. The Frog and the Bottom are so perfectly fitted together, that from the Plane Iron to the Bottom, the Plane is as one solid piece of metal. This form of construction positively prevents any chance of vibration.

The Frog is made with a tongue on the under side, which fits in a groove in the Plane Body. This tongue and groove are made to conform, so that when adjustment is necessary the tongue of the Frog travels in the groove, which insures its being square with the mouth of the Plane, thus preventing any possible shifting or "wobbling." It is held to its seat by means of two pins of large diameter "A", each of these having a tapered hole near the lower end. The two Frog clamping screws "B" have tapered points. These points fit in the holes in the pins "A." The center of the tapered hole in these pins is slightly above the center line of the Frog clamping screws, so that when these screws are driven in, they produce the effect of a wedge, drawing the pins downward, and clamping the Frog absolutely rigid in its place. If, for any reason, these Frog pins "A" should be taken out of the Plane, care must be used in replacing them to see that the tapered holes come in line with the points of the Frog clamping screws "B." (See cut.)

For the purpose of opening or closing the mouth, as coarse or fine work may require, the Frog may be adjusted either forward or backward without removing the Lever and Cutter. Simply slacken the tension of the two Frog clamping screws "B," and with a screw driver adjust the Frog as desired by means of the Frog adjusting screw "C" in the center, then tighten the Frog clamping screws "B." (See cut.)

Particular attention is called to the shape of the sides of the Plane. This distinctive feature adds greatly to its strength and stiffness as well as affording large bearing surfaces when the Plane is used on its sides.

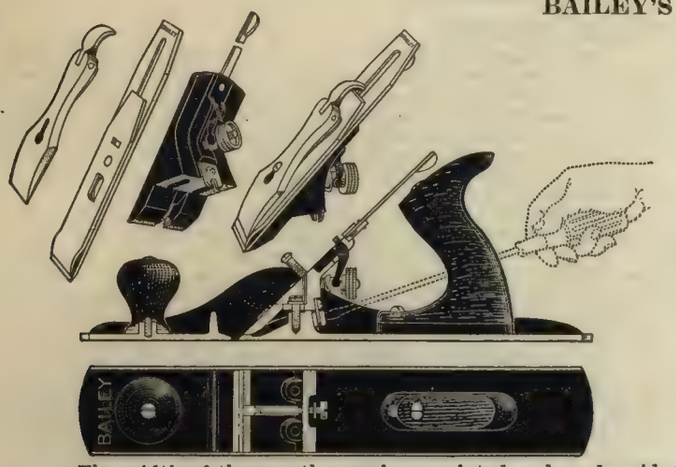
Adjustable Iron Planes.

BAILEY'S BENCH



Bench Planes, are divided into four classes, namely: **Smooth, Jack, Fore and Jointer.**

A **Smooth Plane** is for finishing or smoothing off flat surfaces. Where the uneven spots are of slight area, its short length will permit it to locate these irregularities, leaving the work with a smooth surface when finished.

A **Jack Plane** is used to true up the edges of a board in the rough and prepare it for the Fore or Jointer.

A **Fore Plane** is simply a short Jointer, and being lighter, is preferred by some workmen to the longer plane.

A **Jointer** is a finishing Plane for large surfaces and is invariably used to true up the edges of boards so that they can be closely fitted or joined together.

In the illustration the detail of construction is very clearly shown. Note that the frog has a support directly at the rear of the mouth, making practically one solid piece from the cap to the bottom. The sides and bottom of the plane are stiffened by means of the cross ribs. The screw bosses on each side of the center rib are very deep, allowing a number of threads to engage, thereby securely holding the frog. The design prevents the plane being drawn out of true when the face of the frog is screwed up hard.

The width of the mouth may be regulated and made wider or narrower as coarse or fine work may require. First remove the lever and cutter and loosen the two frog screws that fasten the frog to its seat. With a screw driver turn the center adjusting screw (see cut) to the right to close the mouth, and to the left to open it. When the frog is in the position desired, tighten the frog screws and replace the cutter and lever.

The cutter is adjustable endwise by means of the adjusting wheel at the back of the frog. It is also adjustable sidewise by lever located near the top and at the back of the cutter.

It is made of the finest quality English steel, tempered and ground by an improved process, and honed ready for use.

The handle and knob are made of highly finished, thoroughly seasoned rosewood.

All genuine "Bailey" Planes have the name "Bailey" cast in the bottom, and the name Stanley is stamped on the cutter.

Adjustable Wood Bottom Planes.

BAILEY'S BENCH

"Bailey" Wood Planes supply the demand for a wood plane of superior quality. The bottom, handle, and knob are made from selected and well-seasoned beech. The cutters are the regular "Bailey" type and are adjustable both endwise and sidewise.

The frog is held in place by two machine screws which pass through the top iron and screw into two brass lugs. These lugs are screwed and securely pinned into the wood bottom. This is far superior to other methods of fastening, as it holds together firmly, the wood bottom, the top iron which strengthens the wood bottom, and the frog.

STANLEY'S BENCH

Stanley Wood Planes have a simple lever adjustment, are well made, and for the Householder, the Farmer or the Amateur, or in fact for use in any place where extreme nicety of work is not required, make an excellent tool.

The cutters are of the double cutter type, of a high grade of steel and ground and honed ready for use. They are adjustable endwise by means of a lever and are held in place by a lever thumb screw instead of a cam. The bottoms, handles and knobs are made of beech and the entire plane is well finished.

Adjustable, Japanned Trimmings.

Each

No. 9½—6 in. Long, 1⅝ in. Cutter, Weight Each About 1½ Lbs. **$1.44**

No. 15 —7 in. Long, 1⅝ in. Cutter, Weight Each About 1⅝ Lbs. **1.56**

Adjustable, Nickel Trimmings.

Each

No. 16 —6 in. Long, 1⅝ in. Cutter, Weight Each About 1½ Lbs. **$1.66**

No. 17 —7 in. Long, 1⅝ in. Cutter, Weight Each About 1⅝ Lbs. **1.78**

One in a Box.

Nos. 9¾ and 15½.

Adjustable, Japanned Trimmings, Rosewood Handle.

Each

No. 9¾—6 in. Long, 1⅝ in. Cutter, Weight Each About 1⅝ Lbs. **$1.78**

No. 15½—7 in. Long, 1⅝ in. Cutter, Weight Each About 1⅞ Lbs. **1.90**

Adjustable, Nickel Trimmings, Knuckle Joint.

Each

No. 18 —6 in. Long, 1⅝ in. Cutter, Weight Each About 1½ Lbs. **$1.78**

No. 19 —7 in. Long, 1⅝ in. Cutter, Weight Each About 1⅝ Lbs. **1.90**

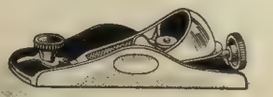
The Knuckle Joint in the cap makes it a lever, to clamp the cutter securely to its seat.

One in a Box.

STANLEY'S

Japanned Cast Iron Frames and Caps, High Grade Steel Cutters, Tempered and Sharpened.

No. 65.



No. 60.

Low Angle, Adjustable Throat, Nickel Trimmings.

Each

No. 65—7 in. Long, 1⅝ in. Cutter, Weight Each About 1⅜ Lbs. **$1.78**

No. 60—6 in. Long, 1⅜ in. Cutter, Weight Each About 1¼ Lbs. **1.66**

One in a Box.

Low Angle, Adjustable Throat, Japanned Trimmings, Rosewood Handle and Knob.

Each

No. 62—14 in. Long, 2 in. Cutter, Weight Each About 3⅝ Lbs. **$3.90**

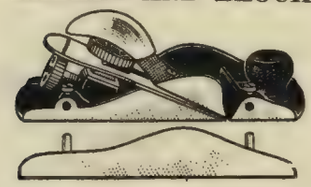
Especially adapted for use in cutting across the grain on heavy work, where more power is required than can be obtained by the use of the ordinary Block Plane.

One in a Box.

Adjustable Iron Planes.

STANLEY'S

RABBET AND BLOCK



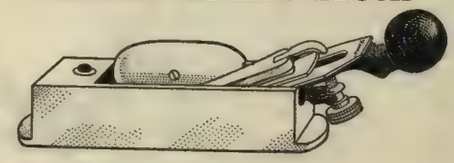
Japanned Trimmings, Rosewood Knob.

Each

No. 140—7 in. Long, 1¾ in. Cutter, Weight Each About 1⅛ Lbs. **$2.00**

A detachable side will easily change this Tool from a Block Plane to a Rabbet Plane or vice versa. The cutter is set on a skew.

CABINET MAKERS' BLOCK



Nickel Trimmed, Rosewood Knob.

Each

No. 9—10 in. Long, 2 in. Cutter, Weight Each About 4½ Lbs. **$6.00**

Used by Piano Makers and workmen of kindred trades requiring an extra fine tool for finishing hardwoods, etc.

CABINET MAKERS' EDGE

Japanned Trimmed, Rosewood Knob.

Each

No. 97—10 in. Long, 2¼ in. Cutter, Weight Each About 3¾ Lbs. **$3.22**

For Piano Makers and all Cabinet workers. The cutter rests on a solid bed practically its entire length. The cutting edge being located at the extreme end of the Plane gives the Tool the form of a chisel.

CABINET MAKERS' RABBET

No. 90—Bull Nose.

No. 93.

Nickel Plated and Adjustable Throat.

Nos.	90	92	93	94
Length, Inches	4	5½	6½	7½
Cutter, Inches	1	¾	1	1¼
Ap. Weight Each, Lbs.	1	1½	1¾	2
Each	$3.00	3.00	3.60	4.22

Designed for fine cabinet work when extreme accuracy is required. The sides and bottom being square with each other, the plane will lie perfectly flat on either side and can be worked either right or left hand.

SIDE RABBET

No. 98

No. 99

Nickel Plated, Rosewood Knobs.

Each

No. 98—Right Hand, 4 in. Long, ½ in. Cutter, Weight Each About ½ Lb. **$1.45**

No. 99—Left Hand, 4 in. Long, ½ in. Cutter, Weight Each About ½ Lb. **1.45**

For side rabbeting and trimming dados, mouldings, and grooves of all sorts. A reversible nose piece will give the tool a form by which it will work close up into corners.

EDGE TRIMMING

Japanned. Each

No. 95—6 in. Long, ⅞ in. Cutter, Weight Each About 1¼ Lbs. **$1.70**

Designed especially for trimming or smoothing the ends of boards, such as siding, etc., for a square and close fit. It has a right angle rest or guide from the cutter edge and the cutter works on a skew giving an easy shaving cut. The rest or guide has two screw holes to which wood blocks of various levels may be attached enabling user to make a slanting cut.

BULL NOSE RABBET

Japanned Trimmings, Adjustable Mouth.

Each

No. 75—4 in. Long, 1 in. Cutter, Weight Each About ⅝ Lb. . **$0.54**

This Plane will be found very useful for working close up into corners or other difficult places. The mouth can be adjusted to different widths by means of the set screw on top of the Plane.

SCRUB

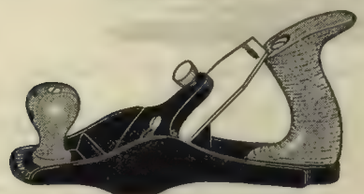
Japanned, Beech Handle and Knob.

Each

No. 40—9½ in. Long, 1⅛ in. Cutter, Weight Each About 2⅛ Lbs. **$1.56**

With this Plane the user can quickly plane down to a rough dimension any board that is too wide to conveniently rip with a hand saw. This is made possible by reason of the peculiar shape of the extra heavy cutter, the cutting edge which is round instead of square.

FURRING



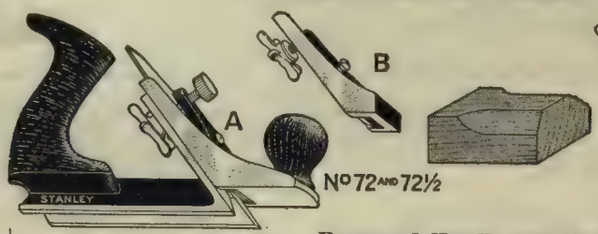
Japanned, Beech Knob and Handle.

Each

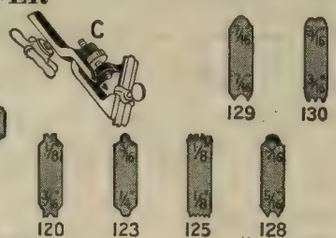
No. 340—10 in. Long, 2 in. Cutter, Weight Each About 2½ Lbs. **$2.00**

A tool for preparing lumber as it comes roughly sawed from the mill. The construction of the bottom is such that it will remove the fur, grit, dirt, etc., getting lumber ready for the Bench Plane much quicker than any other hand tool.

ADJUSTABLE CHAMFER



No. 72 and 72½



Rosewood Handle and Knob. Each

No. 72—9 in. Long, 1⅝ in. Cutter, **with Attachments "A" and "B"**, Weight Each About 3⅜ Lbs. **$3.12**

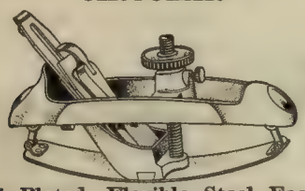
No. 72½—9 in. Long, 1⅝ in. Cutter, **with Attachment "A", "B" and "C" and 6 Moulding Cutters,** Sharpened at Both Ends, Weight Each About 4⅛ Lbs. **4.80**

This Plane will do perfect chamfer or stop-chamfer work. It has a ninety degree V bottom which acts as a mitre guide. To this is attached an adjustable front "A" having a flat bottom which carries the cutter; this front can be set for different sizes of chamfer. Front "A", can be readily detached and a bull-nose front "B" (furnished with the Plane) substituted, permitting the Plane to be worked close up into corners.

All Above, One in a Box.

Adjustable Iron Planes.

CIRCULAR



VICTOR, Nickel Plated, Flexible Steel Face, Steel Forged Mouthpiece.

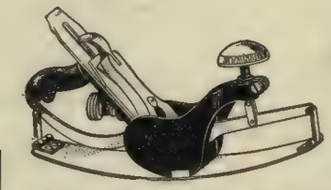
Each

No. 20—10 in. Long, 1¾ in. Cutter, Weight About 4 Lbs. **$5.80**

The Flexible Steel Face is fastened at each end to the Plane Body and adjusted by a screw at the center. This construction gives great accuracy and strength. The fewer number of working parts having less lost motion, give greater solidity which makes the Plane work more smoothly. The design of the frame provides convenient and firm handles for both hands.

One in a Box.

STANLEY'S



Japanned, Flexible Steel Face, Steel Forged Mouthpiece.

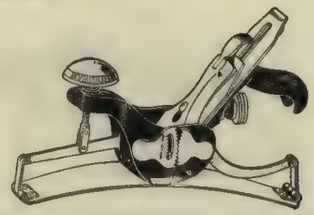
Each

No. 113—10 in. Long, 1¾ in. Cutter, Weight About 3½ Lbs. **$4.22**

The Flexible Steel Face is fastened at its center to the Plane Body and adjusted at the ends by means of a screw and levers. A valuable feature is the graduated scale on the gears, by means of which the face can be accurately set to work an arc of the same circle both concave and convex.

One in a Box.

CIRCULAR



BELT MAKERS'

Japanned, Adjustable Throat, Hardwood Handle.

Each

No. 11—5¾ in. Long, 2⅝ in. Cutter, Weight Each About 3½ Lbs. **$3.12**

Designed for chamfering down the ends or laps of belt before fastening them together.

One in a Box.

FLOOR

Japanned, 45 in. Hardwood Handle with Double Grips.

Each

No. 74—10½ in. Long, 2⅝ in. Cutter, Weight Each About 21½ Lbs. **$7.00**

Designed for planing floors, bowling alleys, skating rinks, decks of vessels, etc. The long handle permits the plane to be worked from a standing position.

One in a Box.

FLOOR

Japanned, Adjustable Throat, Hardwood Handle.

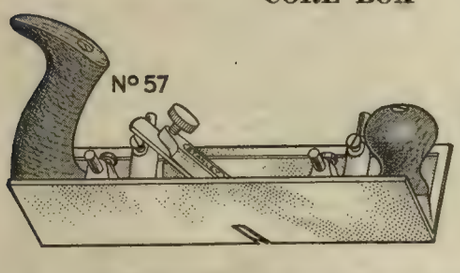
Each

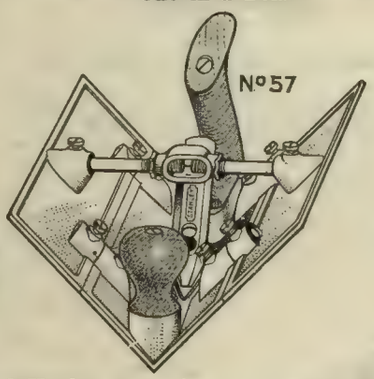
No. 11½—7 in. Long, 2⅝ in. Cutters, Weight Each About 3¾ Lbs. **$4.45**

Used for planing floors, bowling alleys, skating rinks, etc. Designed for working from kneeling position, the double handle making it an easy tool to work under such conditions.

One in a Box.

CORE BOX





Nickel Plated, Beech Handle and Knob.

Each

No. 57—10 in. Long, ⅞ in. Cutter, for Working Semi-Circles Up to 5 in., with One Pair Additional Sections, Weight Each About 6¾ Lbs. **$6.00**

One in a Box.

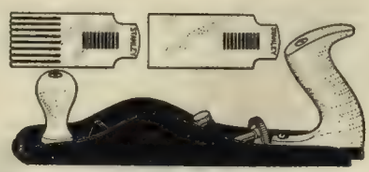
Per Pair

Extra Sections—Each Extra Pair Adding 2½ in. to the Diameter of the Semi-Circle that can be Worked Up to 10 in. in Diameter, the Practical Limit of the Plane **$1.45**

This Plane is designed for making circular core boxes. The principle by which this result is obtained, is that only a right angle may be inscribed in a half circle. The sides of the Plane are at right angles, consequently the point of the Plane will always cut on the circumference of the circle when the sides rest on the edges of the cut.

No. 57 is adapted for large core boxes, and is furnished with one pair of extra sides, or as they are called, Additional Sections (see cut). Without sections, it will work semi-circles from 1 in. up to 2½ in. in diameter. With one pair of sections it will work semi-circles up to 5 in. in diameter.

BUTCHERS' BLOCK



Japanned, Hardwood Handle and Knob, Two Cutters.

Each

No. 64—12½ in. Long, 2 in. Cutters, Weight Each 4 Lbs. **$3.35**

This Plane is designed for truing up or resurfacing butchers' blocks. With its use blocks having the most uneven surface can be leveled up with more speed and greater satisfaction than can be obtained with the use of any other tool.

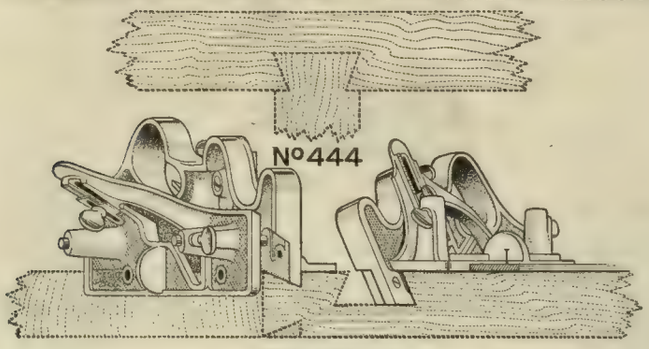
The work is accomplished with a specially formed cutter or plane iron set at an exceptionally low angle. In addition to this cutter a regular plane iron is furnished which enables the user to finish smooth the final surface of the block, also for planing smooth and keeping in condition the meat benches and tables ordinarilly found in a butcher's establishment.

One in a Box.

Adjustable Iron Planes.

STANLEY'S

COMBINATION DOVETAIL TONGUE AND GROOVE



Nickel Plated.

Each

No. 444—9 in. Long, Weight Each 6 Lbs. **$9.80**

This novel tool accomplishes a result sought for many years by wood workers in general, namely, to form a dove-tail tongue and groove with one hand tool.

It will cut any size grooves and tongues to fit with sides at flare of 20 degrees, where the width of the neck is more than ¼ in. and the depth of groove not more than ¾ of an inch. The tongue and groove are cut separately, and can be made with parallel or tapering sides. * A circular containing instructions for assembling and operating is packed with each tool, or will be sent upon request. This circular also gives valuable suggestions as to the use of dovetail joints.

The compactness of the tool is shown in the illustration, where the cut on the left shows the Plane assembled for cutting the tongue, and that on the right the Plane assembled for cutting the groove. **For parts see page 171.**

One in a Box.

IMPROVED DADO

No. 39—8 in. Long, Iron Stock, Japanned.

Cutter, Inches	¼	⅜	½	⅝
Weight Each, Lbs.	1¾	1¾	1¾	2
Each	$2.25	2.25	2.25	2.25
Cutter, Inches		¾	⅞	1
Weight Each, Lbs.		2	2¼	2¼
Each		$2.25	2.25	2.25

The great advantage of these Dado Planes over those made of wood is that they will keep true under all conditions even in the narrowest widths. They have skew cutters, an adjustable depth gauge, and two adjustable spurs, one on each side of the plane. This adjustable feature permits of the spurs being adjusted to take up wear, as well as for the depth of the cut.

One in a Box.

DADO

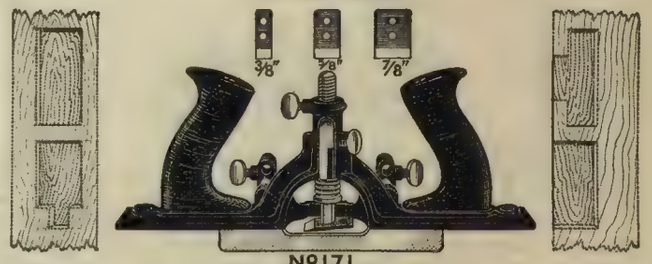
Iron Stock, Japanned. Each

No. 239—7½ in. Long, ⅛ in. Cutter, Weight Each 1 Lb. **$3.10**

This Plane has an extra narrow cutter, only ⅛ in. wide, making it an ideal tool for blind wire grooving, as well as many other purposes. *It is fitted with a double spur which prevents splintering when working across the grain and insures a smooth clear cut. A depth gauge is also attached allowing a groove to be cut of any desired depth up to the limit of the plane, ½ in.

One in a Box.

DOOR TRIM



Japanned, Rosewood Handles. Each

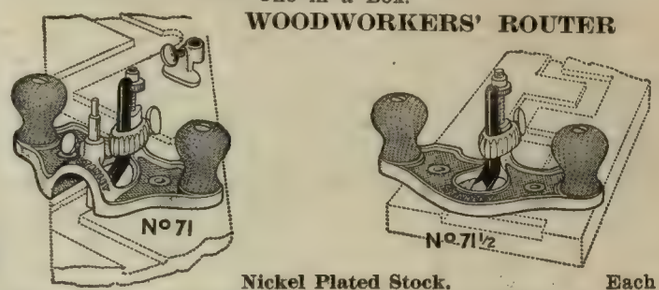
No. 171—11 in. Long, Three Forged Steel Cutters, ⅜, ⅝ and ⅞ in., Weight Each 3 Lbs. **$4.22**

This new Plane will make mortises for butts, face plates, escutcheons, etc., up to a depth of $\frac{5}{16}$ and a width of 3 inches. Its original feature is the method of mounting the cutter, which can be instantly set to work from either end of the Plane or across it. In addition, the cutter is cushioned by a spring which prevents taking a heavier chip than can be easily carried. A fence regulates the position of the cut and insures the sides of the cut being parallel. The depth of the cut is governed by a positive stop.

By removing the fence and locking the cutter post with the thumb screw instead of using the spring a very superior Router Plane is obtained. The bottom is designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on large openings.

One in a Box.

WOODWORKERS' ROUTER



Nickel Plated Stock. Each

No. 71 —**Open Throat**, 7½ in. Long, Two Cutters, ¼ and ½ in., Weight Each 2⅝ Lbs. **$2.90**

No. 71½—Closed Throat, 7½ in. Long, Two Cutters, ¼ and ½ in., Weight Each 2⅛ Lbs. **2.45**

These Planes are for surfacing the bottom or other depressions parallel with the general surface of the work. They are made in two styles, differing in the form of throat. The closed throat is the ordinary form of router plane; the open throat, an improved design, giving more freedom for chips and a better view of the work and cutter. The latter has an attachment for regulating the thickness of the chip, and a second attachment for closing the throat for use on narrow surfaces. The bottoms of both styles are designed so that an extra wooden bottom of any size desired can be screwed on, enabling the user to router on large openings. Cutters have screw adjustment, and can be held as shown in illustrations, or on the back of the cutter post, for bull-nose work.

One in a Box.

IMPROVED RABBET, WITH SPUR

Iron Stock, Japanned, Fitted with Spur and Detachable Depth Gauge. Each

No. 190—8 in. Long, 1½ in. Cutter, Weight Each 2½ Lbs. **$1.78**

No. 191—8 in. Long, 1¼ in. Cutter, Weight Each 2¼ Lbs. **1.78**

These Planes will lie perfectly flat on either side and can be used equally as well with right or left hand while planing into corners or up against perpendicular surfaces.

Fitted with a spur which permits them to be used for working across the grain. One in a Box.

Adjustable Iron Planes.

STANLEY'S

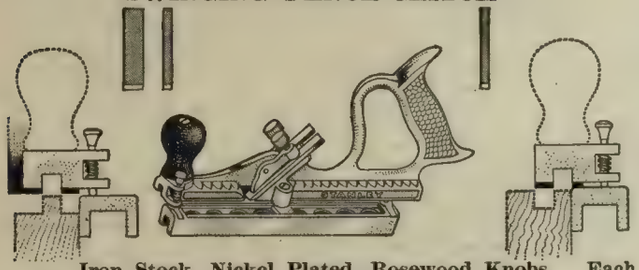
SKEW CUTTER, FILLETSTER AND RABBET

Iron Stock, Japanned. Each

No. 289—8½ in. Long, 1¾ in. Cutter, Weight Each 3¾ Lbs. **$2.90**

This Plane has an extra wide skew cutter. An adjustable spur is fitted to each side. The fence and depth gauge can be attached to either side; the plane is therefore suitable for right or left hand work. The adjustable fence slides under the bottom, regulating the width of the cut. Remove arms and fence, and a Skew Cutter Rabbet Plane is obtained.

SWINGING FENCE MATCH

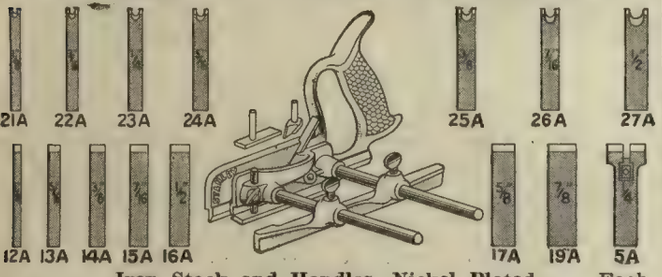


Iron Stock, Nickel Plated, Rosewood Knobs. Each

No. 48—Cuts $\frac{5}{16}$ in. Groove on Boards ¾ in. to 1¼ in., Centers on ⅞ in., Weight Each 3¾ Lbs. **$3.78**

This form has two plow cutters of the same width, and one extra wide cutter. The fence in one setting exposes two cutters for cutting the tongue, and, when reversed, leaves only one exposed for cutting the groove. On thicker boards than the plane works on center, the extra wide cutter is substituted for groove cutter when cutting tongue.

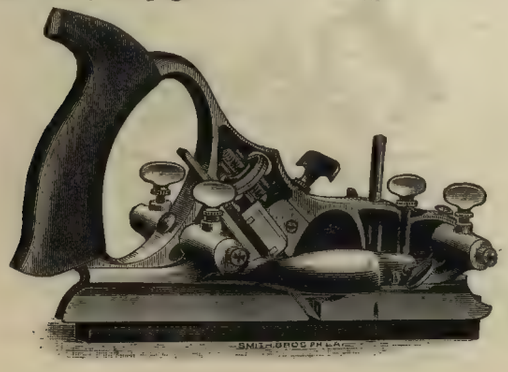
COMBINED PLOW, BEADING AND MATCH



Iron Stock and Handles, Nickel Plated. Each

No. 50—9¼ in. Long, 15 Cutters, Comprising 7 Plow and Dado Bits, ¼, $\frac{5}{16}$, ⅜, $\frac{7}{16}$, ½, ⅝ and ⅞ in., 7 Beading Tools, ⅛, $\frac{3}{16}$, ¼, $\frac{5}{16}$, ⅜, $\frac{7}{16}$ and ½ in. and ¼ in. Tonguing Tool, Weight Each 3½ Lbs. **$6.66**

This is a very handy tool for light work. It consists of a main stock, carrying a spur, a heading gauge and a depth gauge, and forming a support for one side of the cutter; a sliding section, carrying a spur and forming a support for the other side of the cutter, and a fence with a 5 in. adjustment. **For Parts, see page 171.**



DUPLEX, FILLETSTER AND RABBET

Iron Stock, Japanned.

No. 78—8½ in. Long, 1½ in. Cutter, Weight Each 3 Lbs. **$2.35**

This Plane has two seats for the cutter, one for regular work and the other where a bull-nose is required. It has a spur and a removable depth gauge. The adjustable fence can be used on either side and slides under the bottom, regulating the width of the cut. To work same as a rabbet plane, remove fence and arms.

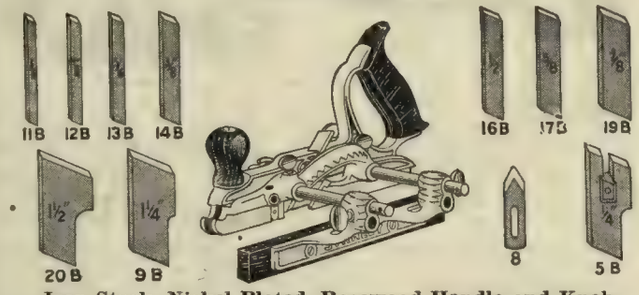
DOUBLE END MATCH

Iron Stock and Handle, Nickel Plated. Each

No. 148—Cuts ¼ in. Groove on Boards ¾ to 1 in., Centers on ⅞ in., Weight Each 2⅜ Lbs. **$3.12**

These Planes have two separate cutters, a plow and a tongue tool, both governed by one permanent fence. The tongue tool has one edge wider than the other, which overhangs one side when tonguing on center. Both tongue and groove are cut by working the tool in the same direction, by merely reversing it end for end.

COMBINED PLOW, DADO, FILLETSTER AND MATCHING



Iron Stock, Nickel Plated, Rosewood Handle and Knob. Each

No. 46—10½ in. Long, 11 Cutters, Comprising 8 Plow and Dado Bits, $\frac{3}{16}$, ¼, $\frac{5}{16}$, ⅜, ½, ⅝, ⅞ and 1¼ in., One 1½ in. Filletster Cutter, One ¼ in. Tonguing Tool and One Slitting Cutter, Weight Each 5¾ Lbs. **$7.80**

Skew cutters are the feature of this Plane. It consists of a main stock carrying a spur, a depth gauge and a slitting cutter, a sliding section carrying a spur and forming an extra sole for the Plane, and a fence (rosewood face) which can be set for either plow or filletster work. **For Parts, see page 171.**

SIEGLEY'S IMPROVED ADJUSTABLE COMBINATION

Iron Stock, Nickel Plated.

Each

No. 2S—10½ in. Long, 18 Cutters, Comprising 9 Plow and Dado Bits, $\frac{3}{16}$, ¼, $\frac{5}{16}$, ⅜, $\frac{7}{16}$, ½, ⅝, ¾ and ⅞ in., 7 Beading Tools, ⅛, $\frac{3}{16}$, ¼, $\frac{5}{16}$, ⅜, $\frac{7}{16}$ and ½ in., One ⅞ in. Match Cutter and a Sash Tool, Weight Each 8 Lbs. **$10.45**

This Plane is a combination of a Carpenters' Plow and Dado with a Side and Center Beading Plane.

All Above, One in a Box.

Adjustable Iron Planes

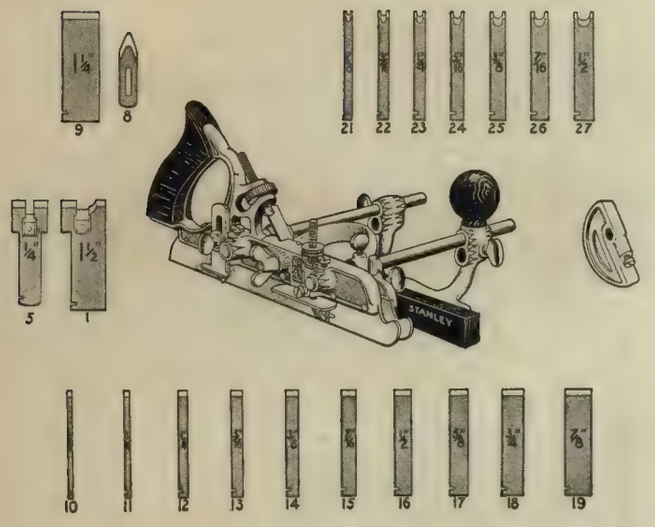
STANLEY'S **Write for Prices on Parts.**



Nickel Plated Stock, Selected Rosewood Handle, Knob and Fence.

	Each
No. 45—With 21 Cutters, Weight Each 9½ Lbs.....	**$12.00**

Seven tools in one in compact and practical form. 1, Beading and Center Beading Plane. 2, Plow. 3, Dado. 4, Rabbet and Filletster. 5, Match Plane. 6, Sash Plane. 7, Slitting Plane.

The Plane has two principal parts, a Main Stock and a Sliding Section. The main stock carries the handle, cutter adjustment, a slitting tool, depth gauge, and forms a bearing for one edge of the Cutter. The Sliding Section slides on two arms secured on the stock and has a bearing for the other edge, allowing cutters of different widths to be used. A fence also slides on these arms for use when working as a plow, beader or filletster, to gauge the distance from the cutter to the edge of the board, and to keep the cutter at right angles to same. When used as a filletster, the fence slides under the bottom of the Plane and determines the width of cutter exposed to the work.

The Plane is fitted with spurs for use across the grain, etc., and can be used either right or left hand. The handle, knob and fence are made of selected rosewood.

For beading at a distance from the edge of a board, attach cam rest (see cut at right of Plane) to the front arm between the sliding section and fence to prevent the fence sagging. in certain work attach same to the rear arm to prevent the Plane from rocking.

The Plane together with its 21 cutters is packed in a substantial box.

The following cutters are furnished with each Plane. The price is given in case duplicates should be required.

	Size	Style	Each
No. 1	1½ in.	Sash Tool	$0.50
No. 5	¼ in.	Match Tool	.50
No. 8		Slitting Tool	.30

NOSING TOOL, FOR No. 45 PLANE

	Each
No. 5 —1 1/16 in. Cutter, Works 1¼ in. Circle.....	**$1.80**
No. 5NC—1 1/16 in. Extra Cutters for No. 5 Nosing Tool..	**.25**

In order to work Hollows and Rounds, or a Nosing Cutter in the No. 45 Plane, it is necessary to substitute for the sliding section, specially formed bottoms which are called by the same name as the cutters they are designed to carry, that is: Hollows, Rounds or Nosing Tools.

A Hollow and its cutters will form a **Round** on the moulding being worked. A Round and its cutters will form a **Hollow.** A Nosing Tool and its cutters will form what might be called an exaggerated Round. It is very largely used for shaping the edges of stair treads. Hollows and Rounds are made in four sizes and are usually sold in sets, a set comprising one Hollow, one Round and two Cutters. The price of a Nosing Tool includes one Cutter.

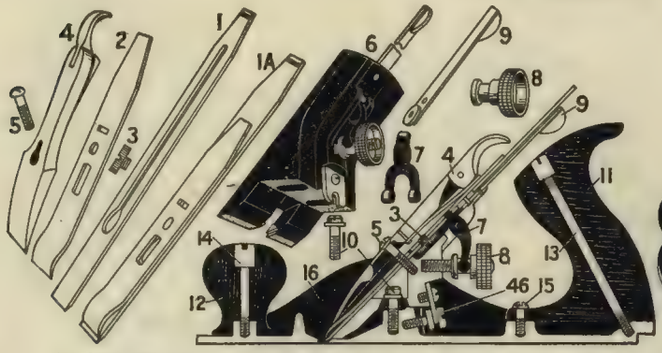
NOTE—For Repairs for No. 45 Planes, See Page 171.

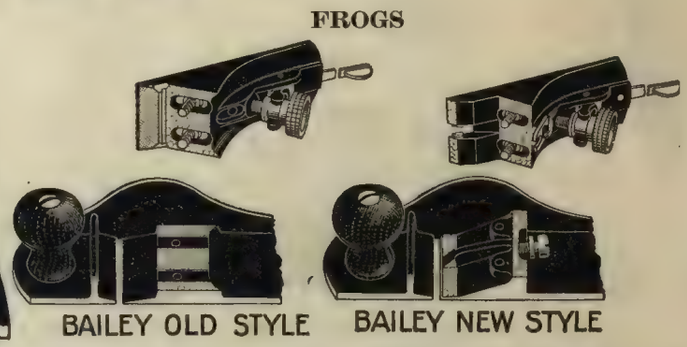
Plane Parts.

Write for Prices on Parts.

In several of the Planes, the Parts designated by the same name differ in form.
In these cases the corresponding Parts are given the same number; and when the Part is not shown directly opposite the number of the Plane, it will be found in another place on the plate.
Always give Plane number and Part number when ordering Cutters or Parts.

FOR BAILEY IRON PLANE





An improvement has been made in the "Bailey" Iron Plane which necessitated a change in the construction of the Bottom and Frog, thereby making it impossible to use the new style frog in an old style bottom, or the old style frog in the new style bottom.
For a time an intermediate style was made having same Frog and Bottom as the latest design, except there was no frog-adjusting screw, consequently no clip on the Frog.
The latest design Frog or Bottom will be furnished for both the intermediate and new style planes. If your plane is of the intermediate pattern, remove the steel clip from the frog and the parts will fit.
In order that we may fill your order for Frog correctly specify which style Plane you want.
The difference in the construction of Frogs and Bottoms is clearly shown in the illustrations above.

Adjustable Scraper Planes.

STANLEY'S

Double Handle Veneer Scraper.
Japanned Iron Face, Rosewood Double Grip Handle. Each
No. 12—9½ in. Long, 3 in. Adjustable Blade, Weight Each About 3¾ Lbs.....**$3.35**
The Handles placed across the center of the Tool give it a good balance. The Blades are adjustable endwise and for angle and can be locked in position desired.
One in a Box.

Double Handle Veneer Scraper.
Detachable Rosewood Faced Bottom, Rosewood Double Grip Handle. Each
No. 12½—9½ in. Long, 3 in. Adjustable Face, Weight Each About 4 Lbs.....**$4.70**
This Plane is same as No. 12 but has extra bottom and face. Especially adapted for use on fine work as it renders less liable the possibility of marring or scratching the surface being worked upon.
One in a Box.

Single Handle Veneer Scraper.
Japanned, Rosewood Handle and Knob. Each
No. 112—9 in. Long, 3 in. Adjustable Blade, Weight Each About 4 Lbs.....**$3.15**
This Plane has the same form as the Regular "Bailey" Plane. The Blades are adjustable endwise and for angle and can be firmly locked in position desired.
One in a Box.

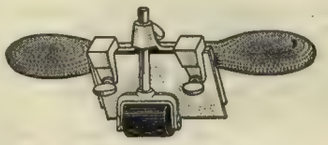
Cabinet Makers' Scrapers.

STANLEY'S

Scraper Plane.
Rabbet Mouth Scraper, Tilting Rosewood Handle and Knob. Each
No. 85—8 in. Long, 2 in. Blade, Weight Each About 2⅝ Lbs.**$3.35**

Scraper Plane.
Regular Mouth Scraper, Stationary Rosewood Handle and Knob. Each
No. 87—8 in. Long, 2 in. Blade, Weight Each About 2½ Lbs.**$2.80**

When in use the blade rests against the front edge of the mouth under a slight pressure. In working, the blade springs backward, opening the mouth and allowing the shaving to pass through it. As soon as working pressure is released the blade springs back to its normal position. Made in two styles, one, a Rabbet Scraper with handle and knob pivoted, to allow tilting for convenience when working into corners or up against perpendicular surfaces, and the other, without a rabbet mouth and with stationary handle and knob.
One in a Box.

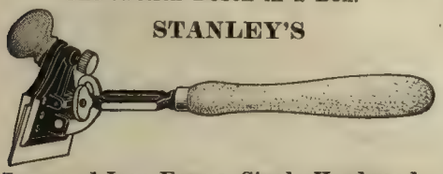


Roller Scraper.
Detachable Beech Handle, with Roller Back of Blade, Nickel Plated Frame. Per Dozen
No. 83—9½ in. Long, 3 in. Blade, Weight Per Dozen About 15 Lbs.....**$16.10**
This Scraper can be adjusted to any desired pitch. The Roller acts as a support to relieve the strain on the wrist and hands of workman. Handles may be detached for working into corners.
One-twelfth Dozen in a Box.

STANLEY'S

One Piece Cast Raised Handles and Body, Japanned. Per Dozen
No. 80—11 in. Long, 2¾ in. Blade, Weight Per Dozen About 21 Lbs.....**$15.00**
The Blade of this Scraper can be sprung to a curve by means of a thumb screw giving ease of operation and quickness of cut.
One-twelfth Dozen in a Box.

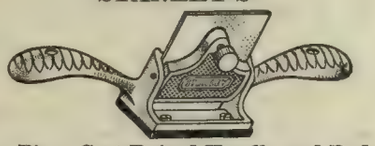
STANLEY'S



Japanned Iron Frame, Single Hardwood Handle and Knob. Per Dozen
No. 82—14½ in. Long, 3 in. Adjustable Steel Blade, Weight Per Dozen 21 Lbs.....**$16.65**
The Handle can be tilted to give the blade any desired angle. Special blades of different forms and widths can be securely held in any position required, permitting the Tool to be worked in many places inacessible by other tools.
One-twelfth Dozen in a Box.

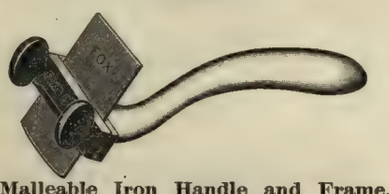
Cabinet Scrapers.

STANLEY'S



One Piece Cast Raised Handle and Body, Nickel Plated, Rosewood Face. Per Dozen
No. 81—10 in. Long, 2½ in. Blade, Weight Per Dozen About 27 Lbs.....**$24.45**
This Scraper has a rosewood face for use in the finest cabinet work.
One-twelfth Dozen in a Box.

FOX

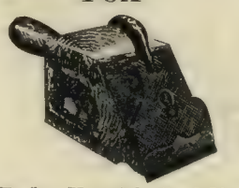


Malleable Iron Handle and Frame, Bronzed, with Thumb Screws, Tempered Steel Blades. Per Dozen
No. 8—7 in. Long, 2x3 in. Steel Blade, Weight Per Dozen About 7 Lbs.....**$6.10**
One Dozen in a Box.

ATKINS' RAMSHORN

Selected Wood Handle, Silver Steel Blade, 19 Gauge. Per Dozen
No. 201—12 in. Long, 3½x3 in. Blade, Weight Per Dozen About 18 Lbs.....**$14.00**
One-twelfth Dozen in a Box.

FOX



Wood Body, Varnished, Adjustable Blade, Malleable Handy Clamp. Per Dozen
No. 100—3¼ in. Blade, Body 6 in. Long, 3½ in. Wide, 3½ in. High, Weight Per Dozen About 33 Lbs.....**$20.00**
The Body slides on the Wood insuring a cut of uniform depth. The Blade is fastened with a Handy Clamp and can be adjusted or reversed in a second's time. Work equally well in a horizontal or perpendicular position.
One-twelfth Dozen in a Box.

Cabinet Scrapers.

BISHOP'S

Beveled Edge Steel Blade, 16 Gauge, Beechwood Curved Handle, Varnished Top and Bottom, with Thumb Screw.

Per Dozen

Cabinet or Floor Scrapers.

STARRETT'S

Starrett's Universal, Adjustable.

Fine Steel Blade, Highly Tempered and Ground Perfectly on All Edges Making 8 Cutting Edges, Hardwood Handle, Ball Connection, Removable Guard.

Per Dozen

No. 194—9¼ in. Long, 3x4⅝ in. Blade, Weight Per Dozen About 15 Lbs.....**$21.65**

The Ball Joint Connection in handle makes it possible to bring any edge instantly in use. The removable guard works equally well on any side.

This Scraper is for use on Floors, Benches, Meat Blocks, Cabinet Work and any hardwood.

One-twelfth Dozen in a Box.

Per Dozen

Extra Blades—3x4⅝ in., for No. 194 Cabinet Scrapers.**$3.60**

Starrett's Adjustable.

Fine Steel Blade, Highly Tempered and Ground Perfectly on All Edges Making 8 Cutting Edges, Hardwood Handle, Steel Frame, Sheet Steel Head, Ball Connection.

Per Dozen

No. 181—12 in. Long, 3x4⅝ in. Blade, Weight Per Dozen About 15 Lbs.....**$25.60**

The Handle is connected to a Universal Joint allowing it to be set at any angle, enabling user to get into corners without bruising the knuckles or bumping the hand against the wall. A twist of the handle locks it firmly.

One-twelfth Dozen in a Box.

Per Dozen

Extra Blades—3x4⅝ in., for No. 181 Scraper.....**$3.60**

ATKINS' PERFECTION

Adjustable, 16 Gauge, Silver Steel Blade, Highly Tempered, 4 Edges Sharpened, Strong Malleable Iron Holder, Nickel Plated, Screwed into 9 in. Handle, Finely Finished.

Per Dozen

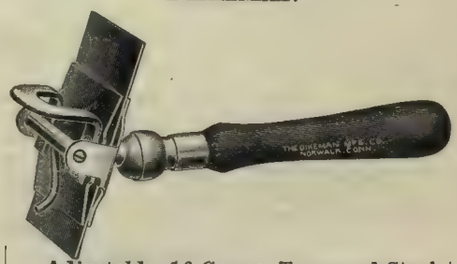
No. 185—12 in. Long, 3x3 in. Blade, Weight Per Dozen About 9 Lbs.....**$12.80**

Extra Blades—3x3 in., for No. 185 Cabinet Scraper..... **2.25**

This Scraper is perfectly rigid and will work in corners and close quarters.

One-half Dozen in a Box.

DIKEMAN



Adjustable, 16 Gauge, Tempered Steel Blade, Polished, Ball and Socket Connection, Perfection Steel Hand Rest, Wood Handle.

Per Dozen

No. 125—11 in. Long, 3x5 in. Blade, Weight Per Dozen About 26 Lbs.....**$20.00**

The Perfection Hand Rest provides a natural means for carrying Tool back and forth and being near the cutting edge of blade which is rigidly held between steel plates prevents chattering.

One-twelfth Dozen in a Box.

BENNETT'S

Adjustable, Tempered Steel Blade, with Hardwood Handle, Nickel Plated Trimmings, Removable Guard.

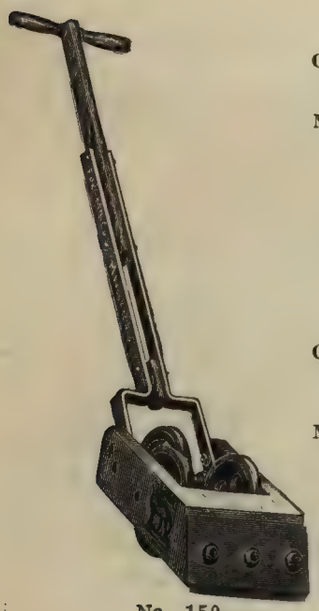
Per Dozen

No. 210—12 in. Long, 3x5 in. Blade, Weight Per Dozen About 14 Lbs.....**$14.45**

The position of Handle or Blade can be changed instantly to suit any work.

One-twelfth Dozen in a Box.

Floor Scraping Machines.



No. 150.

FOX

Cast Iron Frame, Bronzed, Adjustable English Steel Blade, 3 Rubber Tired Wheels, Adjustable Maple Handle, Cold Rolled Steel Handle Irons. Each

No. 150—Fox, 9 in. Blade, Body 14 in. Long, 4 in. High, 9 in. Wide, Furnished with 8 Knives, (Consisting of Four 9x3 in. Finishing Knives, Three 4x3 in. Old Floor Knives and One 9x3 in. Polishing Knife), One Wrench, One Mill File, One Oil Stone, One Burnisher, One Clamp Block (for Sharpening Knives) and Set of Directions. **$40.00**
Weight Each Boxed About 95 Pounds.

NEW FOX

Cast Iron Frame, Bronzed, Adjustable Removable Weight, Adjustable English Steel Blade, Rubber Tired Wheels, Adjustable Maple Handle, Cold Rolled Steel Handle Irons. Each

No. 155—New Fox, 9 in. Blade, Body 18 in. Long, 8 in. High, 9 in. Wide, Furnished with 12 8⅞x3 in. Crown Knives, Six 4x3 in. Old Floor Knives, One Special Knife (Substitute for Sander), One Wrench, One File, One Oil Stone, One Burnisher, One Clamp Block (for Sharpening Knives) and a Set of Directions..... **$67.00**
Weight Each Boxed About 135 Pounds.

No. 155.

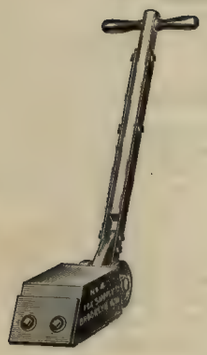
FOX No. 4

Cast Iron Frame, Planed Bottom, Corrugated to Insure Smooth Surface and at the Same Time Make it Lighter for Operator, English Steel Blade, 4½ in. Rubber Tired Wheels, 38 in. Adjustable Handle, Steel Handle Irons.

Each

No. 4—Fox, 6 in. Blade, Body 12 in. Long, 6 in. Wide, 5 in. High, Furnished with 6 Regular Cutting Knives, 3x6 in., 1 Hone, 1 Burnishing Steel and 1 Wrench..... **$26.65**

Weight Each Boxed About 90 Pounds.



No. 4.

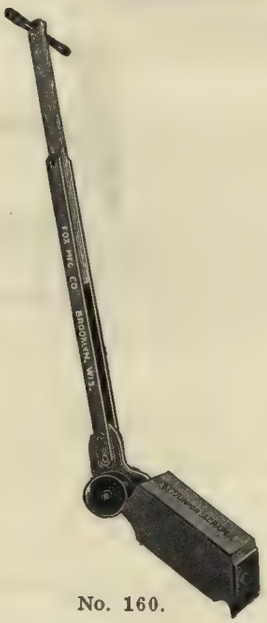
FOX JUNIOR

Cast Iron Frame, Bronzed, Adjustable Steel Blade, Rubber Tired Wheels, Adjustable Maple Handle, Cold Rolled Steel Handle Irons.

Each

No. 160—Fox Junior, 4x3 in. Blade, Body 16½ in. Long, 4½ in. High, 5 in. Wide, Furnished with Four Knives, One Wrench, One Oil Stone and One Burnisher..... **$20.00**

Weight Each Boxed About 72 Pounds.



No. 160.

Floor Scrapers.

No. 10.

Cast Iron Frame, Aluminum Finish, High Grade Crucible Steel Blade, 5 in. Rubber Tired Wheels, Hardwood Handle, 38½ in. Long.

Each

No. 10—Stearn's, 6 in. Blade, Body 14 in. Long, 9 in. High, 6 in. Wide, Weight Each About 100 Lbs... **$20.00**

The Knife scrapes the floor when machine is drawn toward operator and will therefore work up to the wall and into the corners. The Knife is firmly clamped in the scraper, which together with the weight of the machine nearly all of which rests on the Knife prevents vibration or chatter doing away with all wavy effects on the floor.

Knife Sharpeners.

Cast Iron Frame. Each

Fox Knife Sharpener—13 in. Wide, 16 in. Long Over All, Will Take Any Size Knife Up to 9 in., Weight Each 10¾ Lbs..... **$8.35**

Specially designed for the purpose of sharpening, honing and turning a perfect edge on any Hand or Floor Scraper Knife.

Floor Scraper Knives.

Per Dozen

Extra Knives—9x3 in., for Nos. 150 and 155 Floor Scraping Machines **$8.90**
Weight Per Dozen About 3 Pounds.

Burnishers.

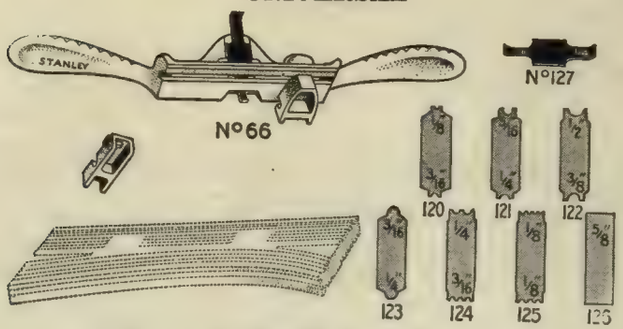
High Grade Tempered Carbonized Steel, Wood Handle.

Per Dozen

Burnishers—9 in. Long, ¼x5 in. Steel, 4 in. Handle.. **$4.50**
Weight Per Dozen About 2 Pounds.
One Dozen in a Box.

Hand Beaders.

UNIVERSAL



Two Curved Handles, All Metal, Nickel Plated.

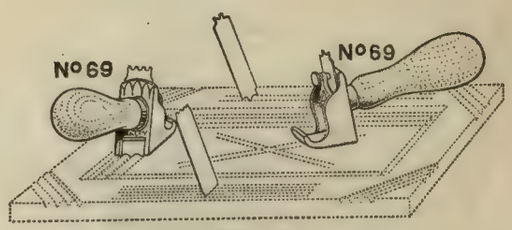
	Each
No. 66—1½ in. Long, with 8 Cutters, Weight About 1⅜ Lbs	$1.45
Extra Cutters or Blanks for No. 66	.12

This is an excellent tool for beading, reeding or fluting straight or irregular surfaces and for light routering. The sample illustrated shows some of the work that can be done with its use. With each beader are furnished a square gauge for straight work and an oval gauge for curved work. There are also furnished eight cutters sharpened at both ends and embracing the following assortment, 6 single beads ⅛, 3/16, ¼, 5/16, ⅜ and ½ inches; 2 fluting tools 3/16 and ¼ inches; 4 reeding tools (2 beads 3/16 inch, 3 beads ¼ inch, and 3 beads ⅛ inch and 4 beads ⅛ inch), 2 routers ⅛ and ¼ inch, and a ⅝ inch blank, which latter cutter the owner can file up as he desires.

The handles are curved so as to insure ample room between the workman's hands and the surface of the work.

One in a Box.

STANLEY'S



Single Handed Nickel Plated Metal Stock Raised Maple Handle, Well Ferruled.

	Per Dozen
No. 69—5 in. Long, with 7 Cutters, Weight About 4½ Lbs	$12.25
	Each
Extra Cutters or Blanks for No. 69	$0.12

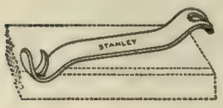
This is a very handy little article. With it one can do all kinds of straight beading, reeding or fluting. The sample of work shown in connection with the tool illustrates some of the usages to which it can be put.

The assortment of cutters that accompany each tool is the same as that furnished with the No. 66 Beader (except that there are no router cutters), comprising, 6 single beads ⅛, 3/16, ¼, 5/16, ⅜ and ½ inches; 2 fluting tools 3/16 and ¼ inches; 4 reeding tools (3 beads 3/16 inch, 2 beads ¼ inch, 3 beads ⅛ inch and 4 beads ⅛ inch), and a ⅝ inch blank.

One-twelfth Dozen in a Box.

Cornering Tools.

STANLEY'S



Flat Steel.

	Per Dozen
No. 28—5½ in. Long, 1/16 and ⅛ in. Cutter, Weight Per Dozen About 1½ Lbs	$4.50
No. 29—5½ in. Long, 1/16 and ¼ in. Cutter, Weight Per Dozen About 1½ Lbs	4.50

These Tools are used by Pattern Makers and all Wood Workers for rounding sharp edges. They have a different size cutter at each end and their form is such that no depth gauge is required.

One-half Dozen in a Box.

Chisel Gauges.

STANLEY'S

Blind Nail Tool.

Adjustable, Steel Stock, Nickel Plated.

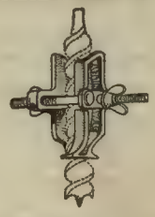
	Per Dozen
No. 96—2¼ in. Long, Weight Per Dozen 1 Lb	$4.00

This Tool can be attached to a ¼ in. Chisel (beveled edge up) and permits a shaving of any desired thickness to be raised for blind nailing or for inlaid work.

One-half Dozen in a Box.

Bit Gauges.

STANLEY'S



Adjustable, Cast Iron Frame, Nickel Plated.

	Per Dozen
No. 49—2½ in. Long, Weight Per Dozen 2½ Lbs	$8.35

This Gauge can be attached to any size bit up to 1 in. in diameter. Two projections engage with the twist of the bit so it can be accurately set for the bit to bore to any depth desired. Stops on both sides of the bit insure it remaining upright when desired depth is reached thus preventing worm being bent or broken.

One-twelfth Dozen in a Box.

Cutter and Chisel Grinders.

STANLEY'S

	Each
No. 200—Made Entirely of Metal, Nickel Plated, Weight Each 1⅝ Lbs	$1.35

A device for holding Plane Irons, Chisels and other similar cutting tools that they may be ground or honed to any desired angle or bevel, insuring an accuracy that is very difficult to obtain when the tool is held in the hand.

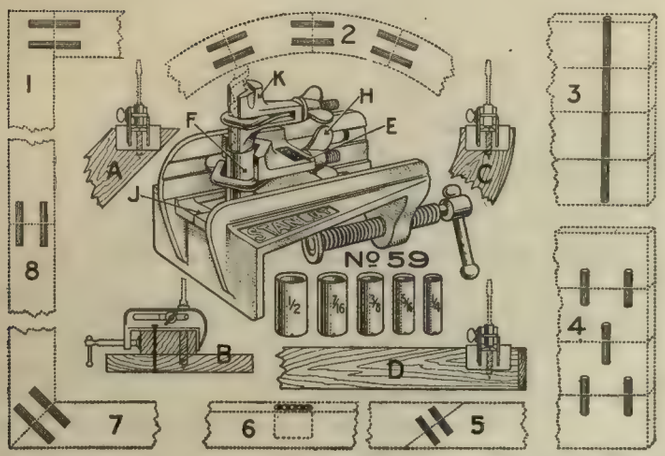
The tool to be sharpened is rigidly held in the Grinder by thumb screws and may be given any desired angle by means of the large screw attached to the roller frame which raises or lowers the main body.

The Grinder is fitted with two thumb screws, consequently the tool to be ground is held much more firmly than is possible with the use of a single screw.

One in a Box.

Doweling Jig..

STANLEY'S



Each

No. 59—Made Entirely of Metal, Nickel Plated, Milled True Working Parts, Weight Each About 1½ Lbs. **$2.80**

This Tool is for the purpose of enabling the user to bore dowel holes in the edge, end or surface of work with ease and accuracy. It will take any thickness of material up to three inches. It is also an excellent bit guide for mortising.

With the Doweling Jig the steel guide is automatically set to guide the bit properly when the Jig is clamped to the work.

Five steel guides 1¼ inches long are furnished: (¼, 5/16, ⅜, 7/16 and ½ inch). To allow for variations in size of bits guides are made 1-100 of an inch larger than the sizes given.

In the illustration, which shows the tool complete, "E" is the slide carrying the steel guide "F," by means of which the bit can be brought to the required distance from the edge of work. Guide "F" is held in slide "E" by the screw clamp and thumb nut "H."

In laying out the work, first mark across the edge of the stock the desired location of the dowel hole from the end of the work.

Having decided upon the distance the dowel hole is to be from the surface of the work, place the bit guide in the slide, bringing the two marks on lower edge of guide the same distance from the end of the Jig as the centre of the dowel hole is to be from the surface of the work. The under side of the Jig is graduated for this purpose.

Then place the Jig on the work, bringing the mark "J," on the front of the tool, so that it is in line with the mark on the edge of the stock.

A depth gauge "K" is also furnished which can be used with or without the Jig. Where used without the Jig, it should be set with the large end towards the point of the bit; in using same with the Jig it should be set with the small end down. See cut.

Fig. A, the proper way of attaching Jig when boring dowel holes on mitred or special work.

Fig. B, the method used in boring dowel holes on the surface of a board. For this work it is necessary that a temporary block be nailed to same as shown in illustration.

Fig. C, how the Jig should be attached when doweling segments of circles.

Fig. D, the setting of the Jig for all kinds of ordinary doweling.

Figs. 1 to 7 show various forms of work where the Jig can be used to good advantage as follows—1. Butted corner. 2. Circular segments. 3. Single matching. 4 Staggered matching. 5. Spliced Joint. 6. Mortising. 7. Mitered corner. 8. Butted Joint.

One in a Box.

Jointer Gauges.

For Wood Planes Only.

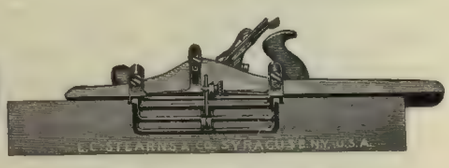
Adjustable Iron Frame, Nickel Plated.

Each

No. 8—8 in. Over All, Weight Each About 1¼ Lbs..... **$1.35**

Attached to a Wood Plane with round head wood screws.

One-twelfth Dozen in a Box.



For Iron or Wood Planes.

Adjustable Iron Frame, Japanned and Nickel Plated.

Each

No. 7—9 in. Over All, Weight Each About 1¾ Lbs..... **$2.25**

Quickly attached to an Iron Plane by the three thumb screws. For Wood Plane take out the thumb screws and use round head screws with the washer furnished with the gauge.

One-twelfth Dozen in a Box.

For Iron Jack or Jointer Planes.

Adjustable, Iron Frame, Nickel Plated, Wood Knob.

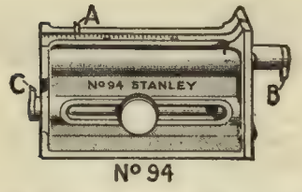
Each

No. 386—11 in. Over All, Weight Each 2 Lbs..... **$2.45**

All joints and bearing surfaces are machined. The method of attaching Gauge to a Plane is such as to insure its being absolutely rigid when in use, and it is so constructed that it may be attached to either side of the Plane. The wooden knob can be placed at either end of the Gauge. A hole is bored in each end of the Gauge so that a wood face of any desired size may be attached.

One in a Box.

Butt Gauges.

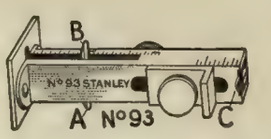


Iron Body, Steel Bars, Nickel Plated.

Per Dozen

No. 94—Graduated in 16ths, for 2 in., Weight Per Dozen About 7½ Lbs.....**$16.65**

One-twelfth Dozen in a Box.

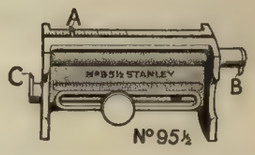


Steel Head, Brass Slide, Nickel Plated.

Per Dozen

No. 93—Graduated in 16ths, for 2 in., Weight Per Dozen About 3 Lbs.....**$13.90**

One-twelfth Dozen in a Box.



Iron Body, Steel Bars, Nickel Plated.

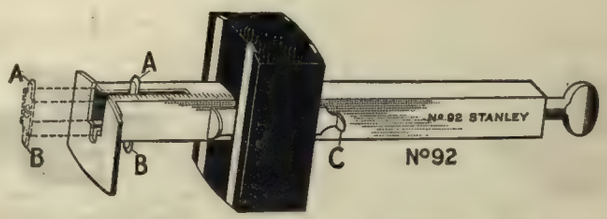
No. 95½—Graduated in 16ths, for 1½ in., Weight Per Dozen About 4½ Lbs.....**$10.00**

One-twelfth Dozen in a Box.



Rosewood Head, Brass Slide, Adjustable Screw.

Per Dozen

No. 92—Graduated in 16ths, for 3 in.....**$21.65**

Weight Per Dozen About 9 Pounds.

One-twelfth Dozen in a Box.

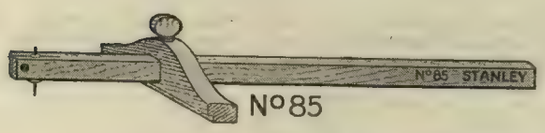
In hanging doors, there are three measurements to be marked—the location of butt on the casing, the location of butt on the door, and the thickness of butt on both casing and door. The term "Butt Gauge" covers a Gauge having three cutters, purposely arranged so that no change of setting is necessary when hanging several doors. In reality these tools comprise Rabbet Gauges, Marking Gauges and Mortise Gauges of a scope sufficient for all door trim, including lock plates, strike plates, etc.

In the illustration, the various cutters are marked by a letter which, in the several cuts, designates the cutter doing the same work. Cutter "A," which marks from the rabbet in the jamb, and cutter "B," which marks from the edge of the door engaged in closing, are mounted on the same bar and set by one adjustment with proper allowance for clearance; cutter "C" marks the thickness of the butt.

When casings have a nailed-on strike instead of being rabbeted, a Marking Gauge which will work on a ledge as narrow as ⅛ inch is required; in this case the same distance is marked from the edge of the casing and from the edge of the door not engaged when closing. Gauges 94 and 93 can be used on such work, cutter B marking for the butt and cutter "C" for its thickness. Gauge 94 is made so that it can be used as inside or outside Square for squaring the edge of the butt on either the door or jamb.

The dotted lines on end of No. 92 show same when set to be used as a Mortise Gauge. All Bars are locked by set screws and are graduated in sixteenths of an inch.

Panel Gauges.



Beechwood Oval Bar, Wood Thumb Screw, Adjustable Steel Points.

Per Dozen

No. 85—17½ in. Long, Weight Per Dozen About 5⅝ Lbs. **$3.35**

These Gauges used for marking door panels and such wide work where an extra long bar is needed. Have an extra wide head that is rabbeted to prevent slipping.

One-half Dozen in a Box.

Slitting Gauges.

One-half Dozen in a Box.

Double Bar, Beechwood, Boxwood Thumb Screw, Polished, Brass Face, Oval Bars, Marked 16ths for 6 in. from Point, Steel Points.

Per Dozen

No. 172—8½ in. Long, Weight Per Dozen About 4 Lbs. **$5.15**

One-half Dozen in a Box.

Gauges Nos. 161 to 172 have a Brass Face with two ribs or projections, attached to one side of the Gauge Head (see Engraving,) which enables the owner to run a gauge line with perfect steadiness and accuracy around curves of any degree, and either concave or convex. The Gauge Head is reversible, and the flat side can be used for all ordinary work.

Metal Bar Gauges.

STANLEY'S

MARKING

Single Steel Bar, Machined Cast Head, Nickel Plated, Marked 16ths for 5 in.

Per Dozen

No. 90—6½ in. Long, with Pin Point, Weight Per Dozen About 3 Lbs. **$6.35**

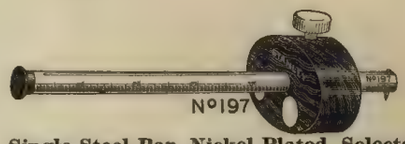
One-twelfth Dozen in a Package.

Single Steel Bar, Machined Cast Head, Nickel Plated, Marked 16ths for 5 in.

Per Dozen

No. 97—6½ in. Long, with Pin Point and Roller Cutter, Weight Per Dozen About 6 Lbs. **$9.35**

One-twelfth Dozen in a Box.

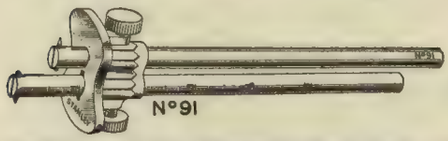


Single Steel Bar, Nickel Plated, Selected Rosewood Head, Brass Face Plate Inserted, Marked 16ths for 5 in.

Per Dozen

No. 197—6½ in. Long, with Pin Point and Roller Cutter, Weight Per Dozen About 6 Lbs. **$10.55**

One-twelfth Dozen in a Box.

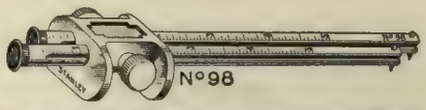


Double Steel Bar, Machined Cast Head, Nickel Plated, Marked 16ths for 5 in.

Per Dozen

No. 91—6½ in. Long, with Pin Points, Weight Per Dozen About 6 Lbs. **$10.80**

One-twelfth Dozen in a Package.

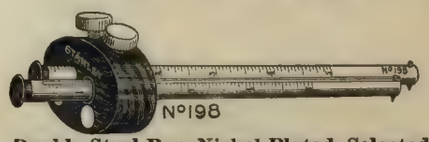


Double Steel Bar, Machined Cast Head, Nickel Plated, Marked 16ths for 5 in.

Per Dozen

No. 98—6½ in. Long, with Pin Point and Roller Cutter, Weight Per Dozen About 7½ Lbs. **$13.90**

One-twelfth Dozen in a Box.



Double Steel Bar, Nickel Plated, Selected Rosewood Head, Brass Face Plate Inserted, Marked 16ths for 5 in.

Per Dozen

No. 198—6½ in. Long, with Pin Point and Roller Cutter, Weight Per Dozen About 7½ Lbs. **$15.10**

One-twelfth Dozen in a Box.

In the above Gauges two types of cutters are used—one a pin point; the other a roller cutter which can be used close into rabbets or corners and is recommended for working across the grain, over knots, etc. Some numbers combine both styles of markers by having one at each end of the bar. Where there is a marker at each end of the bar, the heads are double faced. The bars in those Gauges having a metal head can be set so that either a narrow or wide gauging surface is obtained. Where two cutters are fitted on one bar, there are graduations for each cutter.

Pattern Makers' Gauges.

MARKING

Single Metal Bar, Nickel Plated, Rosewood Head, NOT GRADUATED.

Per Dozen

No. 297—9 in. Long, with Roller Cutter, Weight Per Dozen About 7½ Lbs. **$11.65**

One-twelfth Dozen in a Box.

MARKING AND MORTISE

Double Metal Bar, Nickel Plated, Rosewood Head, NOT GRADUATED.

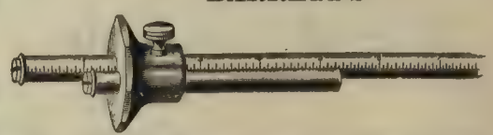
Per Dozen

No. 298—9 in. Long, with Roller Cutter, Weight Per Dozen About 7½ Lbs. **$16.45**

One-twelfth Dozen in a Box.

Combination Gauges.

BARRETT'S



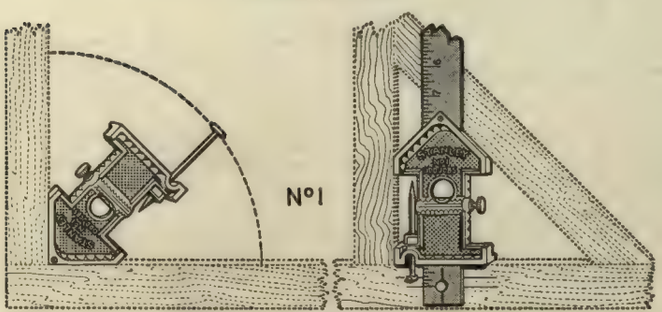
Double Metal Bar, Cast Iron Head, Nickel Plated, Marked 16ths.

Per Dozen

No. 30—8 in. Long, with Roller Cutter, Weight Per Dozen About 9 Lbs. **$16.10**

One-half Dozen in a Box.

Odd Jobs.



Cast Iron Frame, Nickel Plated, with Level and 12 in. Graduated Rule.

Per Dozen

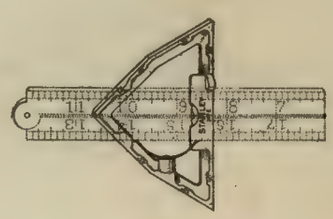
No. 1—4 in. Long, Weight Per Dozen About 7½ Lbs. . **$15.00**

This Tool is well named, as with its use the owner can do all ordinary jobs with the addition of only a saw, a hammer and a plane.

It combines a Level, Plumb, Try Square, Mitre Square, Bevel, Scratch Awl, Depth Gauge, Marking Gauge, Mitre Gauge, Beam Compass and a One Foot Rule. The rule is graduated in sixteenths of inches.

One-twelfth Dozen in a Box.

Rule Tools.



Cast Iron Frame, Nickel Plated, 3 Angle.

Per Dozen

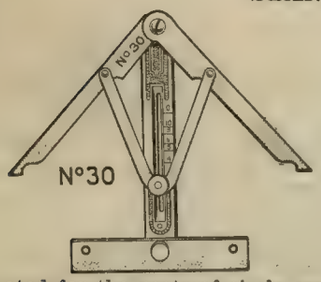
No. 2—Weight Each 3 Oz., **without Rule**, Weight Per Dozen 2¼ Lbs. **$8.35**

Can be easily and quickly attached to any two foot rule that is 1 inch in width by simply slipping the rule between the spring and the boss as shown in the cut. In this combination it may be used as a Plumb, a Level, a Square, a T Square, a Mitre Square, a 30 Degree Square, a Depth Gauge or a Marking Gauge.

One Dozen in a Box.

Angle Dividers.

STANLEY'S



Cast Iron Frame, Nickel Plated Steel Arms and Adjusting Screw.

Each

No. 30—7⅜ in. Long, Weight Each ⅝ Lb. **$2.12**

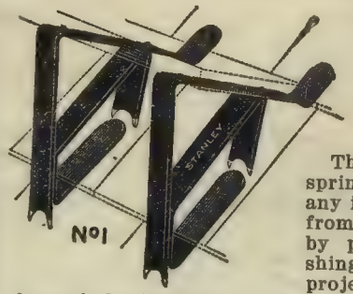
With this tool any angle can be found and bisected. Fitting molding or other wood work to odd angles can be done with ease and certainty. It is also graduated for the parts of circle commonly used. A handy tool for laying out work.

The Angle Divider is accurately made and can be used as a Try or "T" Square.

One in a Box.

Roofing Brackets.

STANLEY'S



Spring Steel Parts, Riveted, Japanned.

Per Dozen

No. 1—8 in. Long, 1 in. Wide, Ap. Wt. Per Dozen 13½ Lbs. **$5.00**

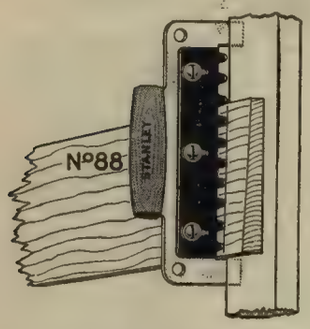
These Brackets are made of spring steel so constructed that any increase of pressure or weight from above increases their security by pressing the spurs into the shingles. Two steel spurs also project above the horizontal surface of the bracket to secure the staging boards. There are no loose parts to get lost and no nail holes are made in the roof.

One-half Dozen in a Box.

Clapboard Siding Marker.

STANLEY'S

Iron Stock, Adjustable Steel Blade, Wood Handle.



No. 88—Marker.

Each

No. 88—8¾ in. Long, 4 in. Wide, Weight Each ⅞ Lb. . . **$0.80**

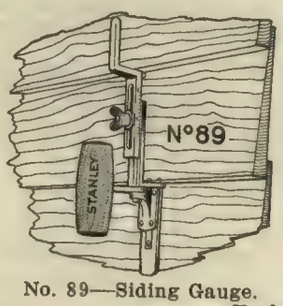
This tool can be used with one hand, while the other is employed in holding a clapboard in position. The marking blade is easily adjusted to any thickness of clapboard or siding. The sharp edges of the teeth are just parallel with the legs when in position to mark. By moving the tool half an inch, it will mark a full line across the clapboard, exactly over and conforming to the edge of the corner board.

One in a Box.

Clapboard Siding Gauge.

STANLEY'S

Iron Stock, Steel Blades, Wood Handle.



No. 89—Siding Gauge.

Each

No. 89—8¾ in. Long, 2½ in Wide, Weight Each ⅝ Lb..... **$0.80**

Two thin steel blades, which form a part of the base of the tool, will slide under the last clapboard already laid. When the bottom of the gauge is held firmly to the lower edge of the clapboard, press the handle over sidewise, and this will force another thin blade down into the next lower clapboard rendering them immovable. The clapboard can be hald any width to the weather, by the graduated scale on the tool. After the tool is released, the mark left is so slight that painting alone will fill it.

Three in a Box.

Trammel Points.

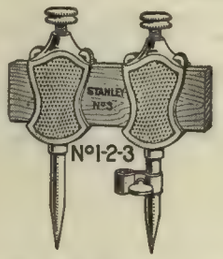
Rule Trammel Points.

Set Consists of Two Brass Trammel Heads with Movable Steel Point and One Head with Pencil Socket.

Per Set

No. 99—For Straight Edge up to ¾ in., Weight Per Set ⅜ Lb. **$0.90**

One Set in a Box.



Bronze Metal Steel Points, with Pencil Socket.

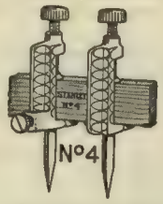
Per Pair

No. 1—Small, for ⅝ in. Straight Edge, Wt. Per Pair ¼ Lb.. **$1.68**

No. 2—Medium, for 1 in. Straight Edge, Wt. Per Pair ⅜ Lb.. **2.00**

No. 3—Large, for 1¼ in. Straight Edge, Wt. Per Pair ⅝ Lb. **2.45**

One Pair in a Box.



Adjustable, Cast Iron Frame, Nickel Plated, Steel Points.

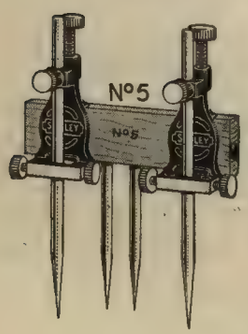
Per Set

No. 4—For Straight Edge up to 1¼ in. **$1.35**

Weight Per Pair ¼ Pound.

Can be attached to one side of any straight stick. The pencil socket will take an ordinary pencil or full size oval shape carpenter's pencil.

One Pair in a Box.



Machinists' Trammel Points.

Cast Iron Frame, Japanned, with Long and Short Points, One Each of which is Adjustable by Means of a Set Screw.

Per Set

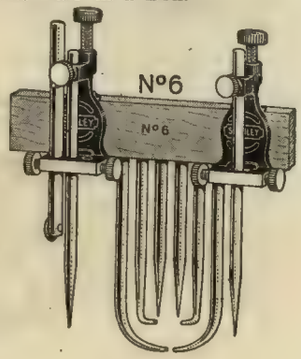
No. 5—For Straight Edge up to 1½ in., with 4 Points, Weight Per Set 1 Lb..... **$2.80**

No. 6—For Straight Edge up to 1½ in., with 8 Points and Roller Marker, Weight Per Set 2 Lbs..... **4.10**

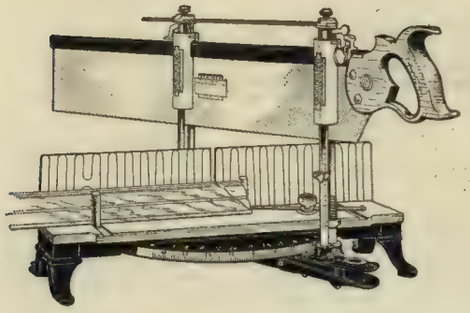
The No. 6 has 4 special curved points for use as Outside or Inside Calipers.

One in a Box.

The above Trammel Points are used by millwrights, carpenters, machinists and all mechanics having occasion to strike arcs or circles larger than can be conveniently done with ordinary Compass Dividers.



Mitre Boxes.



STANLEY'S

Solid Cast Iron Frame, Detachable Malleable Iron Legs, Finished in Japan and Nickel, Interchangeable Parts, Complete with Saw.

Nos.	244	246	358	460
Size of Saw, Inches	24x4	26x4	28x5	30x6
Capacity, Right Angle, Inches	8¼	8¼	9½	11
Capacity Mitre (45°), Inches	5½	5½	6½	7½
Cap'y at 30° without Stock Guide, In.	3½	3½	4⅛	5⅛
Weight Each, with Saw, Lbs	28½	30	36	51
Each, Complete with Saw	$17.25	17 80	20.00	24.50

One in a Box.

These Boxes are compact, strong and durable, and are quickly put together or taken apart for convenience in carrying. The frame is one solid casting, giving great strength.

The saw guide uprights are securely clamped in tapered sockets in the swivel arm and can be adjusted to hold the saw without play, and also to counteract a saw that runs out of true, due to improper setting or filing.

The second socket in the swivel arm permits the use of a short saw or allows a much longer stroke with a standard or regular saw.

The swivel arm is provided with a tapered index pin which engages in holes placed on the under side of the base. These holes are made at the commonly used angles as designated on top of the base allowing 3, 4, 5, 6, 8, 12, and 24 sided pieces to be cut. The edge of the base is graduated in degrees and the swivel arm can be set and automatically fastened at any degree desired.

The uprights, front and back, are graduated in sixteenths of inches, and movable stops can be set, by means of thumb screws, to the depth of the cut desired.

Stock guides hold all kinds of ordinary work, as well as irregular forms, and can be used as length gauges for duplicating short pieces.

Automatic catches on the uprights hold the saw up, which allows the use of both hands in placing the work. The adjustable stop on top of the saw, coming in contact with the lever trip, releases the front catch, and the saw in falling pitches slightly forward automatically releasing the rear catch, without any necessity of taking the hand from the saw or touching the lever trip. Two cone-pointed leveling screws on the rear feet prevent the Box sliding when in use. These Boxes are regularly packed with back saws made expressly for us.

STANLEY'S VICTOR

Solid Cast Iron Frame, Malleable Iron Legs, Flat Faced Saw Guides, Japanned.

Each

No. 50½—Adjustable, without Saw, Takes 20 in. Back or Panel Saw, Height 5 in., Capacity at Right Angle 7¼ in., Capacity Mitre (45°) 4¾ in., Weight Each 20 Lbs. $8.35

This Box is strong and accurate, though not having all the refinements of the Stanley Box. Has Back, Frame, Indexed Quadrant and Swivel Arm Bearing in one piece, accurately machined. The Quadrant is indexed for cutting 4, 5, 6, 8, 12 and 24 sided pieces.

The swivel arm can be locked at any point desired between zero and 45°.

The saw guide uprights are securely clamped in the sockets in the swivel and can be adjusted to hold the saw without side play, thus insuring great accuracy in working.

Movable stops are attached to the saw upright permitting the saw to cut only to the desired depth.

To use a panel saw in the No. 50½ (see cut) put a nail through the two small holes near the top of the rear saw guide to keep the saw in place.

Weight Each, with Saw, Boxed, Lbs.	35	36	37	38
Each	$17.60	18.40	20.20	21.00

The Saw Guides are extra long to give stability when the saw is raised to its highest point. A simple and effective device automatically catches the saw guides and holds them suspended when they are raised to their highest point and releases them instantly when desired. Has notches in the Bed Plate to determine the positive angles most in use. By the use of a thumb lever at the front of the box the saw supports may be swung freely and locked at either a positive or an intermediate angle.

Has Guides to support the work against the back or to be used when angles more acute than 45° are desired. These Guides may be slid out of the way through little gateways in the back when not wanted. Has Extension Lever with a quick acting adjustment and a Length Gauge for duplicate lengths. The Steel Bottom Boards are roughened to prevent the work from slipping. Has Graduated Arc upon the bed and an Index Plate to tell at what degrees to set the saw for certain desired cuts. Equipped with Depth Gauge and Take Up in case of wear upon the saw.

The arrangement of the work clamps make it possible to handle a wide range of work. The device for controlling the depth of saw cut and supporting saw is in one piece. Cast lugs on side of Saw Guide Posts hold Saw Guides in position so that Saw Slots are always in line to receive the saw. The Notched Segment and Locking Device for adjusting the saw to different angles consists of four parts, Notched Segment, Steel Engaging Head, Coiled Spring and Finger Latch. Each notch in Segment is one degree of a circle with common angles specially marked. The Work Clamps can be adjusted to any shape or position without interfering with angles of jaw.

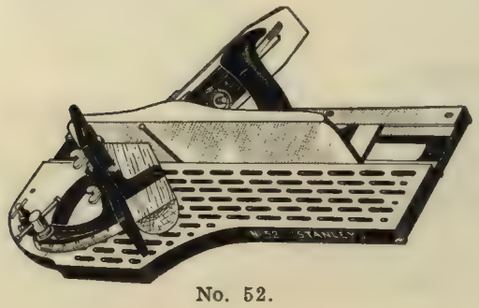
Chute Board and Plane.

STANLEY'S



No. 52.

Special Iron, Ribbed Construction, Adjustable Runway, Accurately Machined, Rosewood Handle Plane, Rosewood Knob. Each

No. 52—22 in. Long, 15 in. Long Plane, 2⅜ in. Cutter, Weight Each 17½ Lbs. $16.50

The Stanley Chute Board and Plane is a very important tool especially for Pattern Makers, Cabinet Makers, Printers and Electrotypers. The Board is made of Iron, of ribbed construction, and has an Adjustable Runway for the Plane. The Plane is especially constructed to suit this Board, the Cutter being set on a skew, making a smooth keen cut. The Cutter being fitted with a Lateral Adjustment, a cut giving any ordinary Draft to a pattern can be made The Swivel is indexed, for cutting a Square and a Mitre (45 degrees) but by means of the Clamping Screw, can be set at any desired angle from 0 to 90 degrees. The Sliding Back will support the work close to the Plane, preventing it from splintering. The Sliding Back Clamp will hold nearly any shape of work in position to be planed. One in a Box.

RAFTER, Blued Finish, All Figures in White.

Per Dozen

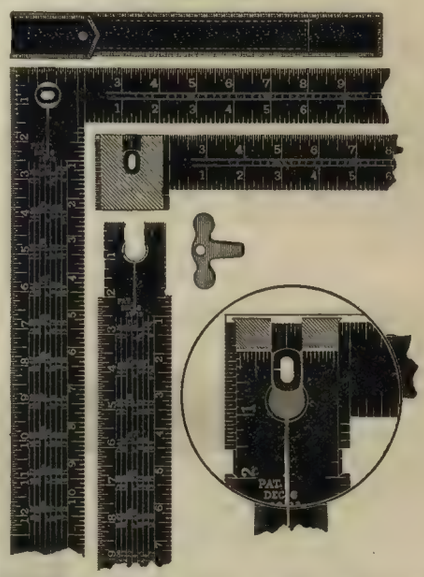
No. TD0100—24x2 in. Body, 16x1½ in. Tongue, Graduated ⅛ and ⅛ in. on Face, 32, 12 and 10 in. on Back, with 100 Scale, Marked Board Measure, Brace Measure, 8 Square and Framing Table..... **$47.80**

Weight Per Dozen About 30 Pounds.

The Eagle Take Down Square has the latest improvement and is of the strongest possible construction. The Tongue is made of one solid piece, the body is also milled from the solid. The proportion of the two parts are such as to give the strongest possible joint. The cam is the only one ever offered that will firmly hold the Tongue into the Body. It being eccentric it pinches the two parts together. It is the only square hole locking device ever offered. The convenience and durability of this square hole, into which if the key should be lost, any square tool or file shank will successfully operate.

Oen-twelfth Dozen in a Canvas Rust Proof Case.

NICHOLL'S



STANDARD, Oxidized Copper Finish, White Figures.

Per Dozen

No. TD500S—24x2 in. Body, 16x1½ in. Tongue, Graduated in ⅛ and ⅛ in. on Face, 32, 12 and 10 in. on Back, with 100 Scale, Marked with Board Measure, Octagon and Brace Measure..... **$38.50**

RAFTER, Oxidized Copper Finish, White Figures.

Per Dozen

No. TD500R—24x2 in. Body, 16x1½ in. Tongue, Graduated in ⅛ and ⅛ in. on Face, 32, 12 and 10 in. on Back, with 100 Scale, Marked Octagon and Brace Measure, and Regular Roof Framing Rule..... **$40.00**

Weight Per Dozen About 30 Pounds.

These Squares are so constructed as to assure accuracy and at the same time take up the wear which comes in taking Squares apart and putting together. They are constructed with bearings accurately machined, so as to bring the Square absolutely true when the cam is turned so as to expand the end of the body in milled portion of tongue. The Squares are hand fit.

Has an oblong hole in cam allowing screw driver or nail to be used in releasing lock in case key is lost.

One-twelfth Dozen in a Canvas Rust Proof Case.

This Tool is an Adjustable Triangle combined with a degree circle. It is a combination of Five Tools in One but simpler than the common square and more accurate. Roof, Stairway and Polygon work is as simple as ABC when you use this tool. It gives rise, run, length of timbers, as well as bevel at both ends, and degrees. Carpenters, Manual Training Schools, Engineers and Contractors will buy it when they see it. Enough time saved in one day to more than pay for the tool.

No. 5S—Iron, Nickel Plated, 4½ in. Long, 1⅜ in. Diameter, Weight Each ⅞ Lb. 1.70

These Plumb Bobs are constructed with a reel at the upper end upon which the line may be kept. By dropping the bob with a slight jerk, while the ring is held in the hand, any desired length of line may be reeled off. A spring, which has its bearing on the reel, will check and hold the bob firmly at any point on the line. The pressure of the spring may be increased or decreased by means of the screw which passes through the reel.

STANLEY'S DUPLEX ADJUSTABLE

No. 25.

No. 30.

Mahogany, Square Top Plate, Brass Tips, Brass Lips, Improved Duplex Side Views. Per Dozen
No. 25—Assorted 24 to 30 in., Weight Per Dozen About 44 Lbs. **$36.10**
One-half Dozen in a Box.

Hardwood, Square Top Plate, Brass Tips, Improved, Improved Duplex Side Views. Per Dozen
No. 30—Assorted 24 to 30 in., Weight Per Dozen About 48 Lbs. **$27.20**
One-half Dozen in a Box.

Hardwood, Triple Stock, Square Top Plate, Brass Tips, Brass Lips, Improved Duplex Side Views. Per Dozen
No. 50—Assorted 24 to 30 in., Weight Per Dozen About 48 Lbs. **$32.75**
One-half Dozen in a Box.

Stanley's Duplex Levels can be read conveniently, even if held at arm's length above the head. They have three glasses: A level glass set in the top in the usual way, a plumb glass and a second level glass set in the side. These latter two glasses are set close to one surface of the stock so that the angle of vision of the bubble is greatly increased. The second level glass can be readily reversed to form a second plumb, if desired.

Plumbs and Levels.

One-twelfth Dozen in a Box.

The vials in all the O. K. Levels are provided with a new adjustment. They can easily be placed in any position and securely fastened by the two small screws which connect with a steel nut that is fastened to the stock beneath the vial ring and a slight pressure with a small screw driver releases or fastens the vial ring. It is metal to metal and is entirely reliable.

These Levels are very handy for leveling up clocks, cameras, etc.

One-half Dozen in a Box.

Line Levels.

STEVENS'

No. 200.

Aluminum Tube, Spring German Silver End Pieces and Hooks in One Piece, Proved Glasses.

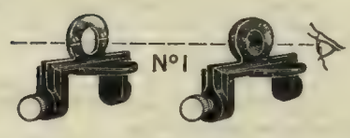
Per Dozen

No. 200—3 in. Long, Weight Per Dozen About ½ Lb. **$8.90**

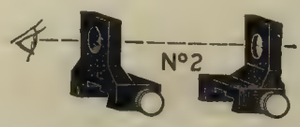
The End Pieces are attached to Tube by German Silver Rivets that pass through the Tube and through the Lugs at top and bottom between the hooks and center of Level thus preventing the hooks from pulling out of alignment in case of severe strain or rough usage.

One Dozen in a Box.

Level Sights.



No. 1—Attached to Level.



Adjustable, Cast Iron, Japanned.

Per Dozen Pairs

No. 1—Width of Clamp 1⅜ in., for Wood Level, Weight Per Dozen Pairs About 3 Lbs. **$12.25**

Adjustable, Cast Iron, Japanned.

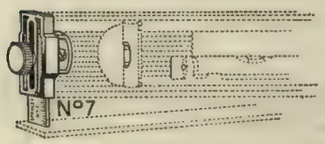
Per Dozen Pairs

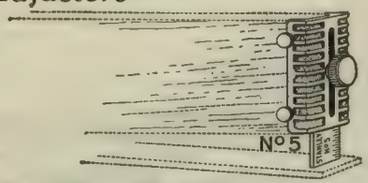
No. 2—Width of Clamp ¾ in., for Iron Levels, Weight Per Dozen Pairs About 3 Lbs. **$12.25**

By the use of these ingenious devices, which can be attached to any Level, the owner has a convenient and accurate means for leveling, from one given point to another at a long distance away. When not in use the Level Sights are easily detached, and can be packed away in a small space for future use.

One-twelfth Dozen Pairs in a Box.

Pitch Adjusters





Cast Iron, Nickel Plated, Adjustable Slide.

Per Dozen

No. 7—Length 2¼ in., **for Iron Levels**, Weight Per Dozen About 7½ Lbs. **$17.20**

No. 5—Length 3 in, **for Wood Level**, Weight Per Dozen About 4½ Lbs. **17.20**

These can be readily attached to any Iron or Wood Level and securely fastened in place by means of a thumb-screw.

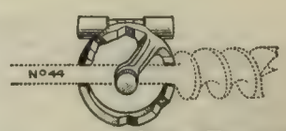
One edge of slide is graduated and a reading to determine pitch is taken from bottom of slide to bottom of frame.

The graduation on the scale is for $\frac{1}{16}$ in. pitch per foot. To obtain this pitch with an 18 in. Level, the scale should be set to $\frac{3}{32}$ in.; on the 24 in., to $\frac{1}{8}$ in.; on the 30 in., to $\frac{5}{32}$ in., and so on. The maximum pitch is 1½ in. per foot.

On any irregular length, a straight edge and rule may be used to lay out and adjust the slide for the pitch wanted.

One-twelfth Dozen in a Box.

Bit and Square Levels.



Brass Frame and Set Screw.

Per Dozen

No. 44—Width 1½ in., Weight Per Dozen About 2 Lbs. **$5.60**

This Tool has three pairs of V slots on its back edges. The shank of a Bit will lie in these slots, either vertical or at an angle of 45 degrees, and boring can be done with perfect accuracy. It can also be attached to a Carpenter's square, making it an accurate Plumb or Level.

One-twelfth Dozen in a Box.

Level Glasses.

STANLEY'S PROVED

Length, Inches	1	1¼	1½	1¾	2	2½	3	3½	4	Assorted 1¾, 3, 3½
Per Dozen	$0.90	.90	1.00	1.12	1.16	1.25	1.35	1.45	1.56	1.35

Made of extra thick tubing. By a patented process, each Level Glass is marked at its highest, or crowning point, by two indelible lines; and each Plumb Glass with a single line. The owner can thus easily set the glass accurately in its proper position.

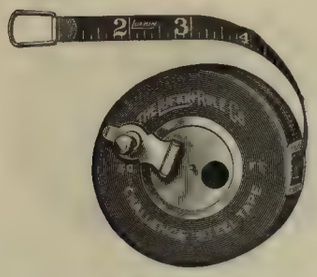
CHALLENGE, STEEL



MARKING OF LUFKIN STEEL TAPES

All Lufkin Steel Tapes are marked with **Instantaneous** Readings. The above illustration gives a fair idea of this marked improvement. Briefly described, it consists of repeating the foot mark, in easy distinguishable figures, at each inch or tenth-foot, as the case may be. Does away with always referring back to the last foot and its consequent difficulties and delays. The total reading is always direct before the eye.

CHALLENGE JR., STEEL

Hard Leather Case, Metal Lined, Nickel Plated Trimmings, Folding Flush Handles, Opened by Pressing Pin on Opposite Side, ⅜ in. Steel Tape, **Instantaneous Reading.**

Marked in Feet, Inches and 8ths of Inches, One Side Only.

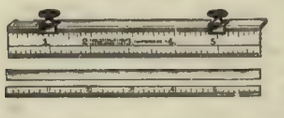
Each	$10.00	16.65

Six in a Box.

PATENT KEY-SEAT STEEL RULES



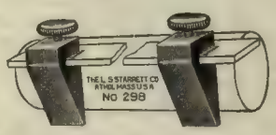
Spring Tempered Scale, Graduated in 8ths, 16ths, 32ds and 64ths, Beveled Edge.

	Each
No. 105—Length 6 in., Weight 3 Oz.	$3.80

The improved feature in this rule consists of a device for holding two straight edges in the form of a box square (or Key Seat Rule) seeurely together.

One in a Box.

KEY SEAT CLAMPS



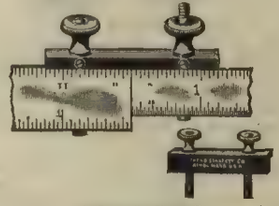
Case Hardened Steel, Ground Accurate.

	Per Pair
No. 298—Weight Per Pair 2 Oz.	$0.95

Designed to transform any common steel scale into a Key Seat Rule. Can be put on or off almost instantly.

One Pair in a Box.

RULE CLAMPS



Blued Steel.

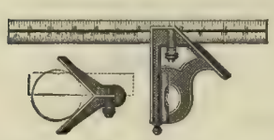
	Each
No. 299—2½ in. Long	$0.85

Weight Each 2 Ounce.

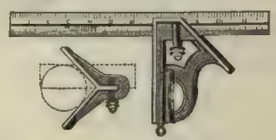
This little tool is used to clamp two steel rules together, end to end, making one long rule. The rules may be of the same or different widths up to 1¼ in. This clamp will be of special value to mechanics, whose tool chests will usually not hold rules longer than 12 in.

Six in a Box.

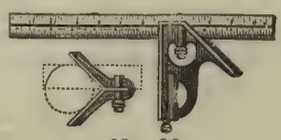
PATENT COMBINATION SQUARES



No. 11.



No. 23.



No. 33.

Japanned Iron Stock. and Center Head, Hardened Blade, Graduated with Heavy Figures Reading Both Ways, No. 4 Graduations.

No. 11—With Center Head.

Length, Inches	6	9	12	18	24
Weight Each, Lbs.	½	¾	1	1¼	1⅝
Each	$2.35	2.75	3.12	4.30	5.10

No. 11W—Without Center Head.

Length, Inches	4	6	9	12	18	24
Weight Each, Lbs.	¼	½	¾	1	1¼	1⅝
Each	$1.18	1.56	1.95	2.35	3.52	4.30

The 4 in. is without center head or level.

The 6, 9, 12, 18 and 24 in. have levels (in their stocks) and center heads.

Every tool warranted accurate. With the adjustable scale this forms one of the most convenient and useful tools ever devised for mechanics' use. It is a complete substitute for a whole set of common try squares, and is one of the best gauges made for transferring exact measurements or laying out work.

One in a Box.

Japanned Iron Stock and Center Head, Good Hard Steel Blade, Not Hardened, No. 4 Graduation Only, Similar in Design to No. 11.

No. 23—With Center Head.

Length, Inches	9	12
Weight Each, Lbs.	1⅛	1⅝
Each	$2.35	2.70

No. 23W—Without Center Head.

Length, Inches	9	12
Weight Each, Lbs.	1⅛	1⅛
Each	$1.68	2.00

One in a Box.

Japanned Iron Stock, Drop Forged Steel, Hardened Head, Hardened Blade, Graduated Blade with Heavy Figures Reading Both Ways, No. 4 Graduations.

No. 33—With Center Head.

Length, Inches	12
Weight Each, Lbs.	1⅛
Each	$4.68

No. 33W—Without Center Head.

Length, Inches	12
Weight Each, Lbs.	⅞
Each	$3.90

One in a Box.

Starrett's Tools.

No. 9—Hardened Blade, Showing Combination Square (No. 11) with Center Head and 7 in. Bevel Protractor Head (No. 12) all on the No. 11 Square Scale.

Length, Inches.	9	12	18	24
Wt. Set, Lbs..	1½	2	2	2
Per Set	$5.86	6.24	7.42	8.20

Each head may be instantly removed, or replaced and used interchangeably with the scale.

One Set in a Box.

IMPROVED BEVEL PROTRACTORS

No. 12—Hardened Steel Blades, (Same as Used on No. 11 Squares), No. 4 Graduations, Black Enameled Iron Blade.

Length of Blade, Inches.....	12
Length of Head, Inches.....	7
Weight Each, Lbs.....	1
Each	$4.70
	Each

Protractor Head—With Level Attachment, Weight 12 Oz..$3.15

An adjustable rule, held firmly at any point by a thumb nut, passes through a revolving turret which is nicely graduated in degrees from 0 to 90, both right and left, and can be accurately adjusted to show any angle.

One in a Box.

PATENT PROTRACTOR

No. 16—Hardened Steel Blade, Black Enameled Head, Turret Graduated Both Sides, the Other to Show Pitch to the Foot.

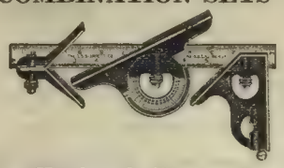
Length of Blade, Inches.....	12	18	24
Weight Each, Lbs.....	1½	1⅝	1¾
Complete, Each	$7.92	9.20	10.00
			Each

Stock Only—Weight Each ¾ Lb.....$5.85

Without the blade the stock may be used in contracted places as a 6 inch level and plumb, while with an 18 or 24 inch blade, a level and plumb of corresponding length is obtained.

One in a Box.

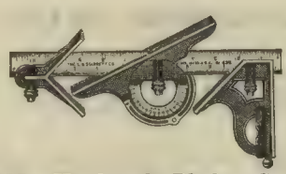
COMBINATION SETS



No. 434—Hardened Blade, Consisting of No. 33 Combination Square with Hardened and Drop Forged Stock and Center Head and No. 490 Protractor Head, No. 4 Graduation.

Length, Inches.	9	12	18	24
Wt. Set, Lbs.	1⅝	2	2¼	2¼
Per Set	$8.20	8.60	9.75	10.55

One Set in a Box.



No. 435—Hardened Blade, Consisting of No. 11 Combination Square with Hardened Blade, and No. 491 Reversible Protractor Head, No. 4 Graduations.

Length, Inches.	9	12	18	24
Wt. Set, Lbs..	1¾	2	2⅛	2¼
Per Set	$6.62	7.02	8.20	9.00

One Set in a Box.

BEVEL PROTRACTORS

No. 490—Hardened Steel Blade, Reversible Head, Graduated Turrets to Read Both Ways, No. 4 Graduations with Heavy Figures on Blade to Read Both Ways, Head 7 in. Long.

Length, Inches.	9	12	18	24
Wt. Each, Lbs.	1	1⅜	1⅜	1½
Per Set	$5.46	5.84	7.02	7.80
				Each

Protractor Head—With Level Attachment, Weight 30 Oz...$3.90

One in a Box.

BEVEL PROTRACTORS

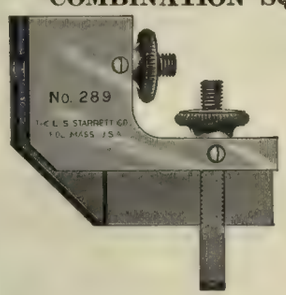
No. 491—Hardened Steel Blades, Reversible Head, Checked Finish, Graduated Turret to Read Both Ways, No. 4 Graduation with Heavy Figures on Blades to Read Both Ways.

Length, Inches.	9	12	18	24
Wt. Each, Lbs.	1	1⅜	1⅜	1½
Per Set	$5.46	5.84	7.02	7.80
				Each

Protractor Head—With Level Attachment, Weight 30 Oz...$3.90

One in a Box.

COMBINATION SQUARE ATTACHMENT



No. 289—Combination Square Attachment, Weight Each 2 Oz.....$1.42

This attachment is made to fit the 12, 18 and 24 in. Blades of Nos. 11, 23 and 33 Squares and can be used in connection with any Regular Starrett Rules as wide as one inch or with No. 21 Flat Steel Square for laying out key seats, etc.

One in a Box.

TOOL SETS

For Students and Apprentices.

No. 900.

In Folding Leather Cases.

Per Set

No. 900—Size of Case Folded 7x4¾x1⅜ in., Complete with Tools.$10.00

Contain the following Tools:

- **No. 11**—6 in. Combination Square, Complete.
- **No. 117B**—Center Punch.
- **No. 321**—6 in. Flexible Steel Rule in Pocket Case.
- **No. 390**—Center Gauge.
- **No. 241**—4 in. Caliper.
- **No. 79**—4 in. Outside Caliper with Solid Nut.
- **No. 73**—4 in. Inside Caliper with Solid Nut.
- **No. 83**—4 in. Divider, with Solid Nut.

Weight Per Set About 1½ Lbs.

One Set in a Case.

In Nicely Finished Wooden Case.

Per Set

No. 901—Size of Case 12x 7x1½ in., Complete with Tools $10.25

Contain the following Tools:

- **No. 11**—6 in. Combination Square, Complete.
- **No. 321**—6 in. Flexible Steel Rule in Pocket Case.
- **No. 117B**—Center Punch.
- **No. 390**—Center Gauge.
- **No. 77**—5 in. Divider, with Solid Nut.
- **No. 79**—6 in. Outside Caliper, with Solid Nut.
- **No. 73**—6 in. Inside Caliper, with Solid Nut.

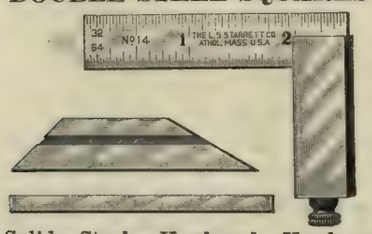
Weight Per Set About 2¾ Lbs.

One Set in a Box.

No. 901.

Starrett's Tools.

DOUBLE STEEL SQUARES



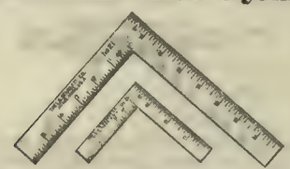
Solid Steel, Hardened Head and Blade, with 2½ in. Sliding Scale, Graduated in 32nds and 64ths on One Side Only. Each

No. 14A—Square Only, Weight 1½ Oz. $3.35

No. 14B—With Bevel or Narrow Blade, Weight 2 Oz. 3.85

No. 14C—Complete with Bevel and Narrow Blade, Weight Each 3 Oz. 4.35

THIN STEEL TRY SQUARES



No. 21—For Machinists and Draughtsmen.

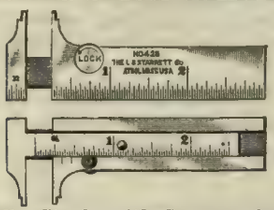
1-20 in. Thick, Graduated in 16ths and 64ths on One Side, 32nds and 64ths on the Other.

Size, Inches	2x1	3x2
Wt. Each, Ozs.	½	1
Each	$1.70	2.35

⅛ in. Thick, Graduated in 16ths and 32ds on Both Sides.

Size, Inches	4x3	6x4
Weight Each, Lbs.	1½	2
Each	$3.40	5.00

POCKET SLIDE CALIPERS



No. 425—Steel, with Improved Clamping Device, Graduated in 32nds and 64ths.

Size, Inches	3	5
Width, Inches	11/16	1
Thickness, Inches	7/32	⅛
Wt. Each, Ozs.	1	3
Each	$3.35	5.00

CALIPER SQUARES

For Both Inside and Outside Measure, Graduated Beam, 64ths on One Side, 100ths on the Other.

With Adjusting Screw.

Nos.	25A	25B	25C
Size, Inches	3	4	6
Weight Each, Oz.	2	2½	3
Each	$5.85	6.70	9.20

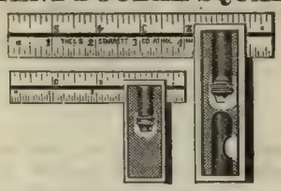
Without Adjusting Screw.

Nos.	25D	25E	25F
Each	$5.00	5.85	8.35

Each

Extra with Hardened Jaws..... $2.50

PATENT DOUBLE SQUARES

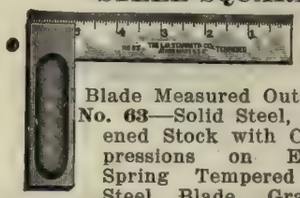


No. 13—Japanned Cast Iron Stock, Hardened Graduated Blade, No. 4 Graduations with Level in Stock.

Size, Inches	4	6	9
Wt. Each, Lbs.	5	10	15
Each	$2.75	4.15	5.00

The seat against which the blade is clamped being convex, should corners of the blade get injured, the accuracy of the square is not affected.

STEEL SQUARES



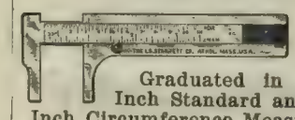
Blade Measured Outside Beam.

No. 63—Solid Steel, Case Hardened Stock with Concave Depressions on Each Side, Spring Tempered Hardened Steel Blade, Graduated in 32nds on One Side, 64ths on the Other.

Size, Inches	2	3	4
Stock, Inches	1½	2	2¾
Wt. Each, Ozs.	1	2½	4½
Each	$2.50	3.25	4.20

Size, Inches	6	9	12
Stock, Inches	3¾	5½	6½
Wt. Each, Ozs.	8	16	28
Each	$5.85	9.20	10.85

SLIDE RULE CALIPER AND CIRCUMFERENCE GAUGE

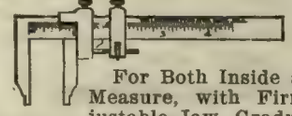


Graduated in 32nds of an Inch Standard and 16ths of an Inch Circumference Measure. Each

No. 424—Opens 3½ in., Will Caliper a Cylinder Up to 2½ in. Diameter, Jaws are 1⅛ in. Deep, Weight Each About 3 Oz. $5.85

This gauge has a double function—being graduated to read the circumference as well as the diameter of the thing measured, the relation of circumference to diameter being shown by the graduations on upper corners of the rule. (Capacity 3½ in. about 11 in. Circumference.)

CALIPER SQUARES



For Both Inside and Outside Measure, with Firm and Adjustable Jaw, Graduated Beam, 64ths on One Side, 100ths on the Other.

With Adjusting Screw.

Nos.	426A	426B
Size, Inches	3	4
Weight Each, Ozs.	2	2½
Each	$6.25	7.50

Without Adjusting Screw.

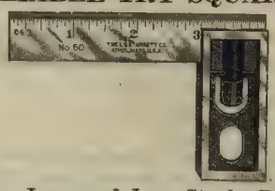
Nos.	426D	426E
Each	$5.00	5.85

Each

Extra with Hardened Jaws..... $2.50

All Above, One in a Box.

RELIABLE TRY SQUARES

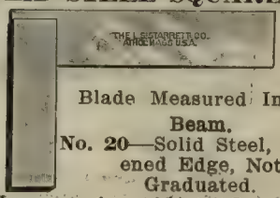


No. 60—Japanned Iron Stock, Polished Steel Blade, Graduated, Not Hardened.

Lgth. Blade, In.	4	5	6
Lgth. Beam, In.	2 1/16	3	3 5/8
Wt. Each, Ozs.	3	5	7
Each	$1.70	1.95	2.10

Lgth. Blade, In.	9	12
Lgth. Beam, In.	5 1/16	6
Wt. Each, Ozs.	11	16
Each	$3.40	4.60

SOLID STEEL SQUARES



Blade Measured Inside Beam.

No. 20—Solid Steel, Hardened Edge, Not Graduated.

Blade, In.	1	1½	2	3
Stock, In.	1	1½	1⅞	2⅜
Wt. Each, Oz.	½	1	1½	4
Each	$2.35	2.92	3.40	4.20

Stock, In.	3½	4 5/16	5 9/16	7
Wt. Ea., Lbs.	⅝	¾	2	2¾
Each	$5.85	7.50	10.85	15.00

Blade, In.	15	18	24
Stock, In.	8⅝	10½	12 1/16
Wt. Ea., Lbs.	5¾	8	11½
Each	$25.00	30.00	41.70

MICROMETER CALIPER SQUARES

For Outside and Inside Measure, Hardened Jaws 1⅝ in., Graduated Beam, 64ths on One Side, 40ths on the Other.

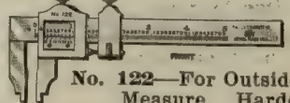
No. 28—With Case.

Size, In.	4	6	9	12
Wt., Lbs.	¼	⅜	¾	⅞
Each	$14.60	18.35	25.40	32.50

No. 28W—Without Case.

Size, In.	4	6	9	12
Each	$13.35	16.70	23.35	30.00

VERNIER CALIPERS

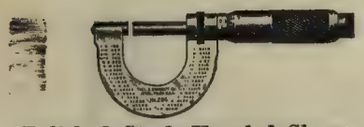


No. 122—For Outside and Inside Measure, Hardened Jaws, Beam Graduated on the Front to Read by Means of the Vernier in 1000ths of an Inch, Graduated 64ths on the Back.

Size, Inches	4	6	9
Lgth. Jaws, In.	1 3/16	1 3/16	2⅜
Width Jaws, In.	250	250	300
Wt. Each, Ozs.	5	6	12
Each	$24.55	28.35	34.00

Size, Inches	12	24
Lgth. Jaws, In.	2⅜	2⅜
Width Jaws, In.	300	300
Wt. Each, Ozs.	14	32
Each	$37.50	46.90

Starrett's Tools



Polished Steel, Knurled Sleeve, with Ratchet Stop and Lock Nut.

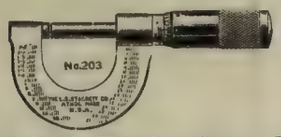
For Measurements by Thousandths Up to 1 Inch.

	Each
No. 204—Without Case	**$16.70**
No. 0204—With Leather Case	**17.55**

Weight in Case About 12 Oz.

One in a Box.

ONE INCH MICROMETERS



Polished Steel, Knurled Sleeve, WITHOUT Lock Nut or Ratchet Stop.

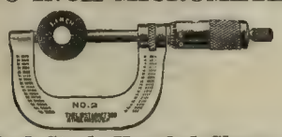
For Measurements by Thousandths Up to 1 Inch.

	Each
No. 203—Without Case	**$8.35**
No. 0203—With Leather Case	**9.20**

Weight in Case About 12 Ounces.

One in a Box.

TWO INCH MICROMETERS



Polished Steel, Knurled Sleeve, with Lock Nut, Ratchet Stop and 1 in. Test Gauge.

For Measurements by Thousandths from 1 to 2 Inch.

	Each
No. 2—Without Case	**$10.85**
No. 02—With Leather Case	**12.10**

For Measurements by 10 Thousandths from 1 to 2 Inch.

	Each
No. 213—Without Case	**$12.50**
No. 0213—With Leather Case	**13.75**

Weight in Case About 15 Ounces.

One in a Box.

No. 212 Attachment can be used with the above 2 in. Micrometers.

Polished Steel, Knurled Sleeve Shortened Anvil with Ratchet Stop and Lock Nut.

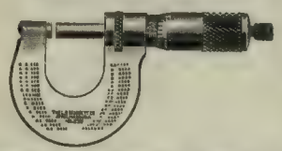
For Measurements by Thousandths Up to 1 Inch.

	Each
No. 230—Without Case	**$10.00**
No. 0230—With Leather Case	**10.85**

Weight in Case About 12 Oz.

One in a Box.

HEAVY ONE INCH MICROMETERS



HEAVY, Polished Steel, Hardened Wearing Parts, Knurled Sleeve with Ratchet Stop and Lock Nut.

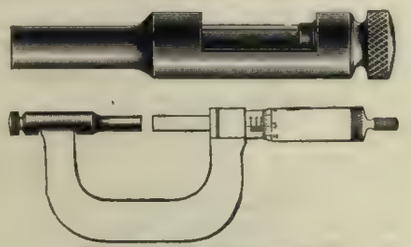
For Measurements by Thousandths Up to 1 Inch.

	Each
No. 238—In Wooden Box, Weight Each 12 Oz.	**$11.70**

These Micrometers are heavier than the regular one inch Micrometers. They are especially useful on grinding work and wherever it is necessary to take measurements after the lock nut is set.

One in a Box.

MICROMETER ATTACHMENTS



For 2 Inch Micrometer

	Each
No. 212—Micrometer Attachment Weight Each 1 Oz.	**$3.35**

This attachment, by means of which a 2 inch micrometer may be instantly converted into a 1 inch tool, will be furnished, when ordered, with any of our 2 in. or 50 millimeter micrometers.

One in a Box.

Polished Steel, Knurled Sleeve, with Ratchet Stop and Lock Nut.

For Measurements by Thousandths Up to 1 Inch.

	Each
No. 3—Without Case	**$10.00**
No. 03—With Leather Case	**10.85**

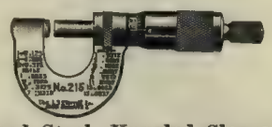
For Measurements by 10 Thousandths Up to 1 Inch.

	Each
No. 113—Without Case	**$11.70**
No. 0113—With Leather Case	**12.55**

Weight Each with Case 12 Ounces.

One in a Box.

ONE-HALF INCH MICROMETERS



Polished Steel, Knurled Sleeve, with Ratchet Stop and Lock Nut.

For Measurements by Thousandths Up to ½ Inch.

	Each
No. 215—Without Case	**$8.35**
No. 0215—With Leather Case	**9.20**

Weight with Case About 8 Ounces.

One in a Box.

SCREW THREAD MICROMETERS

Polished Steel, Knurled Sleeve, Pointed Spindle, Weight 7 Oz., Capacity 1 in.

	Each
No. 575A—8 to 13 Thread, V. & U. S. or Whit. Std.	**$12.50**
No. 575B—14 to 20 Thread, V. & U. S. or Whit. Std.	**12.50**
No. 575C—22 to 30 Thread, V. & U. S.	**12.50**
No. 575D—32 to 40 Thread, V. & U. S.	**12.50**

In the above Screw Thread Micrometers the movable spindle is pointed, and the end of the anvil is of the same form as the thread to be measured. In measuring screw threads the angle of point and sides of the V come in contact with the cut surface of the thread, so that the reading of the caliper indicates the pitch diameter or the full size of thread less the depth of one thread.

One in a Box.

INSIDE MICROMETERS

Polished Steel, All Contact Surfaces Hardened, with Case.

Set No. 124A.

	Per Set
No. 124A— 6 Rods, One ½ in. Gauge, Measures from 2 to 8 in., Weight 4 Ozs.	**$ 8.75**
No. 124B—10 Rods, One ½ in. Gauge, Measures from 2 to 12 in., Weight 7 Ozs.	**10.85**
No. 124C— 4 Rods, One 1 in. and Two 2 in. Gauges, Measures from 8 to 32 in., Weight 1½ Lbs.	**13.35**
No. 124D—Comprises Sets Nos. 124A and 124C, Measures from 2 to 32 in., Weight 2¼ Lbs.	**20.85**

Designed for internal and lineal measurements, such as measuring cylinders, rings; also for setting calipers, comparing gauges, etc. It is also useful in measuring parallel surfaces.

These Extension Rods are provided with a Collar against which the Rods are conveniently and accurately set in the Micrometer Head. With the Rods are sent Standard Gauges or Rings to slip on the Rods under the Collars to further extend the Rod.

One Set in a Leatherette Case.

Starrett's Tools.

NEW MICROMETERS

No. 226—Frames are Drop Forged from Bar Steel, Nicely Finished, Graduated by Thousandths.

	Each
1 Inch, with Decimal Equivalents Stamped on Frame, without Ratchet Stop, Weight 7 Oz.	$ 9.20
1 Inch, with Decimal Equivalents Stamped on Frame, with Ratchet Stop, Weight 7 Oz.	10.00
2 Inch, From 1 to 2 in., without Ratchet Stop, Weight 14 Oz.	7.50
2 Inch, From 1 to 2 in., with Ratchet Stop, Weight 14 Oz.	8.35
1 in. Standard for Adjusting.	1.70
3 Inch, From 2 to 3 in., without Ratchet Stop, Weight 16 Oz.	10.00
3 Inch, From 2 to 3 in., with Ratchet Stop. Weight 16 Oz.	10.85
2 in. Standard for Adjusting.	1.70
4 Inch, From 3 to 4 in., without Ratchet Stop, Weight Each 23 Oz.	$10.85
4 Inch, From 3 to 4 in., with Ratchet Stop, Weight Each 23 Oz.	11.65
3 in. Standard for Adjusting.	1.95
5 Inch, From 4 to 5 in., without Ratchet Stop, Weight 26 Oz.	12.10
5 Inch, From 4 to 5 in., with Ratchet Stop, Weight 26 Oz.	12.95
4 in. Standard for Adjusting.	2.25
6 Inch, From 5 to 6 in., without Ratchet Stop, Weight 36 Oz.	13.35
6 Inch, From 5 to 6 in., with Ratchet Stop, Weight 36 Oz.	14.20
5 in. Standard for Adjusting.	2.50

Prices in Sets.

	Per Set
Set of 3 Micrometers, Including 1, 2 and 3 in., without Ratchet Stop	$25.85
Set of 3 Micrometers, Including 1, 2 and 3 in., with Ratchet Stop	28.35
Set of 6 Micrometers, Including All Sizes from 1 in. to 6 in., without Ratchet Stop	60.00
Set of 6 Micrometers, Including All Sizes from 1 in. to 6 in., with Ratchet Stop	65.00

These Micrometers meet the demand for accurate gauges at a low price. They are better adapted for general use than the vernier or bar micrometer, as they can be set quickly for the different measurements and are more easily read.

Standards for use in adjusting these micrometers will be furnished when desired.

No. 2263—Case for Set of 3.

MICROMETER CASES

For No. 226 Micrometers.

Morocco Leather Covered, Velvet Lined, Well Made and Nicely Finished.

	Each
No. 2261—For Inch Micrometer Only, Weight Each 16 Oz.	$0.85
No. 2263—For Set of 3 Micrometers, Weight Each 19 Oz.	3.35
No. 2266—For Set of 6 Micrometers, Weight Each 43 Oz.	6.70

Open Stock.

No. 2266—Case for Set of 6.

ADJUSTABLE CALIPER GAUGES

No. 125—All Steel, Nicely Finished, with Three Rods.

The Diameter of the Steel Rods is .150 in.

Inches	2½	6
Capacity, Inches	2½ to 6¾	6 to 16
Wt. Each, Ozs.	1½	3
Per Set	$1.70	2.10

Designed for internal measurements of large cylinders and of distances between uprights. The body of the tool is a steel tube provided with a binding chuck on each of its ends. Into one end is clamped a plain rod, that, when the chuck is loosened, can be quickly adjusted to any approximate size. Into the other end is screwed a threaded anvil for fine adjustment.

One Set in a Box.

UNIVERSAL BEVEL PROTRACTORS

Graduated Disc from 0 to 90° Each Way, Sheet Steel Blade and Stock, Length of Stock 4 in.

Length of Blade, Inches	7	12
Without Case, Nos.	360A	360C
Weight Each, Ozs.	6	7
Each	$10.50	11.25
With Leatherette Case, Nos.	360B	360D
Weight Each, Ozs.	10	14
Each	$11.70	13.35

	Each
No. 360G—Attachment Extra, Weight 2½ Ozs.	$1.70

The attachment shown in the smaller engraving will be found very convenient for grinding worm thread tools, tapers on lathe centers, and all long tapers.

One in a Box.

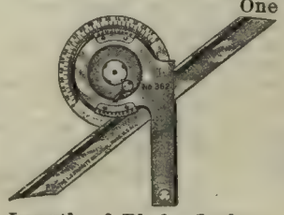
MICROMETER CALIPER GAUGES

No. 126—All Steel, Hardened Anvils, Marked and Graduated, with Five Rods.

Inches	2½
Capacity, Inches	2½ to 10
Weight Each, Ozs.	2½
Per Set	$3.35

Designed for close internal measurements, indicating thousandths where a definite distance in inches is not essential. The body of the tool is a steel tube, provided at one end with a binding chuck in which are fastened the plain rods, and it can quickly be adjusted to any approximate size.

One Set in a Box.



UNIVERSAL BEVEL PROTRACTOR WITH VERNIER

Graduated Disc from 0 to 90° Each Way, Sheet Steel Blade and Stock, **with Vernier Reading 5 minutes or 1-12 of a Degree.** Length of Stock 4 in.

Length of Blade, Inches	7	12
Without Case, Nos.	362A	362C
Weight Each, Ozs.	6	7
Each	$13.35	15.00
With Case, Nos.	362B	362D
Weight Each, Ozs.	10	14
Each	$15.00	17.50

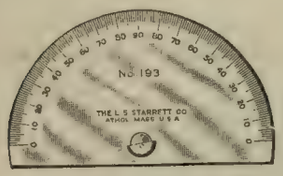
	Each
No. 362G—Attachment Extra, Weight Each 2½ Ozs.	$1.70

The verniers are so placed with relation to the graduated half circle as to make the protractor readable by vernier in any position. The blade, clamped by an eccentric stud against the edge of the disc, may be slipped back and forth its full length, or turned at any angle around the circle and firmly clamped at any point.

One in a Box.

Starrett's Tools.

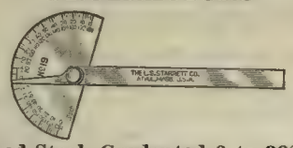
PROTRACTORS



Polished Steel, Graduated 0 to 90° Both Ways. Each

No. 198 — 3⅞ in. Diameter, Weight Each 2 Oz. **$1.70**

Used for setting Bevels Nos. 15, 47 and 49 at any desired angle thus converting them into Bevel Protractors at a slight cost.



Polished Steel, Graduated 0 to 90° Both Ways. Each

No. 19—3⅞ in. Diameter, 6 in. Blade, Weight Each 2 Oz. . **$2.50**

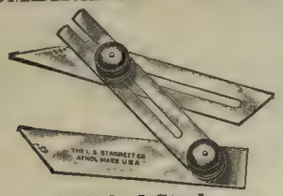
This Protractor is accurate, and is convenient for setting bevels, for transferring angles, as a small T square, or for a large number of other uses which will readily occur to a machinist or draughtsman, and will be found reliable, and very satisfactory by any mechanic.

Polished Steel, Rectangular Head, Graduated 0 to 90° Both Ways. Each

No. 183—3⅞x2 in., Head, 6 in. Blade, Weight Each 4 Oz. . **$3.35**

Similar to No. 19 but with rectangular head, giving four working focus, also 2 rows of figures reading both ways to show the complementary degree. The blade by means of one patent lock joint is set firmly by a slight turn of the nut.

COMBINATION BEVELS

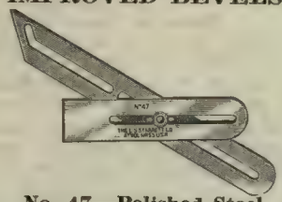


Polished Steel. Each

No. 49—4 in. Stock, 4 in. Split Blade, 5 in. Slotted Blade, Weight 4 Oz. **$3.35**

This Bevel has a stud riveted in the straight edge stock or head, on which its split blade is hinged, so as to swing over the stock, and be clamped at any angle. The slotted auxiliary blade with clamp bolt may be slipped on to the split blade and be clamped at any desired angle and used, in combination with the stock of the other, for laying out work, measuring, or showing any angle desired, and, when so combined, will lie flat upon its work.

IMPROVED BEVELS

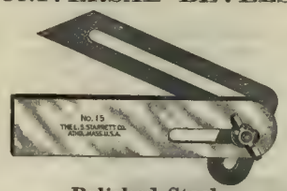


No. 47—Polished Steel.

Inches	6	9	12
Width Stock, In. . .	3½	4¾	6
Wt. Each, Oz.	3	7	12
Each	**$2.10**	**2.50**	**2.90**

The advantages of this Bevel over any other tool of this kind made, consists in its having not only the blade slotted but the stock as well, through and through, thus admitting adjustments that cannot be obtained with a common bevel.

UNIVERSAL BEVELS



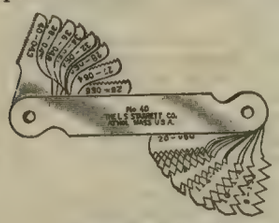
Polished Steel. Each

No. 15—3 in. Stock, 3 in. Blade, Weight Each 1½ Oz. **$2.50**

Improved features. The set-off in the blade increases its capacity and usefulness for bevel gear work, etc., so that any angle, however slight, may be obtained.

Another valuable feature is, one edge of the case being solid, a rest is formed directly under the table, where thin templets may be placed and accurately fitted.

SCREW PITCH GAUGES



Polished Steel. Each

No. 40—22 Pitches, V Thread, Length 2½ in., Weight Each 2 Oz. **$1.70**

This Gauge has 22 Pitches as follows: 9, 10, 11, 11½, 12, 13, 14, 15, 16, 18, 20, 22, 24, 26, 27, 28, 30, 32, 34, 36, 38, 40 and can be used inside a nut, as well as on the outside of a screw or bolt.

Polished Steel. Each

No. 4—24 Pitches, V Thread, Length 2½ in., Weight Each 1½ Oz. **$2.10**

This Gauge has 24 Pitches as follows: 4, 4½, 5, 5½, 6, 7, 8, 9, 10, 11, 11½, 12, 13, 14, 15, 16, 18, 20, 22, 24, 26, 27, 28, 30.

Polished Steel. Each

No. 6—30 Pitches, V Thread, Length 2½ in., Weight Each 2 Oz. **$2.50**

This gauge has 30 pitches as follows: 4, 4½, 5, 5½, 6, 7, 8, 9, 10, 11, 11½, 12, 13, 14, 15, 16, 18, 20, 22, 24, 26, 27, 28, 30, 32, 34, 36, 38, 40, 42.

The teeth are sharp and clean cut, it can be used inside of a nut as well as on outside of a screw or bolt. It is also a convenient and reliable tool to use as a 60-degree center gauge and gauge to test the grinding of either an inside or outside threading tool.

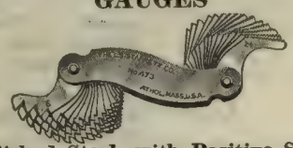
SCREW PITCH GAUGES

U. S. Standard, Polished Steel. Each

No. 155—25 Pitches, Length 2½ in., Weight 4 Oz. **$2.50**

This Gauge has 25 Pitches as follows: 2¼, 2⅜, 2½, 2⅝, 2¾, 2⅞, 3, 3¼, 3⅜, 4, 4½, 5, 5½, 6, 7, 8, 9, 10, 11, 12, 13, 14, 16, 18, 20, also a center Gauge with coarse and fine notch.

POSITIVE STOP THREAD GAUGES



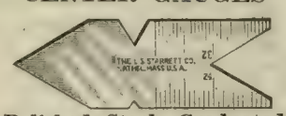
Polished Steel, with Positive Stop. Each

No. 473—30 Pitches, V Thread, Length 2½ in., Weight 2 Oz. **$2.50**

This Gauge has 30 pitches from 6 to 60 as follows: 6, 7, 8, 9, 10, 11, 11½, 12, 13, 14, 15, 16, 18, 20, 22 in. on one end of the case. 24, 26, 27, 30, 32, 34, 36, 38, 40, 42, 48, 50, 56, 60 in the other. Number of pitch stamped on the right side of blade.

All Above, One in a Box.

CENTER GAUGES



Polished Steel, Graduated. Each

No. 390—Not Tempered, Length 2¼ in., Width ¾ in., Weight 1 Oz. **$0.42**

No. 391—Tempered, Length 2¼ in., Width ¾ in., Weight 1 Oz. 60

Graduated one corner each in 32ds, 24ths, 20ths and 14ths, with 60 degree angles.

For use in grinding and setting screw cutting tools.

Starrett's Tools.

THICKNESS GAUGES

Polished Steel.

	Each
No. 172A—Case 3⅜ in. Long, ½ in. Wide, 9 Tempered Straight Leaves, 3 1/16 in. Long, ½ in. Wide, Wt. Each 2 Oz.	**$1.70**
No. 172B—Case 4¾ in. Long, ½ in. Wide, 8 Tempered Tapered Leaves, 4½ in. Long, ½ in. Wide, Weight Each 1½ Oz.	**2.50**
No. 172C—Case 6¼ in. Long, ½ in. Wide, 8 Tempered Tapered Leaves, 6 in. Long, ½ in. Wide, Weight Each 2 Oz.	**3.35**

Size A has 9 Straight Leaves, viz.: .0015, .002, .003, .004, .006, .008, .010, .012 and .015.

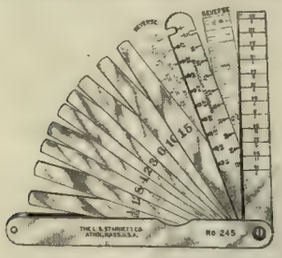
Sizes B and C have 8 Tapered Leaves, viz.: .002 to .015.

Polished Steel.

	Each
No. 72—Thickness Gauge or Feeler, Case 2¾ in. Long, 7/16 in. Wide, Leaves 2¼ in. Long. Weight Each 2 Ounces.	**$2.50**

This Gauge has 22 leaves, varying in thickness by thousandths, running from .004 to .025. The thickness of each leaf is designated by the number upon it. Each leaf may be used singly or in combination with others, and any thickness in thousandths within their limits may be quickly obtained.

ENGINEERS' TAPER, WIRE AND THICKNESS GAUGES



Polished Steel.

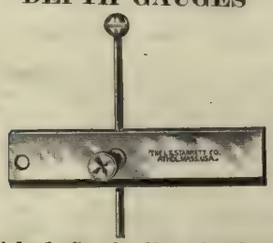
	Each
No. 245—Case 4¾ in. Long. Weight Each 4 Ounces.	**$6.70**

This gauge is especially designed for the use of marine engineers, machinists and others desiring a set of gauges in compact form.

The taper gauge shows the thickness in 64ths to 1/16ths of an inch on one side, and on the reverse side is graduated as a rule 3 inches of its length, reading in 8ths and 16ths of an inch.

The wire gauge, English Standard, shows on one side sizes numbered from 19 to 36, with two extra slots, one 1/16, the other ⅛ of an inch, and on the reverse side shows the decimal equivalents expressed in thousandths. This gauge has also 9 thickness or feeler gauge leaves, approximately 4 in. long, of the following thickness: .002, .003, .004, .006, .008, .010, .012, .015 and 1/16 of an inch all folded within the case.

DEPTH GAUGES



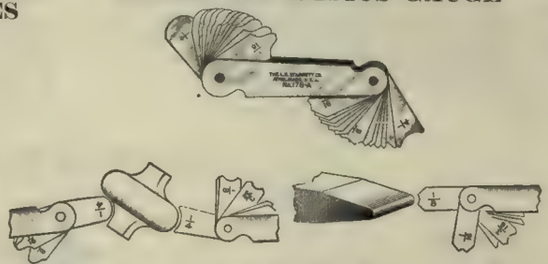
Polished Steel, Not Graduated.

	Each
No. 45A—3½x¾ in. Straight Edge, Wt. Each 2 Oz.	**$1.25**
No. 45B—6x¾ in. Straight Edge, Wt. Each 2 Oz.	**1.95**
No. 45C—10x¾ in. Straight Edge, Wt. Each 2 Oz.	**2.25**

The wire in this Gauge is held to a groove by a friction spring inside the nut while adjusting, and may be used close to the end, as well as in the middle of the straight edge.

By loosening the nut, the gauge may be neatly folded.

FILLET OR RADIUS GAUGE

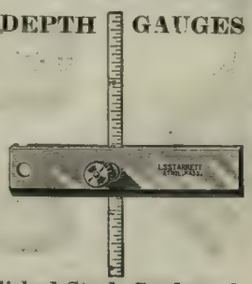


Polished Steel.

	Each
No. 178A—Case 2½ in. Long, 30 Leaves, Stamped to Indicate Radii by 64ths from 1/32 to ¼ in. (One-half Diametric Size), Diameters are from 1/16 to ½ in., Varying by 32ds, Weight Each 2½ Oz.	**$1.70**
No. 178B—Case 3½ in. Long, 32 Leaves, Stamped to Indicate Radii by 64ths from 1/64 to ½ in., Diameters are from 1/32 to 1 in., Varying by 32ds, Weight Each 3½ Oz.	**2.50**

This Gauge may also be described as a Concave and Convex Gauge and is especially adapted for use in laying out special forming tools, dies, etc., as well as measuring fillets. The illustrations show a few of the ways in which the Gauge can be used. We recommend it for the use of machinists and tool makers as well as pattern makers.

DEPTH GAUGES



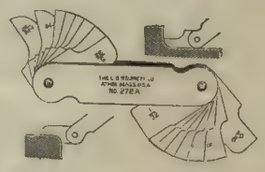
Polished Steel, Graduated.

	Each
No. 46A—3½x¾ in. Straight Edge, 4x 3/16 in. Scale, Weight Each 2 Oz.	**$2.10**
No. 46B—3½x¾ in. Straight Edge, 6x 3/16 in. Scale, Weight Each 2 Oz.	**2.50**
No. 46C—6x¾ in. Straight Edge, 4x 3/16 in. Scale, Weight Each 2 Oz.	**2.50**

The scale is graduated in either 32ds and 64ths, 50ths and 100ths, or 64ths and 100ths, indicating exact measurements, and may be used separately from the gauge.

All Above, One in a Box.

FILLET OR RADIUS GAUGE



Polished Steel.

	Each
No. 272A—Case 2 1/32 in. Long, 16 Blades, with Radii from 1/32 to 1/4 in. Inclusive, by 64ths, Weight Each 2 Oz.	**$1.70**
No. 272B—Case 4 3/32 in. Long, 16 Blades, with Radii from 3/32 to 3/4 in. Inclusive, by 64ths, Weight Each 5 Oz.	**2.50**

This gauge is similar in design to our No. 178 and affords means of obtaining the radii of fillets, corners, etc., as shown by the illustrations. Each blade is stamped with the radius in 64ths, the external being on one side and the internal on the other. It can be used in any position or at any angle, the formation allowing it to be used up to a shoulder, and for duplicating sample pieces. The studs holding blades in place are eccentric with the round end of case. This is of advantage as when the gage is opened the edge of case stands well away from the edge of blades.

DEPTH GAUGES

Case Hardened Steel Head, Nicely Finished, Spring Tempered Scale.

	Each
No. 237—2 in. Wide Across the Base, ⅛ in. Thick Head, 6x¾ in. Scale, Graduated in 32ds and 64ths, Weight Each 2½ Oz.	**$2.10**

The blade is conveniently held in the groove of the head by a knurled lock nut and can be used separately from the gauge. Can also supply blade graduated 50ths and 100ths or 64ths and 100ths.

Starrett's Tools.

PATENT MICROMETER DEPTH GAUGE

Polished Steed. Each

No. 446A—2¼ in. Base, 3/10 in. Thick Head, Weight Each 3 Oz. $7.50

This gauge is designed for measuring the depth of grooves, holes or irregular parts. It has ½ in. movement of the screw, reading in thousandths; and with two ½ in. and one 1 in. standard collars to slip off or on the spindle, 2½ in., reading in thousandths, can be obtained. The split nut is covered and protected by our patent graduated sleeve, which not only protects the nut from dirt, but provides a quick and accurate way of taking up wear and adjusting the micrometer to insure correct reading. The sleeve, being held by a stiff friction, may be rotated by a spanner wrench, accompanying each gauge, so that the zero lines will coincide for correct reading. The head and the point of measuring rod are hardened.

One in a Box.

VERNIER DEPTH GAUGE

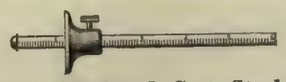
Polished Steel. Each

No. 448—Blade 6 in. Long, 5/32 in. Wide, Will Measure to 3½ in. Depth, Weight Each 4 Oz., in Leather Case $16.70

This gauge is invaluable where accurate measurements are necessary and appeals to that class of mechanics whose work require very close limits, such as gaging the depth of recesses, in jig work, etc. The blade is 6 in. long, 5/32 in. wide, and will measure to 3½ in. depth. The blade is graduated to read by means of a vernier to thousandths of an inch on one edge and to 64ths on the other.

One in a Box.

SCRATCH GAUGES



All Steel, Hardened Cast Steel Head, Graduated Beam, in 50ths or 64ths of an Inch.

No. 29—Graduated.		
Length, Inches.....	5	6
Beam, Inches.....	15/64	15/64
Weight Each, Oz...	2	4
Each	$1.70	2.10

No. 29X—Not Graduated.		
Length, Inches.....	5	6
Beam, Inches.....	15/64	15/64
Weight Each, Oz...	2	4
Each	$1.10	1.25

For scribing lines parallel to a given surface the scratch gauge is used if the distance is not too great and if the line is to be scribed on a surface nearly at right angles with a given surface.

One in a Box.

TOOL MAKERS' STEEL CLAMPS

No. 160—Drop Forgings, Case Hardened, Nicely Finished.		
Inches	1	2
Weight Per Pair, Oz.....	7	15
Per Pair	$2.25	2.95

These Clamps have take-up blocks to slip on and off end of screw, and are held to same in a novel manner. They will hold work square and parallel for laying out on surface plates, fitting or drilling. A round piece may be rigidly held in two of the clamps and drilled on an upright, central and parallel. Put up and sold in pairs. With the small block in use, the capacity of the smaller clamp is a little over one inch, and that of the larger clamp two inches.

One Pair in a Box.

TOOL MAKERS' PARALLEL CLAMPS

Made of Steel, Case Hardened.

Nos.	161AA	161A	161B	161C	161D
Opening of Jaw, Inches..	¾	1¼	1¾	2¼	2¾
Length of Jaw, Inches....	1⅝	2	2½	3	4
Weight Per Pair, Lbs....	⅛	⅜	⅝	1	2
Per Pair	$1.70	2.10	2.50	2.95	3.35

These Clamps are very useful for holding small work together in tapping, drilling, etc.

One Pair in a Box.

LITTLE GIANT JACK SCREWS

Steel, All Parts Case Hardened. Per Set

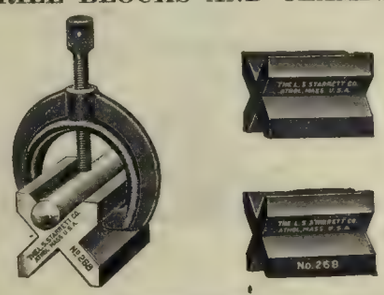
No. 190—Complete as Shown, Weight Each 1⅛ Lbs..... $2.35

The Jack (A) is 1¼ in. diameter at the base and has a range from 2½ to 3⅝ in. It will raise 1,000 pounds or more. Two extension bases (B and C) are made to fit the base of the main part (A) and are 2 and 1 in. high respectively. With these two extensions used singly or together a reach from 2½ to 6½ in. may be obtained.

An auxiliary pointed screw (D) is supplied to be used in place of the screw with swivel cap in certain places where it may be preferable. The base (E) is also provided, for use in cases where such a shape may be desirable.

These are designed for tool room use, for leveling up work on a planer bed or under an upright drill, setting up machinery, etc.

DRILL BLOCKS AND CLAMPS



Polished Steel. Per Pair

No. 268A—Two 2x1½ in. Drill Blocks, Weight Per Pair 1⅜ Lb. $1.70

Each

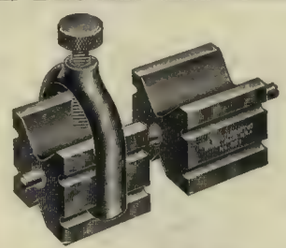
No. 268B—Clamp, Weight Each About ⅜ Lb..... $0.85

Per Set

No. 268C—Set Complete, One Pair Drill Blocks and One Clamp, Weight Each 1¾ Lbs. $2.50

This Clamp will hold a round piece up to 1⅛ in. diameter in the groove of the Blocks for prick punching, drilling or laying out a series of holes before and while being drilled.

DRILL BLOCKS AND CLAMPS



Steel, Case Hardened. Per Pair

No. 271A—Two 1¼ in. Square Drill Blocks, Weight Per Pair 15 Oz..... $3.35

Each

No. 271B—Clamp, Weight Each 2 Oz. $1.25

Per Set

No. 271C—Set Complete, One Pair Drill Blocks and One Clamp, Weight Per Set 1⅛ Lbs. $4.60

These blocks are designed to be used singly or in pairs in connection with drill presses and for laying out work, prick punching, etc. The blocks may be used close together or separated and are kept in line by a spindle passing thru friction bushings. They will be found convenient when holding pieces with shoulders, which may rest between the blocks. The blocks will hold round pieces to 1¼ in. diameter. The two grooves in each side take up the length and hold the clamp for small or large work.

Starrett's Tools

UNIVERSAL DIAL TEST INDICATOR

Polished Steel, with 3 Hardened Contact Points. Each

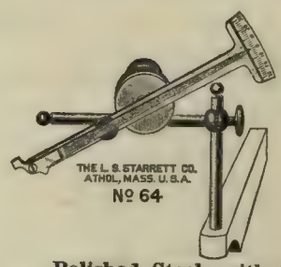
No. 196A—Complete with All Attachments, Weight Each 1 Lb. 3 Oz. **$18.00**

Simple, reliable, easily read and very sensitive. Slightest pressure upon contact point produces a movement of the hand on the dial. Circumference of dial divided into 100 equal spaces, each representing a movement of the contact point of one-thousandth of an inch. One revolution of the hand therefore indicates 1-10 inch, the capacity of the instrument being two-tenths. By bringing the contact point against the work with just enough pressure to give the hand one full turn, then setting it at 0, an opportunity is given for one full revolution of the hand to both right and left of 0, showing a rise or drop in the work and the amount of variation. A most valuable feature is the adjustable dial. By turning the knurled rim the dial may be instantly moved to bring the 0 mark to any point desired in relation to the hand. Each indicator is fitted with three hardened contact points for different classes of work. The special tool post and sleeve are useful in lathe work. For general work the indicator with sleeve B is adapted for use with our 9 inch or 12 inch surface gauges.

The clamp G permits attaching the indicator to large lathe and planer tools, milling arbors, etc.

The attachment F more than doubles the value of the indicator, adapting it for use inside of holes, to reach over blockings on face plates, etc.

UNIVERSAL TEST INDICATOR

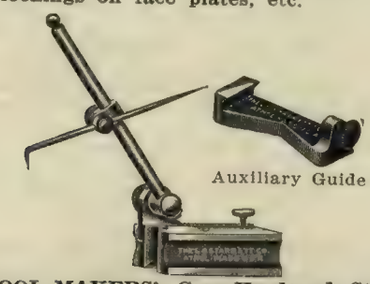


Polished Steel, with Three Working Points. Each

No. 64—Indicator, Complete with Tool Post Holder and Arm, Weight Each ¾ Lb. **$5.85**

This indicator may be used to test inside, outside or surface work. It can be instantly attached to the spindle or the needle of any surface gauge, and used to show the slightest variation in thousandths. It may be clamped to a flat or round support, up to ⅜ in. flat or round. A special holder, as shown in cut, is designed to go in the tool-post of a lathe, adapting it for use to show the accuracy of all sorts of lathe work, turning. chucking, or locating and centering work on face plate. The head of the needle has three working points, equally distant from its fulcrum, so the telltale needle will vibrate, reading in thousandths, when work is in contact with either point—in front, above or below it. When in front, the spring operating the telltale needle needs to be reversed to throw point of needle up instead of down as when used above or below the work. This may be instantly done by a slight turn of the disc to which the vibrating spring is attached. The working parts of the head are hardened. In setting the indicator, bring the contact point against the work so that the needle will point to 0, when any variation either way will show.

SURFACE GAUGES



TOOL MAKERS', Case Hardened, Steel Base. Each

No. 56A—With 4 in. Spindle and Auxiliary Guide, Height 5 in. Weight Each 13 Oz. **$5.00**

No. 56B—Same as No. 56A, but **without Auxiliary Guide,** Weight 9 Oz. **4.20**

This gauge is admirably adapted for light work. The base is steel, nicely finished and **casehardened,** with depressions milled in the sides for the thumb and finger to grasp. The top of it is slotted, and the rocking bracket is pivoted in the same. There is a stiff spring under one end of the bracket and a knurled adjusting screw in the other; the spindle jointed to this may be set and rigidly held in any position from vertical to horizontal, and the scriber placed in position to be used below its base for depth gauge, or (with bent end down) a scribing gauge. A V-shaped groove in the end and bottom adapts it for use on cylindrical work. There is a small hole in the clamp next to the base in which the scriber may be used for light work, the spindle being removed. An auxiliary guide piece is furnished to clamp to the base.

NEW UNIVERSAL, Steel Base, with TWO GAUGE PINS in the Rear End. Each

No. 57A—3 in. Base, 9 in. Spindle, Weight Each 2⅛ Lbs. . **$4.20**

No. 57B—3 in. Base, 9 and 12 in. Spindle, Weight Each 2 Lbs. **4.75**

No. 57C—3¾ in. Base, 12 in. Spindle, Weight Each 3½ Lbs. **5.00**

No. 57D—3¾ in. Base, 12 and 18 in. Spindle, Weight Each 4 Lbs. **5.85**

NEW UNIVERSAL, Case Hardened Steel Base, with FOUR LARGE PINS in Base. Each

No. 257A—3 in. Base, 9 in. Spindle, Weight Each 2 Lbs. . . . **$5.00**

No. 257B—3 in. Base, 9 in. and 12 in. Spindle, Weight Each 2¼ Lbs. **5.60**

No. 257C—3½ in. Base, 12 in. Spindle, Weight Each 3½ Lbs. **5.85**

No. 257D—3½ in. Base, 12 and 18 in. Spindle, Weight Each 4 Lbs. **6.70**

These Gauges have the latest improvements which make them all that can be desired, the following being points of special merit:

They have a heavy base, grooved thru the bottom and end, adapting them for use on or against circular work as well as flat surfaces. The spindle passes thru a rotating head, jointed to a rocking bracket, pivoted in base, the bracket being adjusted by a knurled screw in one end against a stiff spring in the other. The spindle may be set upright or at any angle, or turned so as to work under the base, and can be sensitively adjusted to any position. The snug and head carrying the scriber are so made that when the clamp nut is loosened all may be freely moved to any position, and by friction springs retained in place until a slight turn of the clamp nut holds them firmly.

In the base are Gauge pins, frictionally held, which may be pushed to bear against the edge of a surface plate, or in the slot of a planer bed for linear work.

For small work the spindle may be removed and the scriber inserted in a hole provided for it, where it can be sensitively adjusted and used to advantage on bench work.

All Above, One in a Box.

Starrett's Tools.

CENTER TESTERS

Polished Steel. Each

No. 65—Weight Each 9 Oz. **$4.20**

This instrument was designed to use in adjusting and locating centrally any point or hole in a piece of work operated upon in a lathe chuck or on a faceplate; also to test the truth of lathe centers or a shaft between the centers, the instrument being held in the tool post.

The tester is of improved design and nicely made. The indicator needle passes thru the ball, having a split stem, forming a chuck for holding the needle adjusted to any desired length. The ball is pivoted to form a universal joint, but may be instantly converted into a single joint for tilting motion by only tightening the knurled nut, adapting it for both inside and outside surface contact. A steel bead, not shown in the cut, and carried on the needle, slips over the point of same when used for inside work. The instrument is joined to a tool-post shank by a flexible steel ribbon with sufficient spring to properly hold the needle in contact with the work. It is a tool needed in every up-to-date tool room.

One in a Box.

IMPROVED ADJUSTABLE SLEEVE SCRIBER

No. 68—Polished Steel Points, Knurled Sleeve, Nickel Plated, WITHOUT KNIFE POINTS.

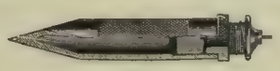
Length, Inches	8	12
Weight Each, Oz.	2	2
Each	$0.85	.85

Each

Extra Knife Points **$0.25**
Extra Scriber Points 25

The knurled sleeve has hole clear through and a clamping device at each end, adapting it for slipping on or off different tools, securely holding them near to or away from the working point. Tool makers will find the small size more desirable for general use, and the larger one for heavier work. For pattern makers a knife scriber, made of a fine grade of steel, is supplied as an auxiliary. One in a Box.

MERCURY PLUMB BOBS



No. 87—Solid Steel, Bored and Filled with Mercury, Hardened and Ground Points, Knurled Body, Nickel Plated, Complete with Braided Silk Line.

Length, In.	4	5	5½	6
Diam., In.	½	⅝	⅞	1
Wt. Each, Oz. .	4	7	15	20
Each	$1.70	2.50	3.35	4.20

STEEL PLUMB BOBS

No. 177—Solid Steel, Hardened and Ground Points, Knurled Body, Nickel Plated, Complete with Braided Silk Line.

Length, In. . . .	4	5	5½	6
Diam., In.	½	⅝	⅞	1
Wt. Each, Oz. .	2¾	5	10	16
Each	$1.25	1.70	2.50	3.35

The above Plumb Bobs have a patented device for fastening the string without a knot to tie or untie. The string is drawn into a peculiarly slotted neck at the top, after unwinding the required length, when the Bob will hang perfectly true.

Noteworthy features are the weight in proportion to size, low center of gravity and small diameter.

One in a Box.

IMPROVED SCRIBER

Polished Steel Points, Knurled Sleeve, Nickel Plated.

Each

No. 67—Improved, Length with Short Bent Point 9 in., with Long Bent Point 12 in., Interchangeable Parts, Weight 2 Oz., Complete **$0.85**

Scriber—Without Long Point. . . .60

Extra Points, Straight Points or Short Bent Points, Weight 1½ Oz. 17

Extra Long Bent Point 25

This Scriber is made for mechanics who want a better thing than has been heretofore obtainable. These points are made of a fine grade of steel, nicely tempered. The knurled stock is sufficient size to be easily held, without cramping or turning in the fingers. The long, bent point will be found a valuable auxiliary for reaching through holes, etc.

One in a Box.

POCKET SCRIBER

Steel Tubing, Knurled Body, Nickel Plated.

Each

No. 70A—¼ in. Diameter Handle, 3½ in. Long, 2⅜ in. Long Blade, Weight Each 1 Oz. **$0.42**

No. 70B—⅜ in. Diameter Handle, 3¾ in. Long, 2⅞ in. Long Blade, Weight Each 1½ Oz. 60

The Scriber is made from the best quality of steel, nicely tempered, and is held by a knurled chuck. The scriber is reversible, telescoping into the stock, and is held by a slight turn of the chuck so that it is always as safe to carry in the pocket as a penknife.

Mechanics find this a convenient tool to have always with them.

One in a Box.

PIN VISES

Steel, Hardened Jaws, Nickel Plated.

Nos.	162A	162B	162C	162D
Capacity, In..	.0 to .040	.030 to .062	.050 to .125	.115 to .187
Wt. Each, Oz.	½	¾	1	1¼
Each	$0.95	.95	.95	1.25

Per Set

Set Complete, One Each Nos. 162A, 162B, 162C and 162D, Weight Per Set About 3½ Oz. **$4.00**

These vises have hardened jaws with chucks so made that they wil hold firmly anything inserted in them. The hole extends thru full length of the handle. The handle is reduced in size, so that it may be more rapidly rotated between thumb and finger when filing small work. They are convenient handles for holding scribers, small files, etc.

MEASURING BAR CLAMPS

Steel, Nickel Plated.

Per Pair

No. 69—Inside Measurement 1 in. Square, Weight Per Pair 1 Oz. **$1.25**

These Clamps are to be used on two wooden bars about 1 in. by ½ in. of any desired length. The clamps and bars thus combined will be found very convenient by Carpenters as Adjustable Measuring Rods, as well as for extension beams for No. 59 Trammels.

No. 37—Inside, Polished Steel.

Length, Inches	4	5	6	8	10	12
Weight Each, Oz.	2	2½	4	6	9	12
Each	$1.88	2.10	2.25	2.64	3.00	3.38

These instruments not only have all the excellent features of Nos. 38 and 39, but in addition to common use may be used inside of chambered cavities over flanges, etc. removed and replaced without losing the size calipered.

Three in a Box.

No. 37—Inside.

IMPROVED BRONZE DIVIDERS

Auxiliary Caliper Legs, Patent Locking Nut, Bronze Metal Head and Socket Legs, Finely Finished and Nickel Plated.

Each

No. 90A—With Short Points Only, Weight ⅝ Lb. **$3.38**
No. 90B—Set Complete, Weight Each 1¼ Lbs. **6.00**

A common pencil fits either socketed leg, while an auxiliary holder fits reversed end of either short point for an extension. The head, with short point, is 8 inches long; may be extended 2 inches more; will caliper 10 inches outside and 12½ inches inside. With short points it will scribe a 24 inch and with long points a 34 inch circle.

One Set in a Box.

IMPROVED EXTENSION DIVIDERS

Auxiliary Caliper Legs, Patent Locking Nut Between Arms, Hardened Points, Malleable Iron Head and Arms, Other Parts of Steel.

Length, Inches	7	9
With Divider Legs, Nos.	85A	85B
Weight Each, Oz.	10	14
Each	$1.88	2.25
Complete, Nos.	85C	85D
Weight Each, Oz.	17	21
Each	$3.38	3.75

The patent locking nut between the arms, against which a spiral spring acts, is a valuable feature. After the fine adjustment is made, the nut may be turned back, locking spring and arms firmly, thus remedying the weak points which renders the common wing divider only as stiff as the adjusting spring.

One in a Box.

BALL POINTS

For Use with Nos. 85 and 90 Dividers and Nos. 51 and 159 Trammels.

Each

No. 88—Complete, 4 Balls and Holder, Weight Each ½ Lb. **$1.88**
Extra Ball or Holder ..... **.38**

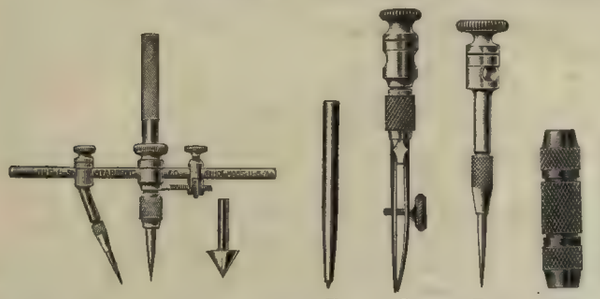
When it is necessary to use a hole as center for dividers or trammels it is, of course, impossible to use an ordinary divider point. In such cases the Ball Point placed in the hole and bearing against the edges forms a seat for the divider leg in scribing circles or arcs around the hole. For very accurate work, however, the Ball Point is not recommended for it is impossible to keep the center exactly.

This set consists of four balls, 1⅛ inch, 1 inch, ¾ inch, and ½ inch diameter, respectively.

In ordering this set for use with trammels, please give tool number of the trammel so that the proper holder may be sent.

One Set in a Box.

UNIVERSAL DIVIDERS Starrett's Tools.



Polished Steel, Knurled Handle and Nuts, Reversible Scriber Holder.

	Each
No. 89—Tool with 4 in. Beam and V Center Point, Weight 4 Oz.	**$2.64**
No. 89C—Complete with All Attachments, Weight About 8 Oz.	**6.00**

The adjustable scriber holder is reversible and carries either a fine tempered steel point or a pencil lead, held in a split socket by a knurled nut. With the holder turned outward it is possible to work close to shoulders, something that cannot be done by a similar tool of any other make; turned inward, points may be brought close together to scribe the smallest circle. With 4 in. beam 7½ in. and under may be scribed. An auxiliary beam 13 in. long is furnished, with which a 25 in. circle may be drawn.

	Each
No. A—Extra Steel Points	**$0.15**
No. B—Needle Points	**.23**
No. C—Pen Attachment	**1.50**
No. D—Extra Straight Point and Socket	**.75**
No. E—Extra 13 in. Beam to Scribe 25 in. Circle	**.38**
No. F—Coupling	**.53**

PATENT DIVIDERS

Crucible Forged Steel Points, Tempered, Patent Locks and Nut, Adjustable Point.

No. 92—Plain.

Length, Inches	6	7	8	9
Weight Each, Oz.	5½	6	7	7½
Each	**$1.28**	**1.35**	**1.50**	**1.73**

No. 92N—Nickeled.

Length, Inches	6	7	8	9
Weight Each, Oz.	5½	6	7	7½
Each	**$1.65**	**1.73**	**1.88**	**2.10**

This cut shows an improved divider with patented features, which make it the best thing in its line yet produced. Both points are crucible forged steel, nicely tempered. The quadrant passes thru the leg and the clamp screw frictionally locks it firm. The screw threads have stock enough to last a lifetime. After fine adjustments are made, the patent lock nut between the arm locks the spring in the leg firm, curing the defect in the old style dividers of the points dodging out and in with the grain of the wood. The adjustable point may be instantly removed and a common pencil inserted in its place.

Two in a Box.

NEW TRAMMELS

No. 59F—Set Complete.
Polished Steel.

	Each
No. 59A—Trammel Head with One Pair Points, Weight 9 Oz.	**$3.35**
No. 59F—Set Complete as Shown, Weight 1¾ Lbs.	**7.90**

One Set in a Box.

Extras.

	Per Set
No. 59B—Balls and Holder	**$2.10**
	Per Pair
No. 59C—Small Caliper Legs	**$0.84**
No. 59D—Large Caliper Lgs.	**1.25**
No. 59E—Large Divider Points	**.84**

This cut shows the trammel fastened to a wooden beam, which may be any size from ¾ inch to 1⅝ inches wide, and of any thickness desired (requiring no fitting), giving stiffness according to the length and adapting it for small or large work.

The auxiliaries designed to go with the trammel heads are so shown above, viz., inside and outside caliper legs, an extra pair of long points, a set of four ball points with holder, which enable one to scribe a circle from the center of any hole up to 1½ inches and under. A lead pencil may be used in place of either of the steel points. The clamping device is adapted to take in either a small or common sized pencil

IMPROVED TRAMMEL POINTS

Bronze Metal Body, Hardened Forged Steel Points, Nickel Plated.

	Each
No. 50A—With 3 in. Points, Adjustable, Weight Set 5 Oz.	**$4.20**
No. 50B—With 3 in. Points, Not Adjustable, Weight 5 Oz.	**2.50**
	Per Set
No. 50C—Extra Long Points	**$0.60**

Either point can be removed, and the pencil socket accompanying each pair put in its place.

Adjustable like spring dividers. Light and durable. One Set in a Box.

TAP WRENCHES

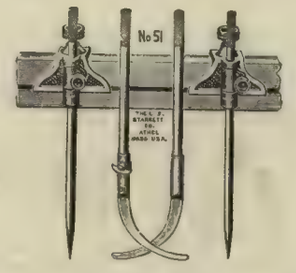
Polished Steel, Knurled End, Hardened Jaw.

	Each
No. 91A—5¾ in. Long, Holding ⅛ to ¼ in., Weight Each 3 Oz.	**$1.25**
No. 91B—9 in. Long, Holding ⅛ to ½ in., Weight Each 8 Oz.	**2.50**

This wrench is of new design—strong, neat and efficient. It will hold firmly a tap with square or round shank. Inside the knurled adjusting screws a spring connected with the plunger holds it back and causes instant movement with the screw.

One in a Box.

EXTENSION BEAM TRAMMELS



Bronze Metal Body, Steel Points, Nickel Plated.

	Each
No. 51A—Complete with Caliper Legs, Weight Each 1¼ Lbs.	**$5.45**
No. 51B—Without Caliper Legs, Weight Each ⅞ Lb.	**4.20**

The above cut represents a pair of Trammel Heads, with an opening thru the under side to accommodate the extension, giving width and stiffness in proportion to the length required for large work, while it is equally well adapted to receive a narrow beam for light work.

The points are eccentric, and may be loosened and rotated in their sockets to make fine adjustments. Either point may be removed and a common pencil inserted.

One of the caliper legs is provided with a joint, worked by an eccentric thumb piece for fine adjustments.

One in a Box.

TAP WRENCHES

Polished Steel, Knurled Tip, Hardened Jaw.

	Each
No. 174—3 in. Long, Weight Each 2 Oz.	**$0.85**

This little tool is made of steel, nicely finished, and will hold any tool that can be put into it—taps, reamers, drills, etc. It holds tools of any shape, round, square or oval.

One in a Box.

Starrett's Tools.

AUTOMATIC ADJUSTABLE PUNCHES

Hardened Steel Working Parts, Knurled Adjustable Screw Cap.

Nos.	18AA	18A	18B
Diameter, Inches	3/8	1/2	5/8
Length, Inches	3 3/4	5	6
Weight Each, Oz.	1 1/2	3	5
Each	$2.50	3.35	4.20

These Punches are provided with a knurled adjustable screw cap, which, working in connection with a spring, regulates the stroke. For work requiring a heavy mark, turn cap down; for work requiring a light mark, turn it up. To use it, no hammer is needed. The punch being placed in an upright position over the working line, a downward pressure releases the striking block and makes the impression without danger of slipping, as is liable when a hammer is used. When adjusted for either light or heavy stroke, all indentations are of a uniform size for the starting of the drill, etc., and accurate and quicker work can be done. The adjustable cap fits the hand, with no stroke adjusting screw through and above it to bother. The point can be removed for regrinding and easily replaced. One in a Box.

SPACING PUNCHES

Solid Tool Steel, Tempered, Knurled Center.

Each

No. 118—Length 4 in., Weight Each 1 Oz. $1.25

Starrett's Combination Prick Punch and Spacing Tool is just the thing for laying off work quickly and accurately—for drilling, cutting out dies, etc. The guide point is set in a socket with a spiral spring to press it down. When the punch is struck, the guide presses back into its socket, permitting the punch to be held straight over its work, and insuring accurate results. The screw with check nut sets the spacer right for small or large drill, and has a variation from 1/64 in. to 3/8 in.

One in a Box.

POCKET SCREW DRIVERS

Closed.

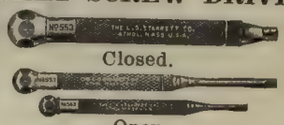
Steel Handle, Knurled Nut, Length of Handle 3 3/4 in., Length Over All 4 1/2 in. Each

No. 150—Plain, Weight 2 Oz. . $0.67

No. 150N—Nickel Plated, Weight 2 Oz. ..... .85

A compact combination of three tools a man is apt to wish he had with him a dozen times a day. Consists of a neat, finely finished steel handle with a knurled nut which firmly holds a screw driver and brad awl made in one piece, this being telescoped within the handle when not in use. The shape of the handle enables it to be used as an emergency wrench—often of the greatest convenience. Six in a Box.

POCKET SCREW DRIVERS



Closed.

Open.

Steel Tubing, Knurled and Nickel Plated, Tempered Blade. Each

No. 553A—1/4 in. Diameter Handle, 1 7/8 in. Long Blade, Weight 1 Oz. $0.42

No. 553B—3/8 in. Diameter Handle, 3 in. Long Blade, Weight 1 1/2 Oz. ..... .60

This tool is made from steel tubing, knurled and nickel plated. The butt of the blade fits a solid lock in the tube, preventing it from turning, and is held from coming out by a slight turn of the chuck.

The screw driver blades are properly tempered.

Twelve in a Box.

PATENT MAGAZINE SCREW DRIVER

Polished Steel, Knurled Handle. Each

No. 557—Length Closed 4 in., with Four Blades, 2 5/8 in. Long, 3/32, 5/32, 1/4 and 3/8 in. Wide, Telescopic Handle, Weight Each 5 Oz. $1.70

One in a Box.

ELECTRICIANS' POCKET SCREW DRIVER

Polished Steel Blades, Hard Rubber Insulated Handle, Nicely Ribbed. Each

No. 560—Length Closed 4 in., with Four Blades, 2 5/8 in. Long, 3/32, 5/32, 1/4 and 3/8 in. Wide, Telescopic Handle, Weight Each 6 Oz. $2.50

One in a Box.

This is the best tool yet offered for a set of pocket screw drivers. It has four blades of different widths, any or which may quickly be taken from the telescope handle and inserted in the end, where it is automatically locked and firmly held for use. Any or all of the blades are carried in the handle, where by a spring pressure they are held from rattling when carried in the pocket, or from being lost when the cap is off. While the cap may be readily pulled off or put on, it is rigidly held from turning and frictionally held from coming off, with no screws to bind or bother.

JEWELERS' SCREW DRIVERS

Steel Tubing, Knurled and Nickel Plated, 1/4 in. Diameter Handle.

Nos.	555A	555B	555C
Diam. Blade, In.	.040	.055	.070
Wt. Each, Oz.	1	1	1
Each	$0.60	.60	.60

Nos.	555D	555E
Diam. Blade, In.	.080	.100
Wt. Each, Oz.	1	1
Each	$0.60	.60

Per Set

Per Set of 5 ..... $2.70

The top is finished with a swivknob, concaved to fit the finger and hexagonal in shape to prevent rolling off the bench. To designate the size at a glance, the chuck end is marked with various grooves, four grooves indicating the finest size A, three grooves the next larger B, two grooves C, the largest size, E, being plain.

EYE GLASS SCREW DRIVERS

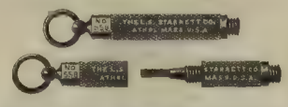
Steel Tubing, Knurled and Nickel Plated Polished Steel Blade.

Each

No. 554—Length of Handle 1 7/8 in., Blade Extends 3/4 in., Weight 1 Oz. $0.42

This screw driver is made with a chuck to hold the blade firmly in a split socket when in use. To carry in the pocket, on key-ring or watch chain, the blade may be removed by slightly loosening the chuck, then reversed and telescoped through the socket nearly full length, and held safely by tightening the chuck.

EYE GLASS SCREW DRIVERS



Steel Tubing, Knurled and Nickel Plated.

Each

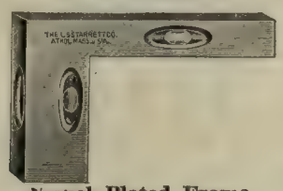
No. 558—Length 1 1/4 in., Weight Per Dozen About 2 Oz. $0.34

This Screw Driver is so made that the blade end may be reversed and screwed into the stock, thus giving a longer handle.

Twelve in a Box.

Cross-Test Levels and Plumbs

STARRETT'S



Nickel Plated Frame. Each

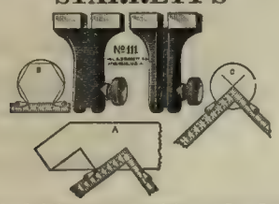
No. 134—Size 2x3x½ in. Thick, Weight Each 3Oz...**$2.50**

This is a well made and reliable tool, and valuable in plumbing, squaring and leveling up work. Just the thing to use about a planer or in setting up machinery. Leveling is indicated every way without moving tool.

One in a Box.

Stair Gauge Fixtures

STARRETT'S



Forged Steel, Nickel Plated Machine Head, Unpolished Body. Per Pair

No. 111—1⅛ in. Long, ¼x½ in. Heads, Weight Per Pair About 4 Oz.....**$1.25**

A pair of these fixtures can be readily clamped to a carpenter's steel square to form a gauge for various uses.

Sketch A shows the gauge as applied for laying out a stair stringer; sketch B, laying off hexagon angles; sketch C, as used as a center gauge or in quartering a circle.

One Pair in a Box.

Cross-Test Levels

STARRETT'S

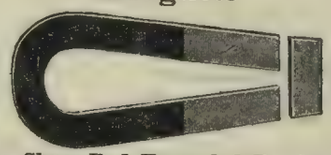
Japanned, Iron Frame. Each

No. 136—Angle 2¾ in. Long, Weight Each 3 Oz.....**$1.10**

As the cut shows, two levels are united in one frame, extending at right angles 2¾ in. each way. The level weighs but 4 oz. When placed on work to be leveled in both directions, it will not be necessary to move the tool.

One in a Box.

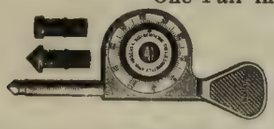
Magnets



No. 75—Horse Shoe, Red Enameled Bands, Polished Tips, with Keepers.

Length, Inches	2	2½	3	3½	4
Ap. Wt. Dozen, Lbs...	¾	1	1⅛	1½	2
Per Dozen	$1.12	1.35	1.70	2.25	3.25
Length, Inches		5	6	7	8
Ap. Wt. Dozen, Lbs...		5	8	10	12
Per Dozen		$4.45	7.80	15.55	20.00

One Dozen in a Package.



High Speed, Encased Working Parts, Right and Left Figured Dial Plates, Nickel Plated, Scored Handle, Rubber Tips. Each

No. 104—Length 5⅛ in. Weight Each 5 Oz., in Pasteboard Box **$1.70**

No. 0104—Length 5⅛ in., Weight Each 6 Oz., in Leatherette Box **2.50**

This Indicator may be run at highest speed required without heating, and this on account of our frictionless bearing against which the inner end of the spindle revolves.

One in a Box.

Speed Indicators

Alarm, Double Speed, Right and Left Hand, Nickel Plated, Steel Spindle and Point, Nickel Plated Steel Alarm Bell. Per Dozen

No. 10—Length Over All 3¾ in., Weight Per Dozen About 3 Lbs. **$26.65**

The bell rings when either hand is at zero and afterwards at every 100 revolutions. A shaft turning to the left is registered by the shorter hand stamped L and the inner dial, a shaft turning to the right by the longer hand marked R and the outer dial.

One-twelfth Dozen in a Box.

Speed Indicators

STARRETT'S

Encased Working Parts, Right and Left Figured Dial Plate, Nickel Plated, Rubber Handle, Rubber Tips. Each

No. 106—Length 5⅛ in., Weight Each 4 Oz., in Pasteboard Box **$2.50**

No. 0106—Length 5⅛ in., Weight Each 5 Oz., in Leatherette Box **3.35**

By releasing the pressure the disc is liberated for counting the revolutions of the shaft when every 100 may be noted by feeling the knob pass under the thumb lightly pressed against it, thus relieving the eye, which has only to look on the watch to note the time.

One in a Box.

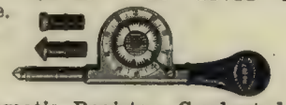
Speed Indicators

Single Speed, Hardened Steel Spindles, Nickel Plated, Iron Frame. Per Dozen

No. 1—Length Over All 3¾ in., Weight Per Dozen About 2½ Lbs. **$12.25**

These Speed Indicators are made with accurate dials which record correctly, and have hardened steel spindles.

One-twelfth Dozen in a Box.



Automatic Register, Graduated Dial, Nickel Plated, Hard Rubber Handle, Rubber Tips. Each

No. 107—Length 5¾ in., Weight Each 5 Oz., in Pasteboard Box **$5.00**

No. 0107—Length 5¾ in., Weight Each 7 Oz., in Leatherette Box **5.85**

This instrument was devised to automatically register hundreds as well as units and tens, and thus relieve the mind from keeping tally; also to furnish a better registering indicator at a more reasonable cost than heretofore. The instrument will register 5,000 revolutions. The large dial is graduated into one hundred lines, each representing a revolution of the spindle. The small dial has fifty lines cut upon its face.

One in a Box.

Surface Speed Attachments

Cut Shows Indicator with Attachment. **For Starrett's Speed Indicators.** Each

No. 109—Rubber Banded Indicator Wheel, Weight 1 Oz....**$0.85**

This attachment applied to one of Starrett's speed indicators is designed to show the number of lineal feet per minute the periphery of a shaft or pulley is running and thus enable a workman to know if the speed is too fast, or is too slow to get the most work the tool will stand.

One in a Box.

Surveyors' Instruments

ENGINEERS' AND SURVEYORS' TRANSIT

No. 1900.

Black Japanned, Graduations on Brass and Silvered. Designed to Meet the Requirements of the Highest Class of the Engineering Profession. Particularly Adapted for Brige Building, City and Land Surveying and Hydraulic Work.

SPECIFICATIONS

Telescope—Length 12 inches, magnifying power 25 diameters. Lenses of best optical quality, aperture of objective lens 1¼ inches, with maximum light and fine definition. Telescope is balanced and reverses at both ends. Telescope axis of rigid design and constructed of hard bell metal. Line of collimation true for all distances. Eye-piece provided with improved micrometer arrangement for focusing cross-hairs. Object slide and eye-piece are provided with dust protectors. Telescope shows object erect. Fixed stadia hairs reading 1′ in 100′.

Standards—Phospher bronze, of rigid design, well ribbed to reduce weight.

Horizontal Circle—6 5/16 inches in diameter to inside edge of graduation, graduated to ½ degrees with lines of uniform thickness. Marked with two rows of figures, one reading from 0 to 180 each way the other from 0 to 360. Figures inclined in direction they are to be read.

Verniers—Two, double, reading to single minutes and exactly opposite, placed at an angle of 30 degrees to line of sight, figures inclined in direction they are to be read.

Compass—Graduated to ½ degrees and figured from 0 to 90 on each side of north and south. Improved hollow oval steel needle, jeweled center and perfectly balanced.

Plate Levels—One, 2¼ inches long, other 1½ inches, extra sensitive, very carefully ground and divided to allow a precise leveling up.

Tangent Screws—Phospher bronze of improved design with opposing spiral spring.

Centers—3½ inches long. Inner is made of bell metal. Intermediate of gun metal and outer of phospher bronze perfectly tapered and fitted.

Leveling Head—Improved design. Well ribbed. Four leveling screws, shifting center.

Weight—Instrument 13 lbs. Tripod 12 lbs.

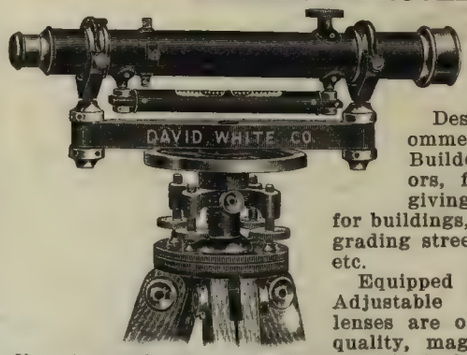
Equipment—Highly polished mahogany case with strap, fine grained white ash split leg tripod with boot-spurs, magnifying glass, sunshade, plumb-bob, screw driver and adjusting pins.

	Each
No. 1900—(See Illustration)	**$300.00**
No. 1902—Same as No. 1900, Provided with Sensitive Level to Telescope, Clamp and Tangent Screw	**320.00**
No. 1904—Same as No. 1902, Provided with 5 in. Full Vertical Circle or Arc, Graduated to ½ Degrees, with Double Vernier Reading to Single Minutes, Circle Numbered from 0 to 90 in Quadrants	**360.00**

Weight Each Ready for Shipment About 35 Pounds.

No. 2018.

ARCHITECTS' LEVELS
WHITE'S IMPROVED



Designed for and recommended to Architects, Builders and Contractors, for leveling walls, giving lines and levels for buildings, laying out angles, grading streets, sewers, drains, etc.

Equipped with 12 in. long Adjustable Telescope. The lenses are of the best optical quality, magnifying power 25 diameters. Aperture of object is 1¼ inches. Instrument is provided with four leveling screws and clamp to spindle. The Y's have an improved locking arrangement dispensing with the old-fashioned pin bolts. The center is made of hard bell metal, extra long and well tapered. It also has a horizontal circle 4½ inches in diameter fitted to the upper end of the socket and turns readily upon it, thus allowing it to be set at zero at any given point. The circle is graduated from 0 to 90 degrees each way and has a vernier reading to 5 minutes, which is screwed to the flange of the center. The telescope is of fine definition and is focused by rack and pinion of improved form. The eye-piece turns in a spiral-like manner, which enables a more precise focusing of the cross-hairs. The instrument can be placed either upon a tripod or a small triangular plate called a trivit, having three sharp steel points by which it can be firmly set upon any surface of wood or stone. Both tripod and trivit are furnished with each level. The level vial is extra long, very carefully ground and is graduated on the glass.

	Each
No. 2011—Complete, Packed Erect Ready for Use in Polished Hardwood Box with Strap, Containing Full Directions for Use, Together with Screw Capped Bob, Sun Shade, Dust Cap and Adjusting Pins	**$ 75.00**
No. 2012—Same as No. 2011, with a Clamp and Tangent Movement, thus Enabling the Instrument to be Clamped More Securely and a Movement in a Horizontal Plane to be Made More Accurately	**83.25**
No. 2013—Same as No. 2011, with 3 in Needle Compass; this Instrument will be Found Very Serviceable as a Ready Means of Determining the Bearing of Lines or of Measuring Angles by the Needle; the Compass is Graduated to Degrees, Figured from 0 to 90 on Each Side of North and South, Graduations and Inside of Face of Compass Silvered, Magnetic Needle 3 in. Long, Made of Finest Tempered Oval Steel Tubing and is Perfectly Balanced	**100.00**
No. 2014—Same as No. 2013, with the Exception that it is Supplied with a Clamp and Tangent Movement, thus Enabling the Instrument to be Clamped More Securely and a Movement in a Horizontal Plane to be Made More Accurately	**108.25**

Weight Each Ready for Shipment About 28 Pounds.

ARCHITECTS' TILTING LEVELS
WHITE'S IMPROVED

	Each
No. 2018—Designed Same as No. 2011, Provided with an Attachment by which Sights 45 Degrees Above and Below the Horizontal Line can be Taken; the Attachment is a Small Set of U-Shaped Standards Screwed into the Center of the Level Bar and when not in Use can Readily be Removed; this Instrument, Therefore, Permits of a Wider Range of Work than can be Done with the Ordinary Level; the Axle on the Telescope is Permanently Fixed, thus Insuring Accuracy, and does not Interfere when Instrument is Used as an Ordinary Level	**$ 91.75**
No. 2019—Same as No. 2018, Provided with a Clamp and Tangent Screw, Enabling the Instrument to be Clamped More Securely and a Movement in a Horizontal Plane to be Made with Greater Accuracy	**100.00**

Weight Each Ready for Shipment About 28 Pounds.

Surveying Instruments

RECONNOISANCE OR BUILDERS' TRANSIT

No. 2025.

WHITE'S IMPROVED

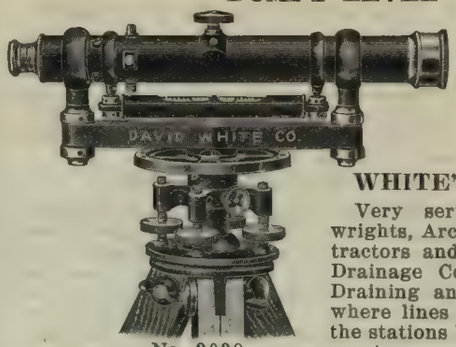
Designed for light and moderately accurate work. Especially recommended to the building contractor for taking angles, leveling foundations, examining walls in course of construction, giving lines and levels for buildings, etc. Also recommended to engineers for all preliminary work.

The No. 2022 has a telescope 9¾ in. long with magnifying power 22 diameters, with dust cap and sunshade. Lenses are of the very best optical quality. Aperture of object lens 1⅛ in. Improved rack and pinion movement to objective lens for focusing object. Micrometer motion to eye-piece (improved form) for precise focusing of cross-hairs, long ground level to telescope, graduated on the glass. Telescope reversible from both ends. Horizontal limb 5⅜ in. in diameter, divided to ½ degrees, with one vernier reading to single minutes. Plate levels ground and graduated to allow a precise leveling up. Clamp and tangent screw to plate and telescope. All tangent screws provided with counter springs. Four leveling screws and shifting center. Instrument stands erect in highly polished mahogany case with carrying straps, provided with plumb bob, magnifying glass, adjusting pins and white ash split leg tripod with boot spurs.

	Each
No. 2022—As Described Above	**$170.00**
No. 2023—Same as No. 2022, Provided with 4⅛ in. Vertical Circle Divided to ½ Degrees, with Vernier Reading to Single Minutes	**190.00**
No. 2024—Same as No. 2022, Provided with 3¾ in. Needle Compass Divided to ½ Degrees and Numbered 0 to 90 Each Side of the North and South	**210.00**
No. 2025—Same as No. 2023, Provided with 3¾ in. Needle, Compass Divided to ½ Degrees and Numbered 0 to 90 Each Side of the North and South	**230.00**

Weight Each, Ready for Shipment, 30 Pounds.

DUMPY LEVEL



No. 2038.

WHITE'S IMPROVED

Very serviceable for Millwrights, Architects, Mason Contractors and Builders, also for Drainage Contractors for Tile Draining and other operations where lines are to be run with the stations but a short distance apart.

The No. 2038 has a telescope 12 in. long, with magnifying power 25 diameters. Aperture of objective lens 1¼ in. Horizontal circle 4½ in. in diameter and graduated from 0 to 90 degrees each way, with vernier reading to 5 minutes. The circle can be set at zero at any given point. Center is extra long and well tapered and is made of hard bell metal. Telescope is of fine definition and the objective lens is focused by rack and pinion of improved make. Improved eye-piece for precise focusing of the Cross Hairs. Telescope Yokes are of best composition metal, permanently fixed, thus insuring greater stability. Tripod is made of best seasoned hardwood. A metal trivit having three sharp steel points, for placing the level on any surface of wood or stone, together with hardwood tripod, is furnished with each instrument. Level vial is extra long, carefully ground and is graduated on the glass. Instrument packed erect, ready for use, in polished hardwood box with strap, containing full directions for use, together with screw capped plumb bob, sunshade, dust cap and adjusting pins.

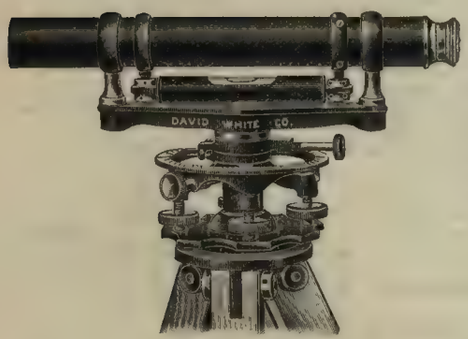
	Each
No. 2038—As Described Above	**$71.10**
No. 2039—Same as No. 2038, Provided with a Clamp and Tangent Movement, Enabling Instrument to be Clamped More Securely and a Movement in a Horizontal Plane to be Made More Accurately	**80.00**

Weight Each, Ready for Shipment, 30 Pounds.

DRAINAGE LEVELS

WHITE'S IMPROVED

Especially serviceable for the Drainage Contractor and Building Contractor as well as the Farmer, Landscape Gardener, etc.



Specifications.

Telescope—10 in. long, magnifying power is 18 diameters. Object lens 1 in. in diameter. Object is focused by pulling eye-piece in and out. Fixed sunshade, cross-hairs visible at all times. Telescope level 3½ in. long.

Cross-Bar—6¼ in. long. Well ribbed to reduce weight.

Horizontal Circle—4 in. in diameter, graduated to degrees and numbered from from 0 to 90 each way with vernier reading to single degrees. Circle and body are cast in one piece thus insuring stability. Vernier is movable for the purpose of setting same at zero at any given point.

Leveling Head—Substantial design with 4 leveling screws and clamp to spindle.

Finish—Durable black trimmed with yellow brass.

Weight—Instrument, 3½ pounds. Tripod, 3½ pounds.

	Each
No. 2060—Packed Whole and Stands Erect in Hardwood Case, Provided with Lock, Strong Leather Strap and Contains Plumb Bob and Adjusting Pin, Seasoned Hardwood Tripod	**$50.65**
No. 2062—Same as No. 2060, without Horizontal Circle	**41.75**

Weight Each, Ready for Shipment, About 15 Pounds.

SURVEYORS' VERNIER COMPASS

WHITE'S IMPROVED

	Each
No. 2115—Aluminum, with 4 in. Needle, Mounted on Jeweled Bearings, Made of Tempered Oval Steel Tubing, Perfectly Balanced, Graduated on Raised Ring to Degrees, with Movable Variation Ring and Vernier Reading to 5 Minutes, Folding Sights, Two Levels, Compass Figured from 0 to 90 Each Side of North and South, Ball and Socket Joint and Mounting for Jacob Staff, Complete in Stitched Sole Leather Case with Shoulder Straps	**$47.25**

Weight Each 4 Pounds.

Leveling Instruments

BUILDERS' LEVELS
BOSTROM'S

Made Entirely of Brass, Highly Lacquered and Finished. Each

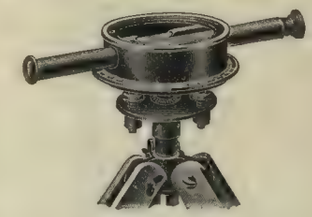
No. 3B—Achromatic Telescope Magnifying Lenses, Graduated Circle Divided into 360 Degrees, Numbered from Zero to 90 Degrees in Both Directions, Giving Zero Points on Opposite Sides of Circle, Has Clamping Screw for Holding in Any Position, Has a Ground Level Vial, Complete Outfit Includes Level and Telescope with Neat Oak Box, Tripod, Graduated Rod, Target and Plumb Bob, with Full Instructions for Adjusting and Operating **$47.20**

Weight Complete 15 Pounds.

This Level is an instrument containing the rare qualities of simplicity, accuracy, efficiency, compactness and durability at extremely moderate cost.

One in a Box.

FARM LEVELS
BOSTROM'S



Brass Face Plate and Turret.

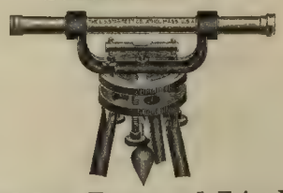
Each

No. 2B—Achromatic Telescope Magnifying Lenses, Complete Outfit Includes Level with Telescope, Etc., in Neat Wood Box, Yellow Pine Tripod, Sliding Target Rod, Target and Plumb Bob, with Full Instructions..... **$28.30**

The Bostrom Farm Level enables a person to read the cross on the target at a distance of over 400 yards. It is welcomed by land owners for draining, irrigating, fencing, grading, road building, leveling foundations, etc.

One in a Box.

STARRETT'S



Japanned Iron Frame and Tripod, Extension Legs, Nickel Plated Tubes, Level Case and Graduated Arc.

Each

No. 101A—Weight Each 13¾ Lbs. **$20.85**

No. 101B—With Ground Vial in Level, Weight Each 13¾ Lbs. **23.35**

Designed for the use of architects, contractors, millwrights, masons, surveyors, etc.

The tripod is of iron, and has improved extension legs. The upper parts are hollow, to receive within them the lower parts, which may be held at any desired length by clamp screws.

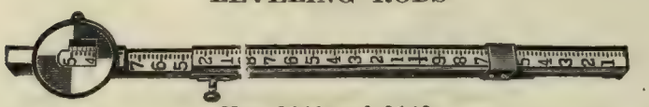
The upper plate is connected to the tripod head by a ball and socket joint, and can be leveled by the leveling screws. This plate is recessed to contain a graduated arc below its upper surface, and has a center stud on which the arc and level turn. The graduated arc is of steel, and has on it one half of a circumference divided to degrees and properly numbered. This arc turns on the center stud of the upper plate, independent of the level or sight tube.

The sight tube is a brass tube 12 in. long, and in one end is a small eye aperture, while the other end has the usual cross wires.

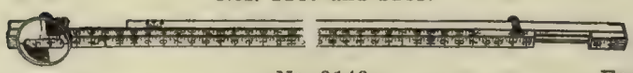
One in a Box.

Surveying Instruments

LEVELING RODS



Nos. 2140 and 2142.



No. 2143.

Each

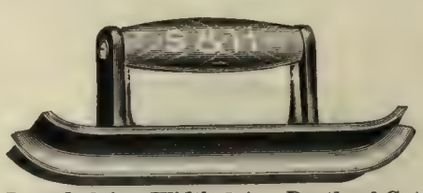
No. 1 — Iron, Nickel Plated, Weight Each 1⅛ Lbs.....$0.60

No. X01—Hardened Aluminum, Weight Each ⅝ Lb..... 1.35

Two in a Box.

JOINTERS



Length 9 in., Width 3 in., Depth of Cut ½ in.

Each

No. 3 — Iron, Nickel Plated, Weight Each 1½ Lbs.....$0.95

No. X03—Hardened Aluminum, Weight Each ¾ Lb..... 1.70

Two in a Box.

STRAIGHT EDGE JOINTER

Length 6 in., Width 3 in., Depth of Cut ½ in. Each

No. 5 — Iron, Nickel Plated, Weight Each 1¼ Lbs.....$0.65

No. X05—Hardened Aluminum, Weight Each ⅝ Lb..... 1.35

No. 05—Bronze, Weight Each 1⅝ Lb. 1.70

Length 8 in., Width 1¾ in., Depth of Cut ½ in. Each

No. 42 — Iron, Nickel Plated, Weight Each 1⅛ Lbs.....$0.80

Two in a Box.

JOINTER

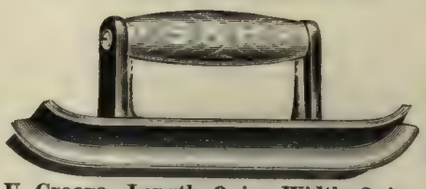
Length 8 in., Width 2½ in., Depth of Cut ½ in. Each

No. 65 — Iron, Nickel Plated, Weight Each 1⅜ Lbs.....$0.85

No. X065—Hardened Aluminum, Weight Each 1⅛ Lbs..... 1.45

Two in a Box.

DRIVEWAY GROOVERS



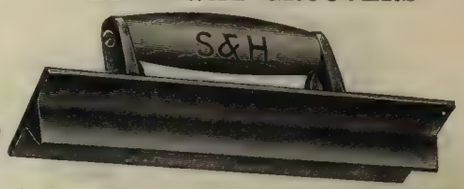
U Groove, Length 9 in. Width 3 in., Depth of Cut ⅜ in.

Each

No. 7 — Iron, Nickel Plated, Weight Each 2 Lbs.....$0.95

Two in a Box.

DRIVEWAY GROOVERS



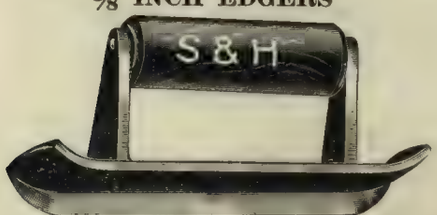
Length 8 in., Width 2½ in., Depth of Cut ¾ in. Each

No. 66 — Iron, Nickel Plated, Weight Each 1½ Lbs.....$0.85

No. X066—Hardened Aluminum, Weight Each ¾ Lb..... 1.45

Two in a Box.

⅜ INCH EDGERS



Length 6 in., Width 2¾ in., with a ⅜ in. Radius.

Each

No. 2 — Iron, Nickel Plated, Weight Each 1⅛ Lbs.....$0.60

No. X02—Hardened Aluminum, Weight Each ⅝ Lb..... 1.30

Two in a Box.

⅜ INCH EDGERS

Length 6 in., Width 1½ in., with a ⅜ in. Radius.

Each

No. 37 — Iron, Nickel Plated, Weight Each ¾ Lb.....$0.70

No. X037—Hardened Aluminum, Weight Each ½ Lb..... 1.35

Two in a Box.

⅜ INCH EDGERS

Length 8 in., Width 2½ in., with a ⅜ in. Radius.

Each

No. 64 — Iron, Nickel Plated, Weight Each 1⅛ Lbs.....$0.85

No. X064—Hardened Aluminum, Weight Each ½ Lb..... 1.45

Two in a Box.

¾ INCH EDGERS

Length 6 in., Width 3 in., with a ¾ in. Radius.

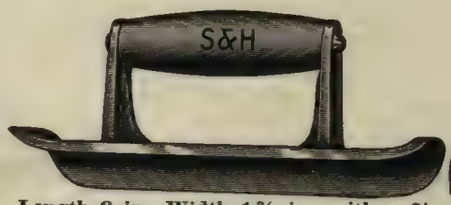
Each

No. 4 — Iron, Nickel Plated, Weight Each 1⅜ Lbs.....$0.60

No. X04—Hardened Aluminum, Weight Each ½ Lb..... 1.35

Two in a Box.

¾ INCH EDGERS



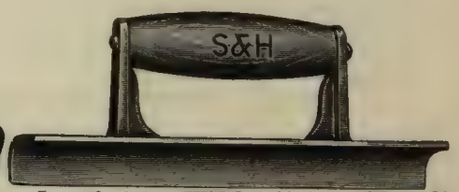
Length 8 in., Width 1¾ in., with a ¾ in. Radius.

Each

No. 39 — Iron, Nickel Plated, Weight Each 1¼ Lbs.....$0.80

Two in a Box.

¾ INCH EDGERS



Length 8 in., Width 2½ in., with a ¾ in. Radius.

Each

No. 63 — Iron, Nickel Plated, Weight Each 1⅛ Lbs.....$0.85

No. X063—Hardened Aluminum, Weight Each ½ Lb..... 1.45

Two in a Box.

Cement Workers' Tools

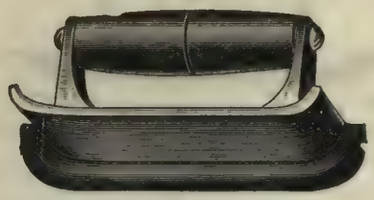
CURBING EDGER

Length 6 in., Width 3½ in., with a 1½ in. Radius.

Each

No. 100—Iron, Nickel Plated, Weight Each 1⅜ Lbs..... **$1.35**
No. X0100—Hardened Aluminum, Weight Each ⅝ Lb..... **1.70**
Two in a Box.

OUT-CURVE EDGER

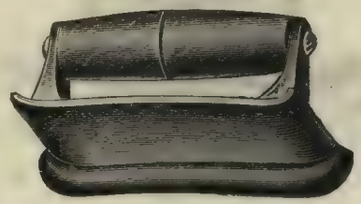


Length 5 in., Width 2 in., with a ⅜ in. Radius.

Each

No. 58 — Iron, Nickel Plated, Weight Each ⅝ Lb..... **$0.70**
For making the outer crown or narrow sidewalks or stair approaches, where a very small circle is required.
Two in a Box.

IN-CURVE EDGER



Length 5 in., Width 2 in., with a ⅜ in. Radius.

Each

No. 57 — Iron, Nickel Plated, Weight Each ⅝ Lb..... **$1.70**
For making the inner curve on narrow sidewalks or stair approaches, where a very small circle is required.
Two in a Box.

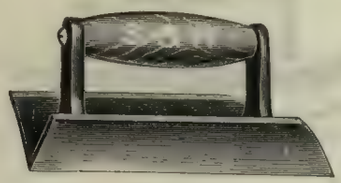
SQUARE EDGER

Length 6 in., Width 3 in., Depth of Edge 1½ in.

Each

No. 17 — Iron, Nickel Plated, Weight Each 1⅜ Lbs..... **$1.00**
No. X017—Hardened Aluminum, Weight Each ⅝ Lb..... **1.35**
Two in a Box.

CORNER TOOL

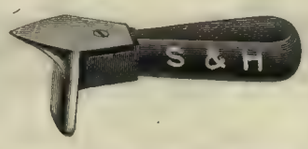


Length 6 in., Width of Sides 1½ in.

Each

No. 6 — Iron, Nickel Plated, Weight Each 1 Lb..... **$0.65**
No. X06—Hardened Aluminum, Weight Each 7/16 Lb..... **1.30**
No. 06—Bronze, Weight Each 1⅝ Lbs..... **1.65**
Two in a Box.

RADIUS TOOL



Length Over All 5½ in., with ⅜ in. Radius.

Each

No. 23 — Iron, Nickel Plated, Weight Each ⅝ Lb..... **$0.65**
No. X023—Hardened Aluminum, Weight Each 7/16 Lb..... **1.12**
No. 023—Bronze, Weight Each ¼ Lb..... **1.15**
Two in a Box.

CORRUGATING TOOL

Length 6 in., Width 4½ in., Makes Grooves ⅛ in. Deep, ⅝ in. Apart.

Each

No. 44 — Iron, Nickel Plated, Weight Each 1½ Lbs..... **$1.35**
No. X044—Hardened Aluminum, Weight Each ¾ Lb..... **2.00**
Two in a Box.

CURB-GUTTER FINISHING TOOL

Length 6 in., Width of Sides 3 in., Sides Slightly Curved at Each End.

Each

No. 26 — Iron, Nickel Plated, Weight Each 1½ Lbs..... **$1.35**
No. X026—Hardened Aluminum, Weight Each 7/16 Lb..... **2.00**
Two in a Box.

GUTTER TOOL

Length 6 in., for Making Gutter 1 in. Deep by 3½ in. Wide.

Each

No. 8 — Iron, Nickel Plated, Weight Each 1½ Lbs..... **$1.35**
No. X08—Hardened Aluminum, Weight Each ⅝ Lb..... **1.75**
Two in a Box.

RAISED (TUCK) POINTERS

Sizes ¼ in., ⅜ in. and ½ in.

Each

No. 12—Iron, Nickel Plated, Weight Each 7/16 Lb.... **$0.60**
No. X012—Hardened Aluminum, Weight Each 7/16 Lb.. **1.12**
Twelve in a Box.

CONVEX POINTERS

Sizes ¼ in., ⅜ in. and ½ in.

Each

No. 61—Iron, Nickel Plated, Weight Each About ⅜ Lb. **$0.60**
Twelve in a Box.

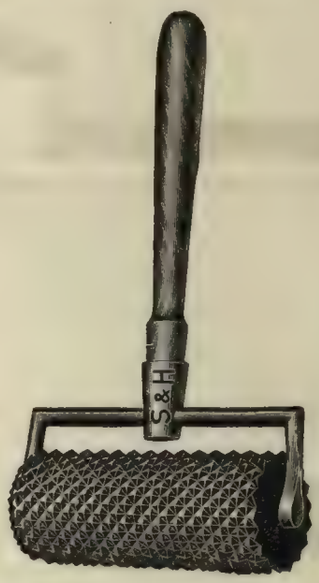
Cement Workers' Tools.

IMPRINT ROLLERS

Length of Cylinder 10 in., Diameter of Cylinder 4 in., 1 in. Distance Between Dots.

	Each
No. 15 — Iron, Nickel Plated, Weight Each 9¼ Lbs.	**$4.60**
No. 015—Bronze, Weight Each 10¾ Lbs.	**18.65**

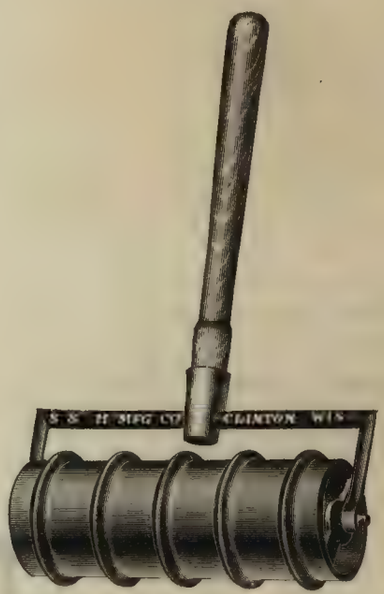
One in a Package.



Length of Cylinder 8 in., Diameter of Cylinder 3 in., ½ in. Distance Between Dots.

	Each
No. 70—Iron, Nickel Plated, Weight Each 5¾ Lbs.	**$ 8.00**
No. 070—Bronze, Weight Each 7 Lbs.	**16.10**

One in a Package.

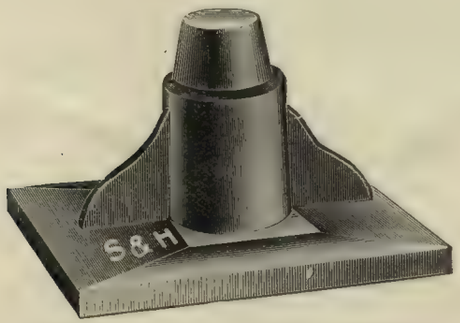


Length of Cylinder 10 in., Diameter of Cylinder 4 in., 2 in. Distance Between Grooves.

	Each
No. 16 — Iron, Nickel Plated, Weight Each 11½ Lbs.	**$ 4.60**
No. 016—Bronze, Weight Each 8 Lbs.	**18.65**

One in a Package.

TAMPERS



Cast Iron, with 4 ft. Hickory Handle. For Walk and Driveway Work.

Nos.	3	4	5
Inches	10x10	8x10	8x8
Weight Each, Lbs.	22½	20	17
Each	$1.70	1.35	1.25

Open Stock.

Combination, Cast Iron, 4 ft. Hickory Handle, for Steps, Curbs and Small Work.

	Each
No. 2—Large End 3x4 in., Pein End 1x4 in., Weight Each 10½ Lbs.	**$2.10**

Open Stock.

TILING TOOL

9 in. Long Over All.

	Each
No. 91—Iron, Nickel Plated, Weight Each 1 Lb.	**$0.65**

This Tool can be used with common lath for a straight edge and make a fine job as the Tool is under perfect control of the operator. It is used by plasterers to make imitation of tiling in bath rooms and similar places.

BEADING TOOLS

Made of Cold Drawn Steel, Milled True to Gauge, for Stone Range or Cement Block Work, Concave on One End and Convex on the Other.

Nos.	11	12	13	14

Oilstones.

LILY WHITE WASHITA

Best Selection of Washita.

	Each
No. 1-LW—8 in. Long, 2 in. Wide, ¾ to 1 in. Thick, Weight Each About 1¾ Lbs.	**$1.00**

The Lily White Washita is uniform in texture, free from foreign substance and is nicely finished. It is the most satisfactory natural grit Oilstone ever produced for Carpenters' and General Woodworkers' Tools.

One in a Box.

WASHITA

Medium Quality, 2 in. Wide, ¾ to 1 in. Thick.

Nos.	16-W	18-W
Length, Inches	5¾ to 6½	8
Weight Each About, Lbs.	1⅓	1¾
Each	$0.48	.70

This Stone is a medium priced Oilstone for general use, not as carefully graded as the Lily White.

One in a Box.

HINDOSTAN

Washita Finish (White).

	Per Pound
No. 1-H—8x2x1 to 1¼ in., Weight Each About 1½ Lbs.	**$0.17**

The Hindostan Stones are soft and fine gritted and are extremely useful for general sharpening purposes.

Twenty-five Pounds in a Box.

INDIA

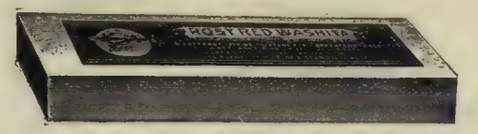
Medium Grit.

					Each
No. 0	—8	x2	x1	in., Weight Each 1½ Lbs.	**$1.40**
No. 1½	—7	x2	x1	in., Weight Each 1¼ Lbs.	**1.05**
No. 29	—6	x2	x1	in., Weight Each 1 Lb.	**.84**
No. 2	—6	x1⅝	x¾	in., Weight Each ¾ Lb.	**.70**
No. 3	—4	x1	x½	in., Weight Each ¼ Lb.	**.42**
No. 24	—4½	x1½	x⅝	in., Weight Each ⅜ Lb.	**.56**

These Stones are for ordinary sharpening of Mechanics' Tools not requiring finishing edge. Especially recommended for Tools used in working soft wood, cloth, leather and rubber.

One in a Box.

ROSY RED WASHITA



Best Selection of Washita.

	Each
No. 1-RR—8 in. Long, 2 in. Wide, ¾ to 1 in. Thick, Weight Each About 1¾ Lbs.	**$1.00**

The Rosy Red Washita has an even porous grit somewhat coarser than the Lily White and therefore is faster cutting.

HARD ARKANSAS

Pure Silica Stone, 2 in. Wide, ¾ to 1 in. Thick.

Nos.	6A	7A	8A
Length, Inches	6	7	8
Weight Each About, Lbs.	1	1¼	1½
Each	$4.70	5.70	6.70

This Stone is composed of Pure Silica and its sharpening qualities are due to small sharp pointed grains or crystals, hexagonal in shape which are much harder than steel and will therefore cut away and sharpen Steel Tools. The extreme fineness of texture makes the Arkansas of necessity a slow cutter, but in the very density of its crystals of which it is composed lies its virtue as a perfect sharpener.

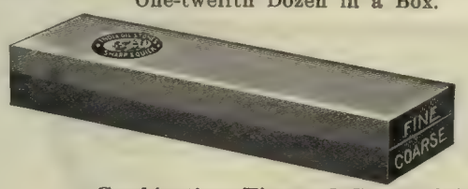
One in a Box.

EMERY

Turkish Emery, Combination of Coarse and Fine Grit.

	Per Dozen
No. 1-E—7x2x1 in., Weight Per Dozen About 15 Lbs.	**$5.00**
No. 2-E—6x2x¾ in., Weight Per Dozen About 18 Lbs.	**4.45**

One-twelfth Dozen in a Box.

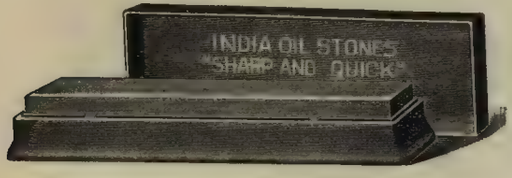


Combination, Fine and Coarse Grit.

					Each
No. 00	—8	x2	x1	in., Weight Each 1½ Lbs.	**$1.75**
No. 01½	—7	x2	x1	in., Weight Each 1¼ Lbs.	**1.40**
No. 029	—6	x2	x1	in., Weight Each 1 Lb.	**1.05**
No. 02	—6	x1⅝	x¾	in., Weight Each ¾ Lb.	**.84**

The Coarse Side is used for grinding very dull or badly nicked Tools and the Fine Side for putting on a finishing edge.

One in a Box.



Iron Boxes.

FOR INDIA OIL STONES

Iron, Japanned, Felt Lined, Four Cork Feet.

	Each

Open Stock.

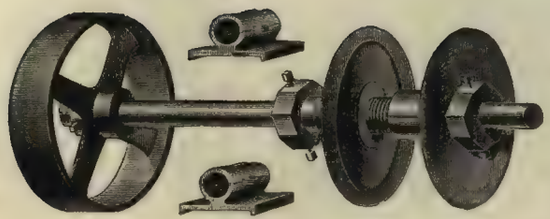
Grindstone Arbors for Power.



Made of Steel, with Bearings Boxed Out for Babbitt. Neatly Finished.

	Each
No. 64—Shaft 1¼ in. Diameter, 2 ft. 4 in. Long, with 12 in. Pulley, Will Hang Stone 3 ft. Diameter, 3 to 6 in. Thick.	$25.55
No. 65—Shaft 1 in. Diameter, 2 ft. 4 in. Long, with 12 in. Pulley, Will Hang Stone 2 ft. 6 in. Diameter, 2 to 5 in. Thick..	23.35

The advantage of this fixture is the ease with which it is put into the Stone and adjusted so as to make the Stone run true. By its use customers can return the hub when stone is worn out and receive a new stone from the quarry absolutely ready for use, thus avoiding all dust, dirt and laborious work of hanging and truing a Grindstone.

Grinding Machines.

EVERKEEN J.P.H.CO. TRADE MARK

Each

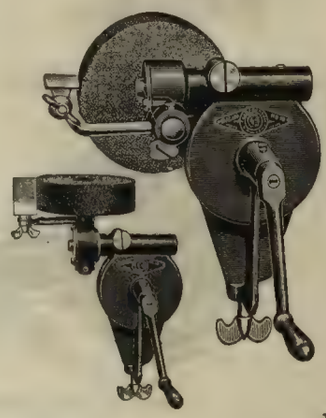
No. 4C—Fitted with 7½x1¼ in. Carborundum Wheel, 1½ in. Arbor Hole, and Adjustable Tool Rest, Weight Each Packed About 21½ Lbs...**$10.55**

This Grinder is built for General machine shop work, woodworking plants, garages and places where power-driven grinders are not available.

One in a Box.



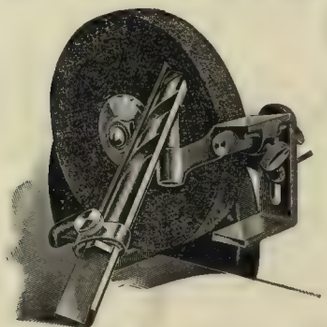
Each

No. 10C—Fitted with 5x1½ in. Carborundum Wheel and Adjustable Tool Rest, Weight Each About 15 Lbs.....**$9.45**

The Shaft on this Grinder can be reversed so as to run horizontally or vertically. The machine is handy for household, hotel and small shop use and for grinding meat chopper blades and clipper blades.

One in a Box.

TWIST DRILL ATTACHMENT



Malleable Iron, Nickel Plated, for Carborundum Niagara Grinders.

Each

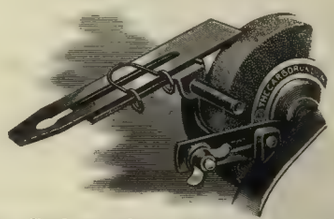
No. 23—Attachment Built Expressly for Nos. 3 and 4 Niagara Grinders.....**$2.80**

The attachment is mechanically simple and with it a wide range of Drills can be pointed.

Weight Each About 2 Pounds.

One in a Box.

GRINDING GUIDE



For Carborundum Niagara Grinders.

Each

No. 19—Flat Steel Base or Plate, Nickel Plated, for Nos. 1, 2, 3 and 4 Grinders.....**$0.70**

The Guide slides back and forth on a guide rod or support. The plane-bit or chisel is securely held to the base or plate of the device by means of a strong clip or spring. There is no chance for the Tool to slip as it is always held in position desired by operator. The Tool can be tilted to any desired angle to get the required bevel.

Weight Each About 1 Pound.

One in a Box.

FOOT POWER ATTACHMENT

Nos. 20 and 21.

FOOT POWER ATTACHMENT

Adjustable, for Carborundum Niagara Grinders.

Each

No. 20—Malleable Iron, for No. 3 Grinder.....**$2.10**

No. 21—Malleable Iron, for No. 4 Grinder..... **2.10**

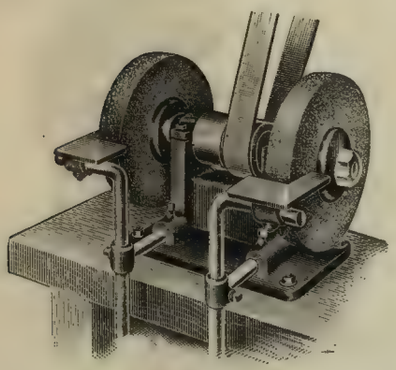
Weight Each About 3 Pounds.

Can be readily adjusted to several heights.

One in a Box.

Grinder Head.

CARBORUNDUM NIAGARA



Best Grade Gray Iron Main Casting, Best Quality Crucible Steel Shaft, Adjustable Genuine Babbitt Lined Bearings, Furnished with Two Carborundum Wheels, One Fine and Coarse Grit.

Each

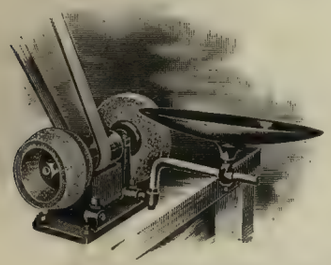
No. 28—Grinding Head, Fitted with Two 7 in. Carborundum Wheels.....**$20.00**

Weight Each Boxed About 36 Pounds.

This is a splendid Grinder Head for small shops where power is available. It is sturdy and every part is accurately machined and assembled. The bearings are babbitt lined and are adjustable to take up any possible wear.

One in a Crate.

Harrow Disc Grinding Device.



For No. 28 Grinding Head.

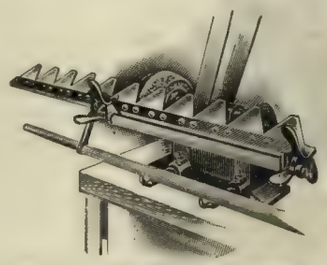
Each

No. 31—Harrow Disc Grinding Device, Weight Each About 10 Lbs.....**$3.50**

The Harrow Disc Holder is so designed that the disc can be adjusted to any desired bevel. The motion of the grinding wheel rotates the disc across the face of the wheel, thus assuring a uniform bevel and the bevel is always true with the center of the disc. The harrow grinding device is used with the plain general grinding wheel.

One in a Box.

Harvester Section Grinding Device.



For No. 28 Grinding Head.

Each

No. 30—Harvester Section Grinding Device, Weight Each About 7 Lbs.....**$7.25**

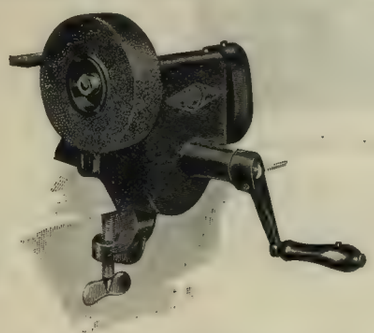
This Attachment is rigidly supported to the Machine by two arms fastened to the base which holds a guide rod so that the attachment can be moved backward and forward so as to grind every tooth in the section, even those in the ends.

One in a Box.

Hand Sickle Grinder.

CARBORUNDUM NIAGARA

Showing Sickle Grinding. Device.



Showing Tool Grinding Wheel.

Gray Iron Gear Case, Enclosed Machine Cut Gears, Malleable Iron Handle and Thumb Clamp, Sickle Holder Attachment, Fitted with Carborundum Double Bevel Sickle Grinding Wheel and Carborundum Flat Face Tool Grinding Wheel.

Each

No. 14—Fitted with One 4x1½ in. Flat Face Carborundum Wheel and One Double Bevel Sickle Grinding Wheel, Weight Each About 23 Lbs.**$10.45**

This Machine can be used in the shop or carried to the field and used clamped to the fence or mower wheel.

One in a Box.

Utility Grinder.

CARBORUNDUM NIAGARA, FOOT POWER

Gray Iron Gear Case, Strong, Durable Steel Tube Frame, Pedal Drive, Machined Enclosed Gears, Adjustable Seat, with Two Carborundum Wheels, One Coarse and One Fine Grit, for general grinding.

Each

No. 17—Frame 48 in. High, 32 in. Long, with Two 7 in. Diameter Wheels, Weight Each 100 Lbs..**$32.75**

One in a Crate.

Cortland Corundum Wheels..... .....**Discount**.....%

Corundum is the hardest of all known minerals except the diamond. The gems, ruby, sapphire and Oriental emerald, are perfectly crystallized, highly colored varieties of Corundum. Its great hardness, toughness and tendency to break with a rough "hackly" fracture—producing grains with extremely sharp edges—make Corundum the ideal abrasive for hard metals. Its quality of cutting "cool," not heating the article ground, renders it especially superior for tool grinding.

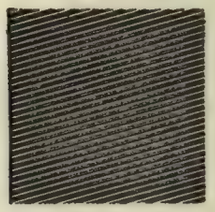
Dead Smooth.

SINGLE CUT

Particularly Adapted for Saw Filing, Also Used on Lathe Work by Machinists, and by Some Classes of Wood Workers, Carriage Builders, Etc.



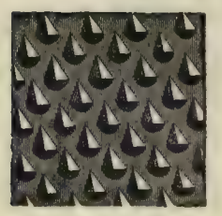
Bastard.

Second Cut.

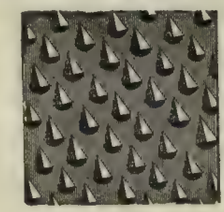
Smooth.

RASP CUT

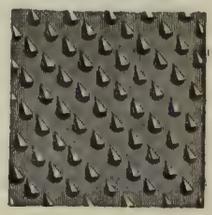
Used by Blacksmiths, Horse Shoers, Plumbers, Cabinet Makers, Wood Workers, Etc.



Horse Rasp.



Wood Rasp.



Cabinet Rasp.

Shoe Rasp.

GENERAL DESCRIPTION OF FILES AND RASPS.

Files and Rasps have Three Distinguishing Features.

First—Their Length—Which is always measured exclusive of their Tang.
Second—Their Kind or Name—Which has reference to the shape or style.
Third—Their Cut—Which has reference not only to character, but also to relative degrees of coarseness of Teeth.

The Length—Of a File is the distance between its Heel or part of the File where the Tang begins and the point or end opposite. The Tang or portion of the File prepared for the reception of the Handle is never included in the Length. In general, the Lengths of Files bear no fixed proportion to either their Width or Thickness, even though they be of the same kind.

The Kind—By Kind is meant the varied shapes or styles of Files which are distinguished by certain technical names, as, for instance, **Flat, Mill, Half-Round,** etc. The Kinds are divided, from the form of their Cross Sections into Three Geometrical Classes, namely, Quadrangular Sections, Circular Sections, and Triangular Sections; Odd and Irregular Forms are collected under Miscellaneous Classes. These Classes are in turn sub-divided according to their general outline, into Taper and Blunt.

Taper—Designates a file, the Point of which is more or less reduced in size, both in Width and Thickness by a gradually narrowing Section extending from One-half to Two-thirds the Length of the File, from the Point.

Blunt—Designates a File that preserves its Sectional Shape throughout, from Point to Tang.

The Cut of Files is divided, with reference to the character of the Teeth, into Single Cut, Double Cut and Rasp Cut, and with reference to the Coarseness of the Teeth into Rough, Coarse, Bastard, Second Cut, Smooth and Dead Smooth. Regarding the latter we may say very briefly that the Coarse and Bastard Cuts are used upon the coarser, heavier classes of work, while the Second Cut and Smooth are used for the finer grades and for finishing the work started by the Coarse and Bastard. The Rough and Dead Smooth are seldom called for, but correspond to the above use..

The Single Cut File—Is one in which a Single, Unbroken Course of Chisel Cuts is made across its Surface, arranged parallel to each other, but with a horizontal obliquity to the Central Line.

The Double Cut File—Has Two Courses of Chisel Cuts crossing each other, the Second Course, with rare exceptions, being finer than the first.

Rasp Cut—Differs from Single or Double Cut in the respect that the Teeth are disconnected from each other, each Tooth being made by a single pointed punch.

Safe Edge, or Side—Terms used to denote that a File has one or more of its Edges or Sides Smooth or Uncut, that it may be presented to the work without injury to that portion which does not require to be Filed.

Standard Price List of Files and Rasps.

List Adopted Nov. 1, 1899, by the File Manufacturers' Association of the United States.

List Per Dozen.

Swivel Base, Hardened Tool Steel Jaws, Japanned.

No.	675
Jaws, Inches	2½
Weight Each, Lbs.	9¼
Each	$4.45

One in a Box.

Stanley "Jersey" Vises are made especially for Jewelers and makers of small tools. They are strong and substantial. Only the best materials are employed in their construction, great care being taken to see that all parts fit accurately.

The **Screw** (body, head and collar) is turned from one piece of cold rolled steel, and has a square, lathe-cut thread. **The Jaws** are steel faced, hardened, and are ground to insure that they meet squarely when tightened. Both back and front jaws are filed to a fit.

Wt. Each, Lbs.	5½	9½
Each	$3.15	4.20

One in a Package.

Victor "Jersey" Vises, while not having quite as fine a finish as the Stanley lines are strong, serviceable tools, and have long been popular with both Mechanics and Amateurs. The Screw (body, head and collar) is in one piece, turned from cold rolled steel, and has a square, lathe-cut thread. The steel jaws are hardened, and all jaws are ground to insure that they meet squarely when tightened. Both back and front jaws are filed to a fit.

Vise Assortments.

Open Stock.

Nos. S29 to S13 Vises are operated in the same manner as an ordinary Screw Vise, or they can be instantly opened or closed the full length by a single movement of the hand without the use of the Screw, the Screw being used merely to give the grip after adjusting the Jaws to the work, thus combining a quick adjustment with all the advantages of the best Screw Vise.

By slightly raising the front jaw, the Screw and Nut are disengaged; the Jaw can be moved in or out as may be required to adjust it to its work, and on removing the hand, it instantly drops into place, the screw and nut again become engaged, and a single turn of the screw gives the required grip.

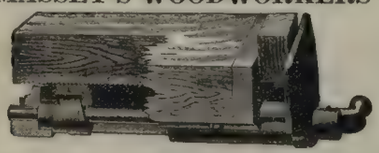
Wt. Each, Lbs.	40	50	78	118	150
Each	$15.60	18.65	22.25	34.65	44.50

The Nut of the Perfect Vise is instantly disengaged from the Screw by compressing the Trigger against the Screw Head. This allows an immediate adjustment to the work. By releasing the Trigger the Nut is forced into engagement with the Screw and a quarter turn of the handle fastens the work firmly between the Jaws.

The Nut and the Screw have an undercut thread and the greater the pressure on the Screw the more tightly they engage.

Open Stock.

MASSEY'S WOODWORKERS'



Lightning Grip, Quick Acting, Iron Frame and Jaws, Steel Rod with Milled Teeth. Each

No. M19—7 in. Wide Jaws, Opens 7 in., Weight Each 29 Lbs. ..... $ 7.15

BUFFALO AGRICULTURAL

No. 151.

With Half Hood. Each

No. 151—18 in. Diameter of Hearth, 8 in. Diameter Fan, Height to Top of Hearth 30 in., Weight Each 75 Lbs. **$8.35**

With Wind Shield. Each

No. 150—18 in. Diameter of Hearth, 8 in. Diameter Fan, Height to Top of Hearth 30 in., Weight Each 70 Lbs. **$9.50**

These forges are well constructed, with deep and strong hearth, and lever-operated steel fan. The support consists of four seamless steel tube legs, rigidly braced with an angle iron frame around the tips. The tuyere plate is so perforated as to give an even spread of blast.

No. 150.

No. 31.

With Half Hood. Each

No. 31—22 in. Diameter of Hearth, 12 in. Diameter of Fan, Height to Top of Hearth 30 in., Weight Each 115 Lbs., Complete with Climax Blower. **$24.30**

With Wind Shield. Each

No. 30—22 in. Diameter of Hearth, 12 in. Diameter of Fan, Height to Top of Hearth 30 in., Weight Each 110 Lbs., Complete with Climax Blower. **$27.00**

These Forges are equipped with the Buffalo Climax Blower, with full size 12 in. fan. The hearth is strong and sound, bowl-shaped casting, supported by four tube-steel legs rigidly braced. The tuyere plate is round and perforated to give an even spread of blast.

No. 30.

No. 54W.

With Half Hood. Each

No. 54—23x35 in. Hearth, 12 in. Diameter of Fan Case, Height to Top of Hearth 30 in., Weight Each 180 Lbs., Complete with 12 in. Climax Blower, **without Water Tank**..... **$36.00**

No. 54W—Same as No. 54, **with Water Tank**..... **39.60**

With Wind Shield. Each

No. 53—23x35 in. Hearth, 12 in. Diameter of Fan Case, Height to Top of Hearth 30 in., Weight Each 175 Lbs., Complete with 12 in. Climax Blower, **without Water Tank**..... **$34.20**

No. 53W—Same as No. 53, **with Water Tank**..... **37.80**

This Forge is offered as a low-priced machine designed to fill the needs of the farmer and mechanic who desires an up-to-date forge, fitted with crank-operated blower instead of the lever type, and having enclosed instead of open gears. This demand is met by the combination of the Climax Blower and a large cast iron fire pan with modern pot tuyere iron having revolving clinker-breaking valve and automatic ash gate.

No. 53W.

TIGER

No. 155.

With Half Hood and Crank Gear.

Each

No. 155—22 in. Diameter Hearth, 8¾ in. Blower, Height to Top of Hearth 30 in., Weight Each 90 Lbs. **$26.65**

This Forge has half hood for indoor use, and is well adapted for Farmers, Small Shops where an inexpensive Forge is desired.

With Wind Shield and Crank Gear.

Each

No. 154—22 in. Diameter Hearth, 8¾ in. Blower, Height to Top of Hearth 30 in., Weight Each 85 Lbs. **$24.50**

This is a very good outdoor Forge for use on Ranches, Farms, at Mines, Quarries, etc. where expensive equipment is not a necessity.

No. 154.

All Above, One in a Crate.

Portable Forges.

No. 0100—Same as No. 100, but **with Extra Water Tank,** Weight Each 325 Lbs. **58.30**

This Forge combines the Royal Blower, having cut gears and oil tight case with the Western Chief Standard Hearth, having solid fire pot with tuyere ball furnishing side and center blast.

For use of Large Blacksmith, Plow, Wagon, Railroad Shops, etc. where heavy work is done and a first class Forge is needed.

One in a Crate.

BUFFALO FORGE CO.'S

With Half Open Sheet Steel Hood. Each

No. 0—**Blacksmith's, without Water Tank,** 28x40 in. Hearth, 14 in. Diameter Fan, Height to Top of Hearth 32 in., Weight Each 300 Lbs. . . . **$40.00**

No. 01—Same as No. 0, but **with Water Tank,** Weight 320 Lbs. **43.20**

This Forge is especially adapted to the needs of the general blacksmith. Compared to the brick and bellows forge, its immense superiority was years ago demonstrated. It heats more quickly and with less labor. Its first cost is less, and in durability and reliability it far exceeds. In fact, this forge has long been known as the "Blacksmith's Old Reliable." The forge is guaranteed to produce a welding heat on 3 inch iron in five minutes, or on 4 inch iron in ten minutes.

One in a Crate.

BUFFALO FORGE CO.'S

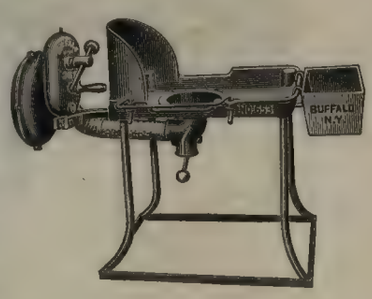
With Half Open Hood. Each

No. 651—**Horseshoer's, without Water Tank,** 23x30 in. Hearth, 12 in. Diameter Fan Case, 12 in. Buffalo No. 200 Silent Blower, Height to Top of Hearth 30 in., Weight Each 205 Lbs. **$36.00**

No. 0651—Same as No. 651, but **with Water Tank,** Weight Each 220 Lbs. **39.60**

No. 651.

A very popular, medium sized forge for indoor work. It is equipped with No. 200 Buffalo Silent Blower, and therefore furnishes a blast strong enough to suit most horseshoers and even some blacksmiths. The particular way of bracing the legs with angle steel insures a base of great strength. Uniform heat is assured, from the shallow fire for light work, to the deep fire for heavy. Has a round tuyere iron, with revolving clinker breaking valve, and hinged and balanced ash gate, which opens and closes by a touch of the foot.



No. 653.

With Wind Shield. Each

No. 653—**Contractor's, without Water Tank,** 23x30 in. Hearth, 12 in. Diameter Fan Case, 12 in. Buffalo No. 200 Silent Blower, Height to Top of Hearth 30 in., Weight Each 195 Lbs. **$33.30**

No. 0653—Same as No. 653, but **with Water Tank,** Weight Each 210 Lbs. **36.90**

A strong cast iron forge of great popularity for street railway and outdoor work generally. It is equipped with the **12 inch Buffalo 200 Silent Blower,** and therefore furnishes blast strong enough for heating the heaviest work. The particular way of bracing the legs with angle steel insures a base of great strength. Uniform heat is assured, from the shallow fire for light work, to the deep fire for heavy work. The forge has a round tuyere iron, with revolving, **clinker breaking valve, and hinged and balanced ash gate** which opens and closes by a touch of the foot.

Portable Forges.

BUFFALO FORGE CO.'S

With Half Open Hood.

Each

With Wind Shield.

Each

No. 3—Boiler Makers, 21x27 in. Hearth 10 in. Diameter of Fan, Height to Top of Hearth 31 in., Weight Each 155 Lbs. **$28.80**

With Wind Shield. Each

No. 5—Iron Workers', 18 in. Diameter Hearth, 8 in. Diameter Fan, Height to Top of Fire Pan 33 in., Weight Each 100 Lbs.....**$19.20**

No boiler shop is completely equipped without forges of this kind. They are suitable, also, for bridge and ship-builders, railroad contractors, and for general outdoor work. The deep fireplace peculiarly fits this forge for heating rivets, and its capacity is guaranteed sufficient to continuously supply from three to four gangs of riveters. These Forges have 4 handles under the hearth furnishing convenient means of lifting.

Suitable for all kinds of light indoor or outdoor work, and used extensively by die-sinkers, jewelers, tool-dressers, locksmiths, and by structural iron workers for rivet-heating. The legs are of seamless tube steel, fitted with deep sockets in the hearth and rigidly cross-braced. The hearth consists of a round, substantially ribbed and reinforced casting with tuyere plate. The fan is of steel and is belted to large pulley and operated by the easy lever motion. The gears are accurately fitted and noiseless in operation.

BUFFALO FORGE CO.'S

With Closed Hood.

Each

No. 9—Tinsmiths', 15 in. Diameter Hearth, 6 in. Diameter of Fan, Height to Top of Bowl 15 in., Weight Each 43 Lbs.....**$16.00**

These Forges are adapted for light work and can be conveniently placed on a bench or other support. Operated by turning crank.

BUFFALO FORGE CO.'S

With Wind Shield.

Each

No. 625—Riveters', 18 in. Diameter Hearth, 12 in. Diameter Fan Case, Height Over All 44 in., Weight Each 110 Lbs., Equipped with No. 200 Buffalo Silent Blower **$30.00**

The fire pan is made of heavy, rolled steel plate, strongly riveted. The windshield and blower are detachable and can be packed in the fire pan for transportation. A heavy, round tuyere plate distributes the blast so as to insure the best results in heating.

ROYAL

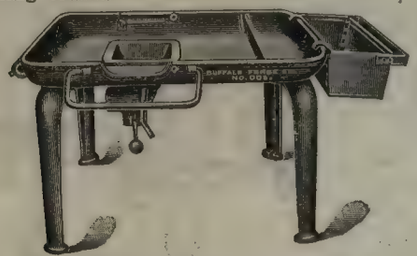
With Wind Shield.

Each

No. 76—Riveters', 18 in. Diameter Hearth, 9 in. Blower, Height to Top of Hearth 30 in., Weight Each 85 Lbs...**$30.00**

This Forge is for Riveters, Boilermakers, Mines, Quarries, etc. The crank turns forward or backward. Has a capacity to heat 3½ in. iron.

Stationary Forges.



Each

No. 00S—38x42 in. Hearth, Height to Top of Hearth 27 in., Depth of Hearth 3½ in., Water Tank 28x9x6½ in., 3 in. Blast Connection, Weight Each 350 Lbs.....**$40.00**

This Forge is substantially built of cast iron. The coal box forms an integral part of the fire pan. The water tank, fitted with a tool rack, is detachable for convenience in emptying.

The fire pan is 3 inches in depth and has a gate on each side, which when opened lowers the side 1¾ inches.

The blast is delivered through a 3 inch pipe and is closely controlled by a blast gate, operated by means of a lever on left side of forge, within easy reach of the operator.

It is fitted with the "Buffalo R. R. Deep Fire, Side and Center Blast, Anti-Clinker Dumping Tuyere", with ash gate which is so hinged and counter-balanced that it opens and closes by a touch of the foot.

Each

No. 0S—26¾x38 in. Hearth, Height to Top of Hearth 33 in., Blast Connection 3 in., Weight Each 150 Lbs. **$22.25**

This Forge although light in appearance are very strong. The fire pan is of cast iron, and the legs of wrought iron, rigidly fastened to the fire pan. They are much cheaper and much handsomer than the Brick Forge and can be easily moved when desired.

Blacksmith Hand Blowers.

BUFFALO FORGE CO.'S

Dust and Leak Proof Gear Case.

All End Thrust Balanced on Adjustable Ball Bearings. Fan Shaft Runs in the Finest Radial Ball Bearings. High-Speed Pinion Runs in Bath of Oil, Lubricating All Other Working Parts by Splashing. One-Piece Gear Case Insures Permanent Alignment of Gears. Extra Long Journal Bearings. Each

No. 214P.

No. 212P—12 in. Diameter of Fan Case, 2½ in. Blast Pressure at 2200 Revolutions Per Minute, with Vulcan Tuyere and Pipe, Weight Each 193 Lbs. $33.30

No. 214P—14 in. Diameter of Fan Case, 3 in. Blast Pressure at 2200 Revolutions Per Minute, with Vulcan Tuyere and Pipe, Weight Each 195 Lbs. 39.60

CLIMAX PEDESTAL

Machine Cut Gears, Consisting of Two Gear Wheels and Two Helical Gear Wheels properly proportioned to Produce Several Thousand Revolutions Per Minute of the Fan with Crank Turned at Moderate Speed, Fan Case and Gear Fitted Together, Pear Shape Fan Case, Allowing Crank to be Turned Forward or Backward with Equally Good Results. High Speed Fan Pinion Runs in a Bath of Oil, Lubricating All Other Working Parts by Splashing. Each

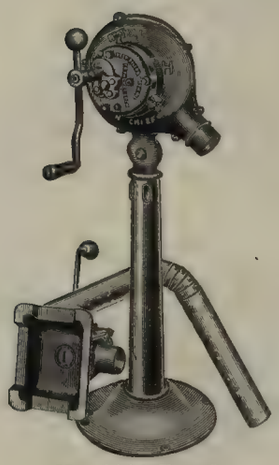
Climax—12 in. Diameter Fan, Complete with Tuyere and Pipe, Weight Each 130 Lbs. $22.25

Climax.

ROYAL WESTERN CHIEF

Oil Tight and Dust-Proof Gear Case.

Gears Run in a Continuous Bath of Oil, Crank Turns Forward or Backward. Noiseless and Easy to Operate. The Gears are Flat and Straight Cut, Made of Special Materials. No spiral or Worm Gears. Gives a Powerful Blast, Lasting after Blast. Each



No. 1000 Royal.

No. 1000—12 in. Diameter Fan, 47 in. High, Complete Tuyere Iron and Piping, Size of Fire Pot 8x9½x4 in., Weight Each 135 Lbs. $32.25
One in a Crate.

CHAMPION

Adjustable Ball Bearings, High Speed Spiral Gearing, with Phosphor Bronze Spiral Gear and Tool Steel Spiral Shaft, Crank Turns Either Way to Make a Blast, Each Turn of Crank Produces 46 Complete Revolutions of Blast Wheel. Each

No. 400—12 in. Diameter Fan, Complete with Champion Whirlwind Blast, Anti-Clinker Heavy Nest Tuyere Iron and Piping, Weight Complete 155 Lbs. $37.00

The Champion No. 400 Blower is made for Right and Left Hand Fires. Right Hand Blowers always furnished unless otherwise ordered.

No. 400 Champion.

Tuyere Irons.

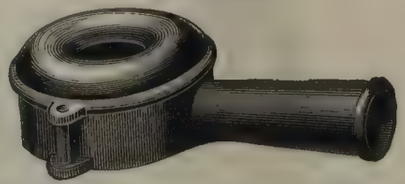
Plain Cast Iron, Bolted Both Sides, Opened by Unfastening Bolts. Each

No. 0—7¼ in. Diameter of Head, 1¾ in. Blast Connection, 13¾ in. Long Over All, Weight Each About 12 Lbs. . $1.12

Open Stock.

DUCK'S NEST

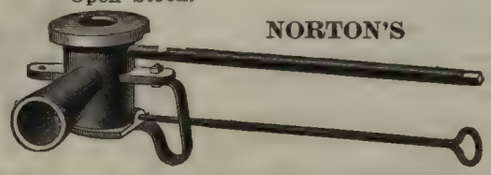


Plain Cast Iron, Bolted Both Sides, Opened by Unfastening Bolts. Each

No. 01—7½ in. Diameter of Head, 2¼ in. Blast Connection, 14 in. Long Over All, Weight Each About 16 Lbs. . $1.35

Open Stock.

NORTON'S

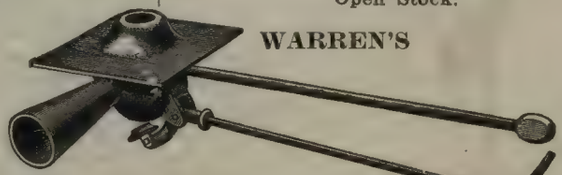


Cast Iron Head and Neck, Wrought Iron Rod. Each

No. 30—6½ in. Diameter of Cap, 8 in. Long Neck, 21 in. Rod, 2¼ in. Top Hole, 2¾ in. Blast Connection, Weight Each About 27 Lbs. $2.90

To regulate the Blast, turn the large rod. The cinders and ashes may be removed by drawing out the small rod which opens the slide. The levers and springs are readily changed to either side for right or left hand use.

WARREN'S



Cast Iron Head and Neck, Wrought Iron Rod. Each

No. 20—10x10 in. Cap, 7 in. Long Neck, 22 in. Long Rod, 1¾ in. Top Hole, 2½ in. Blast Connection, Weight Each About 31 Lbs. $3.10

The Blast is regulated by simply revolving the ball, which has three unequal sides. Open the bottom valve, and all cinders and ashes drop out.

Bench Drills.

YANKEE

No. 1003.

Automatic and Friction Feeds, Cylindrical Column, Adjustable Bracket for Table, Adjustable Removable Table and Bracket, Dead Black Color Frame. Each

No. 1003—One Speed Only (Geared 49 to 14), One Turn of Crank Gives 3½ Revolutions to Spindle, Cut Gears, ⅜ in. Steel Spindle, Three-Jaw Polished and Nickel Plated Tool Steel Chuck, 1¾ in. Long, 1 in. Diameter, Holds Round Shank Drills up to ¼ in. Diameter Inclusive, 1½ in. Traverse of Spindle (Automatic Feed), Ball Bearing V Thread Feed Screw, Hardened Steel Wearing Parts....**$12.80**

Weight Each Boxed About 20 Pounds.

The crank is 4 in. between centers. The bracket at base of column has a vertical adjustment of 2¾ in., the slide being 5¾ in., and bracket 3 in. long. The table on bracket has an independent movement of 1¼ in. by means of a 3 in. Hand Wheel and Screw, and can be used for feeding in emergencies, in addition to automatic feed. The table is 4¾ in. diameter, its center 2½ in. from face of slide. The lower end of bracket slide on column is 4¼ in. below base resting on bench; from bench the top of column is 11½ in. and from there to top of guide 3 in. Total height of Drill above bench is 14½ in., below 4¼ in., making extreme height of Drill 18¾ in. The distance from end of base on bench to front of table is 9¾ in. with table bracket flush with end of column, table all way down and spindle up, the distance between table and end of chuck is 5 in., a quite large capacity for a Drill of this kind. A steel wrench is furnished for nut holding table bracket and to tighten clamp screw for bench.

No. 1005.

Each

No. 1005—Two Speed, Quickly Changed by Moving Shifter on Spindle, Geared on Fast Speed 64 to 18, One Revolution of Crank Gives 3½ to Spindle, On Slow Speed 14 to 14, One Revolution of Crank Gives One to Spindle, Cut Gears, $\frac{5}{16}$ in. Diameter Spindle, Three-Jaw Polished and Nickel Plated Tool Steel Chuck, 2¾ in. Long, $1\frac{11}{16}$ in. Diameter, Holds Round Shank Drills up to ½ in. Diameter Inclusive, 2 in. Traverse of Spindle (Automatic Feed), Square Thread, Steel Feed Screw, Hardened Steel Wearing Parts.....**$21.10**

Weight Each Boxed About 57 Pounds.

The crank is 6 in. between centers. The bracket at base of column has a vertical adjustment of 5 in., the slide being 9¼ in. and bracket 4¼ in. long. The table on bracket has an independent movement of 1¾ in. by means of a 4½ in. Hand Wheel and Screw, and can be used for feeding in emergencies, in addition to automatic feed. The table is 6¾ in. diameter, its center 3½ in. from fall of slide. The lower end of bracket slide on column is 6 in. below base resting on bench; from bench the top of column is 18 in., and from there to top of guide is 4 in. Total height of drill above bench is 22 in., below 6 in., making extreme height of drill 28 in. The distance from end of base on bench to front of table is 13½ in. With table bracket flush with end of column, table all the way down and spindle up, the distance between table and end of chuck is 7½ in., quite a large capacity for a drill of this kind.

A steel wrench is furnished for nut holding table bracket and to tighten clamp screw for bench.

YANKEE VISES

For Use with Above Yankee Bench Drills or Separately Attached to Bench.

Cast Iron body and jaws accurately machined to hold work square when used either flat or on sides. Sliding Jaw has T shaped block screwed to its underside, sliding in a T shaped slot $\frac{5}{16}$ in. wide, insuring parallel movement of jaw. Case hardened steel removable swivel jaw is provided to hold taper hook, has friction spring to hold jaw in position, ½ in. diameter adjusting screw, ¾ in. head. Each

No. 990—6 in. Long, 2⅜ in. Wide Base, Extreme Height 2 in., Jaws Open without Swivel Jaw 3 in., with Swivel Jaw 2⅝ in., Depth of Jaw 1⅜ in., Weight Each About 3¾ Lbs. **$2.25**

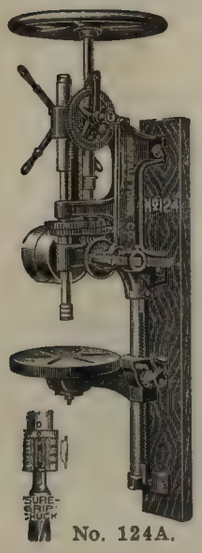
BUFFALO CAPSTAN LEVER, BALL BEARING



No. 124A.

Multi-Compound Lever Feed, Machine Cut Gears, Two Speeds of Spindle, Sure Grip Chuck, Automatic Feed Adjustable to Four Speeds, Quick Return of Spindle, Raise and Lower Table Device, Wheel Holder and Gear Guard Free with Each Drill, Bores up to 1½ in. Hole, Drills to Center of 24 in. Circle, 7½ in. Run of Feed, 20 in. Run of Table, Height 72 in., **Spindle Bored for ½ in. Round Shank Drills.**

	Each
No. 124 —Without Pulley, for Hand Power Only, Weight Each About 370 Lbs.	**$62.70**
No. 124A—With Hand and 8x3 in. Pulley Power Attachment, Weight Each About 390 Lbs.	**68.00**

Multi-Compound Lever Feed. A 1 in. hole can be drilled with this lever. This exclusive "Buffalo" feature is obtained by the strong and simple **rack on feed head,** operated by the four-arm lever. By maintaining a light pressure on the latter, the bit is forced through the metal with maximum speed, **resulting in a great saving of time. It not only gives a leverage never exceeded in any other blacksmith drill, but is also greatly superior in strength and durability.**

Sliding Collars—One Sliding Collar is arranged at feed head for changing from lever to automatic feed or back. The other is at lower end of flywheel shaft, for change from slow to fast speed, or back. **Either change is made in a second—the collar will slide regardless of position of key, and seat itself automatically.** In no other drill will this convenient feature be found.

The Planetary Gears on the automatic feed is the most modern reduction gearing known—stronger and simpler in every way than the customary worm or screw.

No. 152S.

BUFFALO BALL BEARING DRILLS

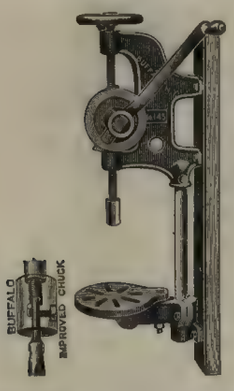
Steel Shaft and Spindle, Accurately Machined and Polished, Strongly Ribbed Frame, Adjustable Round Slotted Table (Adjustable Sideway or Up and Down), Automatic Feed, Adjustable to Three Speeds, One Speed of Spindle, Buffalo Sure Grip Chuck, Bores up to 1¼ in. Hole, Drills to Center of 14 in. Circle, 3 in. Run of Feed, 12 in. Run of Table, Height 38 in., **Chuck Bored for ½ in. Round Shank Drills.**

	Each
No. 152S —Without Pulleys, for Hand Power Only, Weight Each About 80 Lbs.	**$14.50**
No. 152SA—With Hand and 6 in. Pulley Power Attachment, Weight Each About 95 Lbs.	**18.50**

Shafts, spindles and gears are accurately fitted and all bearings are bored and reamed in the solid metal of the frame, insuring a drill unsurpassed in easy, smooth operation, without lost motion.

One in a Crate.

BUFFALO BALL BEARING, WITH SET SCREW ON CHUCK COUNTERSUNK



Hand Feed, Extension Crank, Adjustable Slotted Table (Adjustable Sideways and Up and Down), Strong Well-Ribbed Frame, Polished Steel Shaft and Spindle, Bores up to ¾ in. Hand and Automatic Feed, the Latter Adjustable to Three Speeds, One Speed of Spindle, Extension Crank, Well-Ribbed Frame, Turned and Polished Steel Shaft and Spindle, Adjustable Slotted Table (Adjustable Sideways, Up and Down), Bores up to 1 in. Hole, Drills to Center of 14 in. Circle, 1 in. Diameter of Spindle, 3 in. Run of Feed, 12 in. Run of Table, Height 41 in., **Buffalo Improved Chuck Bored for ½ in. Round Shank Drills.**

	Each
No. 147—With Fly Wheel	**$12.00**

Weight Each About 75 Pounds.
One in a Crate.

These Drills are fitted with the **"Buffalo Improved" Chuck,** in which the flat of the bit rests directly against a **cross-pin,** absolutely preventing slipping. Thus there is **no stress on the set-screw,** which only serves to prevent bit from falling out.

No bent or broken set-screw with this arrangement, and nothing to catch your clothing, as chuck is **countersunk for set-screw head.**

Post Drills.

SILVER'S

Bench Punches.

NEW BADGER

5 in. Throat Depth, Cast Iron Body. Each

No. 7—3/16, 1/4 and 5/16 in. Punches and Dies, Extreme Capacity 5/16 in. Hole in 1/4 in. Iron, Complete with Lever Bar **$42.25**

Weight Each About 150 Pounds.

The New Badger No. 7 has three punches each working independent of the others. Three sizes always ready for use, so constructed that by inserting the sliding key in the different keyholes in front of the machine any one punch can be operated independent of the others, and by inserting keys in all three holes, all the punches could be operated at the same time. The Lever Socket on this machine works both ways either to the front or to the rear. Each Machine is furnished with a stripping attachment, adjustable Gauge to regulate distance of holes from the edge of the Sheets and Lever Bar.

Open Stock

4 in. Throat Depth, Cast Iron Body. Each

No. 11—Punches 1/4 in. Hole Through 1/4 in. Iron Plate, Complete with Lever Bar..... **$26.65**

Weight Each About 100 Pounds.

The lever socket on this machine works both ways, either to the front or to the rear, so that the operator may work the machine from the rear in punching long or wide sheets.

The punch has a very powerful leverage and will easily punch a 1/4 in. hole through a 1/4 in. iron plate without exertion on the part of the operator.

Each machine is provided with a stripping attachment, one punch and die, and also improved adjustable gauge to regulate the distance of the holes from the edge of the sheets.

Open Stock.

Splitting Shears.

NEW BADGER

Cast Iron Body, Steel Knives.

Each.

No. 3—Shears 1/8 in. Sheet Metal of Any Length or Width, Cuts Any Size Round Iron Bars up to and Including 1/2 in. in Diameter..... **$29.00**

Weight Each About 100 Pounds.

This splitting shear is one of the handiest machines of its kind on the market. It has a very powerful leverage and consequently will easily do the capacity of work for which they are intended, without exertion on the part of the operator.

Durable, and especially adapted to cutting sheets of any length and width, as well as bars. Each machine is fitted with adjustable gauges for sheet and rod cutting. The knives on the machine are adjustable and may be easily and quickly removed and sharpened when necessary.

Open Stock.

CANEDY-OTTO

Cast Iron Body.

Each

No. 1—Cutting Capacity 3/4 in. Round Bar and 3/8 x 3 in. Flat Bar **$17.80**

Weight Each About 100 Pounds.

The best of material and workmanship used throughout this shear. Each cutting attachment works independent of the other, thereby making an easier operated and more accurate machine.

Open Stock.

Bar Iron and Soft Steel Cutter.

Each

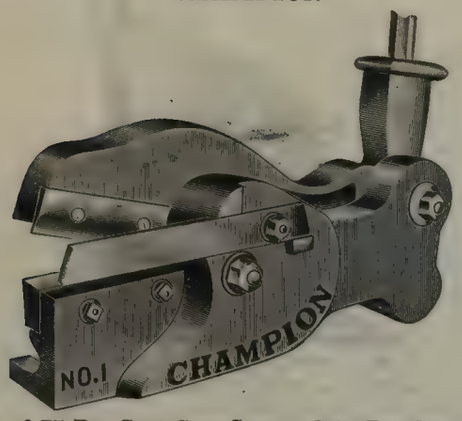
Kidd—Cuts 1 1/2 x 3/8 in. Flat and 5/8 in. and Smaller Round Iron or Soft Steel, Length 17 in., 48 in. Handle..... **$29.00**

Weight Each About 75 Pounds.

The knives are adjustable to wear and are easily and quickly removed for sharpening. Handle is also removable by simply withdrawing from socket.

Blacksmith Shears.

CHAMPION



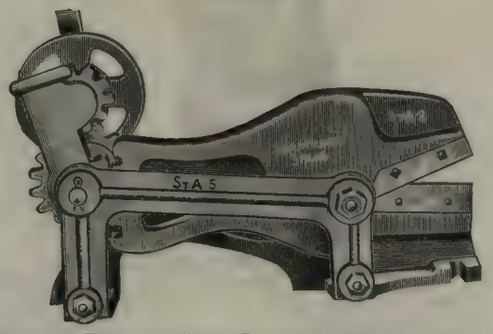
Made of 75 Per Cent Gray Iron and 25 Per Cent Steel.

Each

No. 1—Champion, Cuts ¾ in. Round Iron and 3x⅜ in. Flat Iron, 7 in. Knife, **Complete with Lever** **$20.00**

Weight Each About 155 Pounds.

ST. ANTHONY



Made of 75 Per cent Gray Iron and 25 Per Cent Steel.

Each

No. 5—St. Anthony, Cuts 1 in. Round and 2x¾ in. Flat Bars, 7 in. Knife, **Complete with Lever** **$39.00**

Weight Each About 350 Pounds.

The St. Anthony Shear is a triple leverage or back geared machine. By using the back gear it will cut 1¼ in. round or 1x3 in. flat iron. By using the back gear and applying 100 pounds on the handle it will exert a force of 30 tons on the blades. It has the largest capacity and is the strongest, handiest and most perfect working machine built for hand power machine.

U. S.

Made of 75 Per Cent Gray Iron and 25 Per Cent Steel.

Each

No. 9—U. S., Cuts 4x¾ in. Flat Bars and 1⅛ in. Round Bars, 7 in. Knife, **Complete with Lever** . **$51.10**

Weight Each About 500 Pounds.

Specially adapted for heavy work.

Open Stock.

CANEDY-OTTO

Each

No. 6—Canedy-Otto, Cuts 4x¾ in. Flat Bars and ¾ in. Round Mild Steel and Iron, 7 in. Steel Knife, **Complete with Lever** **51.10**

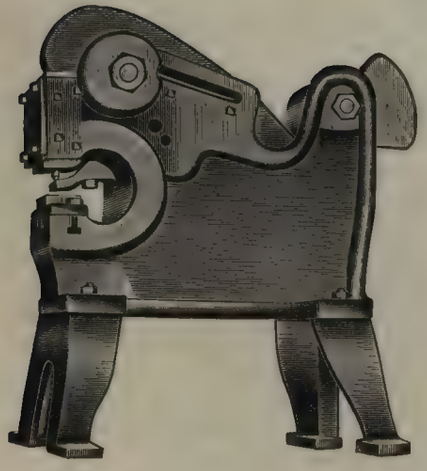
Weight Each About 450 Pounds.

The lever works toward the front, allowing the operator to stand directly in front of his knives. The bearings are smoothly drilled and reamed. Shafts are smoothly turned and polished. The knives are extra heavy and adjustable. They are made of steel, machined and properly tempered.

Open Stock.

Combined Punches and Shears.

BADGER



One Piece Cast Iron Body, Steel Pins and King Bolts, Square Mandrel to Avoid Turning and Spoiling Dies when Square or Irregular Shaped Punches are Used. In Punching the Lever Works Toward the Front and in Cutting Towards the Back of Machine.

Each

No. 33—Will Cut ½x2½ in., or ⅜x3 in. Flat Iron, or ⅞ in. Round Iron and Punch a ⅜ in. Hole in ⅜ in. Iron or their Equivalents; Furnished with 3 Sets of Dies and Punches, ¼, ⅜ and ⅜ in., and Lever, Weight Each About 325 Lbs..... **$ 61.15**

No. 66—Will Cut ½x4 in., or ⅝x3 in. Flat Iron, or 1 in. Round Iron and Punch a ½ in. Hole in ½ in. Iron or their Equivalents; Furnished with 3 Sets of Dies and Punches, ¼, ⅜ and ½ in., and Lever, Weight Each About 675 Lbs..... **106.60**

Each machine is furnished with all necessary knives or shear blades for shearing both flat and round bars, 3 sets of dies and punches, lever bar, stripping attachment and adjustable gauge for regulating distance of holes from the edge of sheet.

One Set in a Box.

EVERGREEN Screw Plates.

Style A, V Thread Over Size.

With Elastic Stock and Interchangeable Double Die, (See Illustration.)

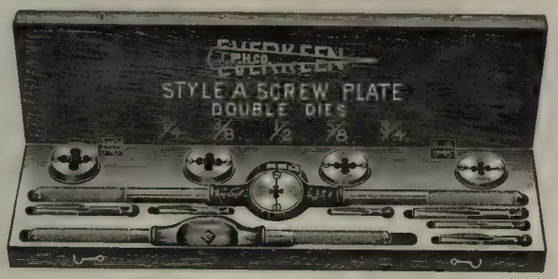
Simple to adjust. It is all accomplished with one screw while the Die is in the stock ready for use. See cut. By turning the taper head screw on the left in or out, the Die may be quickly and positively adjusted for a tight or loose fit as desired.

The principle of the Die will be understood from the cut and explanation below.

The half of the Die in front is drawn in phantom to show the mechanism. The cup-headed screw on the right holds the halves firmly together, acting as a hinge while the size is regulated by the wedge shape (taper-headed) screw in the left, the whole being clamped rigidly in the elastic stock.

The Dies are made double so they will cut from either face. To cut close to a shoulder or to thread a very short piece, use the upper face of the Die without starting thread with the guide side.

Cut shows Die filed and chamfered to cut from both faces.



No. E2029—5 Sizes, Taps, Dies and Guides, with 18 in. Stock and 11 in. Adjustable Tap Wrench, Weight Per Set 20 Lbs. ..... Each **$15.10**

EVERGREEN Screw Plates.

Style B, V Thread Over Size.

With Elastic Stock and Interchangeable Double Dies.

Cut Shows Die and Collet.

The Screw Guide below forces the beveled edges of Die snugly against the beveled surfaces of the Collet. The surfaces being exactly alike, a combined screw and taper fit is effected, the most positive and rigid fit known in mechanics, and one which constantly corrects itself and compensates for wear. Adjustment of cutting size is accomplished by turning the screws back of the Die halves in or out for tight or loose fits of bolts and nuts. The zero marks on the tops of the Die and Collet make it possible to adjust each half perfectly in relation to the center.

The Dies are made double, so that they will cut from either face. To cut close to a shoulder or to thread a very short piece, use the upper face of the Die without starting thread with the guide side.

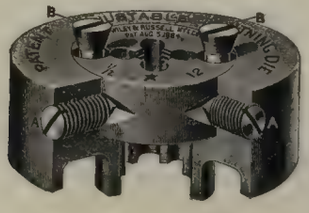
When Ordering Green River Dies, State Outside Diameter of Same.

Lightning Dies.



The Taper-Headed Screws, B B, regulate the size. Two Binding Screws, not shown in cut, are placed opposite the two shown, A A.

In adjusting the Die, the Binding Screws, A A, are first slackened, and the size required fixed by moving the Taper-Headed Screws, B B, in or out; after which the Binding Screws, A A, are set very tight the last thing.

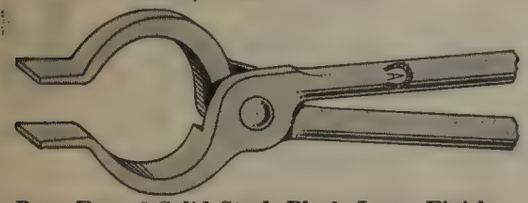
Ap. Wt. Dozen, Lbs.	32	32	34	34	37
Per Dozen	$10.90	10.90	11.80	11.80	13.55

Nos.	12F	12G	12H	12I
Length, Inches	22	24	24	24
To Hold Round Bolts, In.	¾	⅞	1	1¼
Ap. Wt. Dozen, Lbs.	37	39	39	39
Per Dozen	$13.55	15.60	15.60	15.60

These are used for holding Bolts or other Round Work. The opening between the Jaws and the Hinge allows ample space for the Head of Bolt.

Open Stock.

GAD, FLAT JAWS



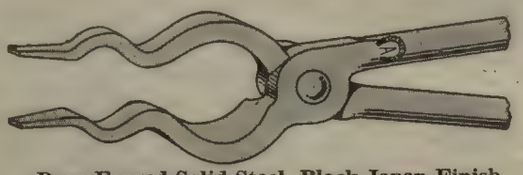
Drop Forged Solid Steel, Black Japan Finish.

Nos.	20	21
Length, Inches	20	24
Approx. Weight Per Dozen, Lbs.	33	38
Per Dozen	$11.80	15.60

For general forging purposes.

Open Stock.

DOUBLE PICK UP



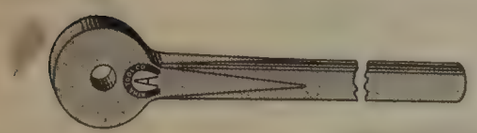
Drop Forged Solid Steel, Black Japan Finish.

No.	25
Length, Inches	22
Approx. Weight Per Dozen, Lbs.	36
Per Dozen	$16.50

Used for picking up hot work either flat or round.

Open Stock.

Blacksmith Heading Tools.



Drop Forged Steel, Black Japan Finish.

Diam. of Hole, Inches	⅜	7/16	½	⅝	¾
Length, Inches	15	15	15	15	18½
Weight Each, Lbs.	3	3	3	3	4½
Each	$1.25	1.25	1.25	1.55	1.55

Used for holding Bolts while forming the Head.

Open Stock.

Tire Measuring Wheels.

GREEN RIVER

Drop Forged Wheel, Raised Figures and Lines, with Polished Steel Index Hand, Japanned.

	Each
No. 1—24 in. in Circumference, Weight Each 1½ Lbs.	$2.65

The Index Hand saves trouble of marking with chalk and the whole made of metal is light, accurately fitted, handy and strong.

Three in a Box.

Paint Mills.

Nos. 4 and 3.

Cast Iron Hopper and Frame, Malleable Iron Crank.

	Each
No. 4—5 in. Diameter of Grinders, 4 in. Deep, Hopper Capacity 1 Quart, Weight Each 15 Lbs.	$ 8.45
No. 3—6 in. Diameter of Grinders, 5 in. Deep Hopper, Capacity ½ Gallon, Weight Each 22 Lbs.	11.65
No. 2—7¼ in. Diameter of Grinders, 6 in. Deep Hopper, Capacity 1 Gallon, Weight Each 40 Lbs.	14.45

One in a Crate.

One-half Dozen in a Bundle, Blades Burlapped.

NORCROSS

5 Forged Steel Blades.

Per Dozen

No. 8—Spring Steel Prongs, Malleable Detachable Socket, Malleable Frame and Clamping Bar, 4 ft. White Ash Handle.**$12.80**

The Prongs are adjustable for rows of any width. Loosening two Nuts releases any prong without disturbing the others. Works between rows or center prong can be removed and rows straddled. A perfect Weeder and Pulverizer, giving level cultivation. Removing center prong and reversing other four makes Potato Digger. By disconnecting malleable socket Cultivator may be attached to a Wheel Plow.

Weight Per Dozen About 44 Pounds.

One-half Dozen in a Bundle, Crated.

GARDENERS' FRIEND

Used as a Drill. Used for General Cultivating. Shield used in place of Center Plow.

Three Solid Cast Steel Blades.

Per Dozen

Weight Per Dozen About 45 Pounds.

One Dozen in a Bundle.

Garden Cultivators.

MOORE EASY

Reversible, Steel Frame and Wheels.

	Each
No. 30—23 in. Wheels, **without Rake,** Weight Each 25 Lbs.	**$5.60**
No. 40—23 in. Wheels, **Complete with Rake,** Weight Each 28 Lbs.	**6.70**

The Moore's Easy Cultivator is made of steel and iron. Has attachment to work garden crops from the time plants are out of the ground until the crop is ready to harvest. Handles attach direct to axle so that all pressure or power is fully utilized. They can be adjusted to any height person without a wrench.

Plow is large and adapted to plowing ground for small gardens, furrowing for planting and hilling.

Rake will fit plowed ground for planting, break surface crust and destroy small weeds.

Sweep takes the place of a hand hoe and is perfect tool for work in onion and other small garden crops.

Cultivator has bolted to Standard three large Reversible Steel Blades, which will scour in any soil. Center tooth can be removed and the two outside teeth can be used for covering seed.

MOORE JR.

Reversible, Steel Frame and Wheels.

	Each
No. 10—18 in. Wheels, **without Weeder,** Weight Each 20 Lbs.	**$4.80**
No. 20—18 in. Wheels, **Complete with Weeder,** Weight Each 23 Lbs.	**5.80**

The Moore's Jr. Gardener is made with an 18 in. Steel Wheel with 1¼ in. wide Tire. The Frame is steel and will not bend or break. The Blades are reversible and will last for years. Combinations can be made to do all work necessary from the time seed is planted until the crop is ready to harvest. The combinations are as follows:

Plow, Marker or Hiller on Reverse Side and Weeder, Hand Hoe and Cultivator on the other side.

Garden Drill Attachment.

MOORE SEED

Without Handles.

	Each
Seed Drill—To be Attached to "Moore's Easy" Cultivators	**$8.90**

This Seeder will sow accurately and under all conditions. It is simple and easy to operate. To use this drill no skill or experience is needed. **Must be used with Moore Easy Garden Cultivators.**

NEW GEM

Steel and Malleable Iron, Nicely Finished.

	Each
No. 50—Without Rake, Weight Each 18 Lbs.	**$4.10**
No. 60—With Rake, Weight Each 19 Lbs.	**4.50**

The Moore's New Gem is a combined Cultivator and Plow. The Plow has a large well formed mold-board and good wide landslide. This is a great advantage over Plows that have no landslide; it makes it possible to turn a furrow in hard ground, or where there is resistance without the Plow sliding out of the ground. Handles are adjustable and attached to Frame in such a manner as to bring the pressure or power against the axle of the wheel, which is the secret of easy running.

STAR

Steel Wheel and Frame.

	Each
Star—24 in. Wheel, Selected Hardwood Handle, Complete with Rake, Weeder, Moldboard, Blade and Bull Tongue, Weight Each 20 Lbs.	**$4.25**

The shape of the Beam and its attachment to the wheel and handles, over and forward of the center of the wheel, gives tenfold greater power.

Sugar Beet Tools.

SUGAR BEET SCOOP FORKS

Strapped Ferrule, Scoop Shape.

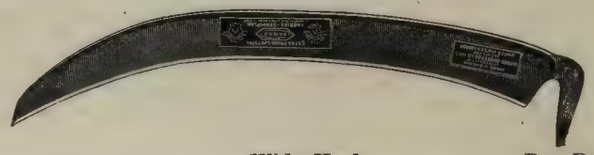
Grass Scythes.

EVERKEEN

Wide Heel. Per Dozen

EVERKEEN—Ribbed Razor Blade, Sharpened, Finished in Black **$16.65**
The EVERKEEN Scythe is made of the Best Quality of Steel. The Rib that runs from end to end increases its strength without adding any weight, also overcomes the trembling which is felt in mowing heavy grass with cheap plain scythes.
Assorted Lengths, 28 to 30, 30 to 32, 32 to 34, 32 to 36 in.
Weight Per Dozen About 38 Pounds.
One Dozen in a Box.

SWEDISH



Wide Heel. Per Dozen

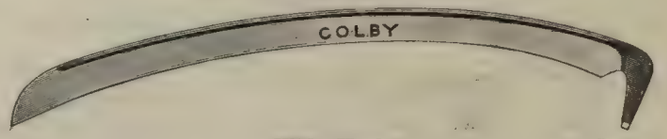
Swedish—Best Quality Forged Steel, Reinforced Back, Sharpened, Finished in Black.....**$15.60**
Swedish Scythes are made of the finest hard steel, protected on both sides by softer steel to prevent breaking, thus care must be used when sharpening not to remove too much of the protecting soft steel.
Assorted Lengths 28 to 30, 30 to 32, 32 to 34 in.
Weight Per Dozen About 32 Pounds.
One Dozen in a Box.

LITTLE GIANT

Wide Heel. Per Dozen

Little Giant—Best Crucible Steel, Charcoal Tempered, Finished in Black, Sharpened.....**$16.65**
Assorted Lengths, 28 to 30, 30 to 32, 32 to 34, 32 to 36, 34 to 36 in.
Weight Per Dozen About 38 Pounds.
One Dozen in a Box.

COLBY



Wide Heel. Per Dozen

Colby—Razor Blade, Full Mirror Polished Web and Back, Sharpened **$17.25**
Assorted Lengths, 28 to 30, 30 to 32, 32 to 34, 32 to 36, 34 to 36 in.
Weight Per Dozen About 33 Pounds.
One Dozen in a Box.

BLACK GEM

Sharpened. Per Dozen

Black Gem—Hand Hammered, Oil Tempered, Charcoal Hardened, Finished in Black.....**$15.00**

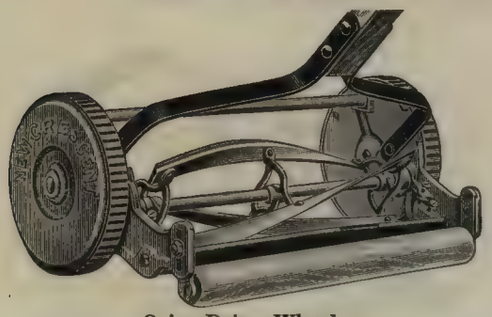
Lawn Mowers.

NEW CRESCENT

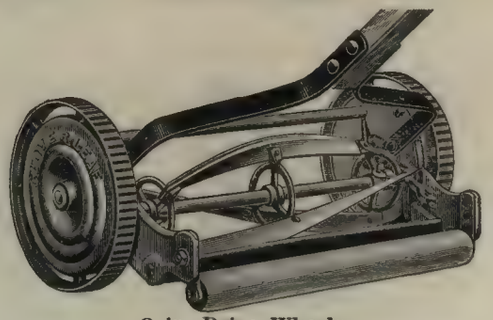


8 in. Drive Wheels.

Open Cylinder, Three Blade Steel Knives, Carefully Tempered, Steel Reel Shaft, Adjustable Brass Bushings, Wheels Painted Green with Bronze Stripe, Knives and Reel Painted Red, Handle Braces Gold Bronzed.

Width of Cut, Inches.....	12	14	16
Weight Each, Boxed, Lbs....	40	43	45
Each	$4.80	4.80	4.80

CLOVER LEAF

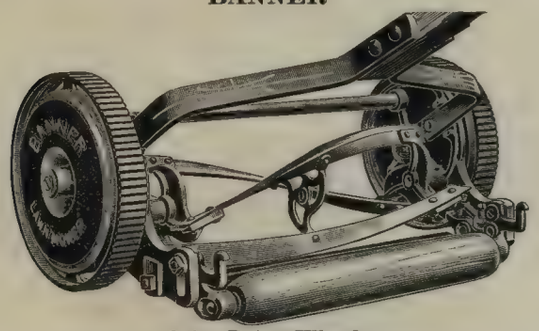


8 in. Drive Wheels.

Open Cylinder, Three High Grade Blade Steel Knives, Carefully Tempered and Spirally Formed, 5½ in. Diameter Machinery Steel Reel Shaft, Adjustable Brass Bushings, Wheels and Handle Brace Gold Bronzed, Knives and Reel Silver Bronzed.

Width of Cut, Inches.....	12	14	16
Weight Each, Boxed, Lbs....	40	43	45
Each	$4.80	5.00	5.25

BANNER



8 in. Drive Wheels.

Open Cylinder, Three Extra Quality Steel Knives, Hardened and Tempered in Oil, Self-Sharpening, Steel Reel Shaft, Wheels Painted Red, Reel Shaft and Handle Brace Painted Green with Gold Bronze Stripes, Knives and Brace Gold Bronzed.

Width of Cut, Inches.....	14	16	18
Weight Each, Boxed, Lbs....	40	43	45
Each	$5.35	5.80	6.25

CUTWELL, HIGH WHEEL

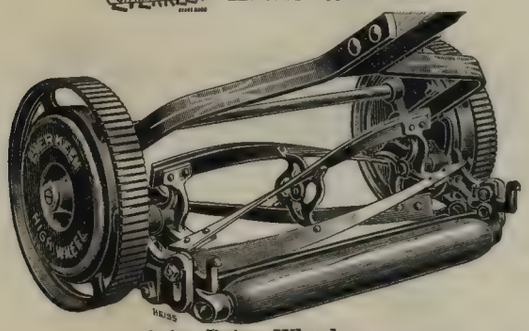
9 in. Drive Wheels.

Open Cylinder, Four Hardened Steel Knives, Hardened Steel Lock Pawls, Steel Reel Shaft, Set Screw Adjustment, Wheels Painted Red with Silver Bronzed Rim, Handle Brace Painted Red, Reel Shaft Silver Bronzed, Knives Gold Bronzed.

Width of Cut, Inches.....	14	16	18
Weight Each, Boxed, Lbs...	36	38	40
Each	$6.35	6.90	7.45

The Tension Draw-Cut principle used in this Mower completely reverses the old way of cutting grass. The grass is drawn under the Tension across the Sharp Edge of the Stationary Knife (which is the Cutting Knife) and severed most easily.

EVERGREEN HIGH WHEEL



9 in. Drive Wheels.

Open Cylinder, Four Crucible Cast Steel Knives, Hardened and Tempered in Oil, Enos Self-Sharpening Dead Knife, Steel Reel Shaft, Wheels Painted Green with Black Rim, Reel, Shaft and Handle Brace Painted Red, Knives Gold Bronzed.

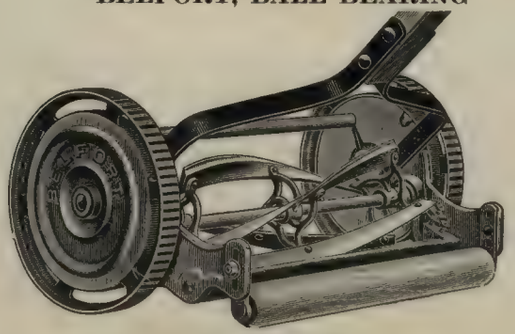
Width of Cut, Inches.....	14	16	18
Weight Each, Boxed, Lbs...	45	46	48
Each	$7.80	8.35	8.90

The EVERGREEN High Wheel Mower is so constructed that it will cut much higher grass than many other machines having larger wheels. The revolving knife, or wiper, having four blades, gives it rapid action, making a smooth, clean cut.

It is built by skilled mechanics in a simple and practical manner, making it a most serviceable machine for domestic use.

By simply adjusting the Dead Knife, it can be kept sharp for years, thus saving the yearly annoyance of having it ground, and more than saving its cost thereby.

BELFORT, BALL BEARING



8¼ in. Drive Wheels.

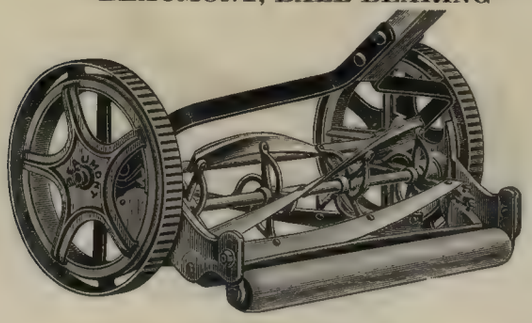
Open Cylinder, Four Best Quality Steel Knives, Highest Grade Solid Cone Steel Ball Bearing Parts, Thoroughly Hardened and Ground, Dust Proof, Wheels Painted Green, Other Parts Gold Bronzed.

Width of Cut, Inches.....	14	16	18
Ap. Weight Each, Boxed, Lbs.	43	45	47
Each	$7.95	8.20	8.55

All Above, One in a Box.

Lawn Mowers.

BEAUMONT, BALL BEARING

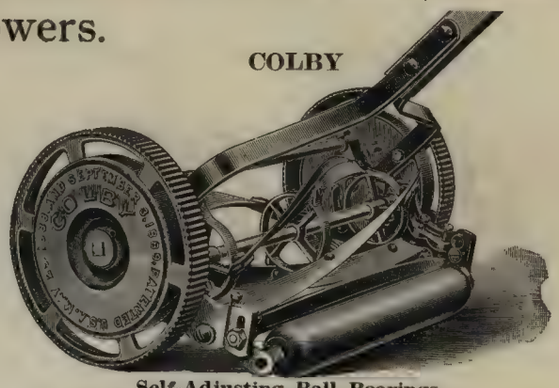


10½ in. Drive Wheels.

6 in. Open Cylinder, Four Best Quality Steel Knives, Highest Grade Solid Cone Steel Ball Bearing Parts, Thoroughly Hardened and Ground, Dust Proof, Gold Bronzed.

Width of Cut, Inches.....	**14**	**16**	**18**
Ap. Weight Each, Boxed, Lbs.	53	55	57
Each	**$9.45**	**10.25**	**10.55**

COLBY



Self-Adjusting Ball Bearings.

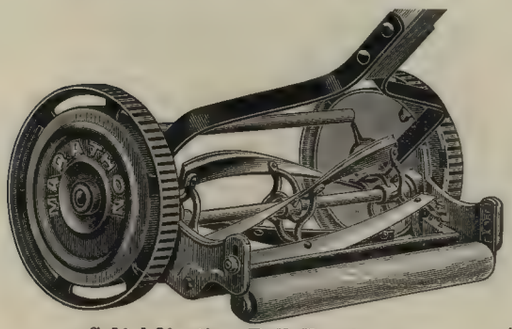
9 in. Drive Wheels, Open Cylinder, Four Best Quality Steel Knives, Self-Sharpening, Steel Reel Shaft, Gold and Silver Bronzed.

Width of Cut, Inches.....	**14**	**16**	**18**
Ap. Weight Each, Boxed, Lbs.	40	41	43
Each	**$8.90**	**9.45**	**10.00**

The Stationary Knife has lipped edge against which the revolving knives shear, making the mower self-sharpening.

The Tension Draw-Cut principle used in this Mower completely reverses the old way of cutting grass. The grass is drawn under the Tension across the sharp edge of the Stationary Knife (which is the Cutting Knife), and severed most easily.

MARATHON, BALL BEARING



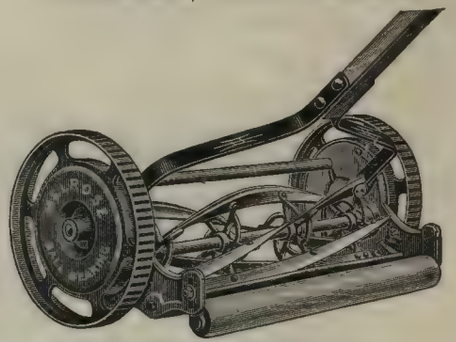
Self-Adjusting Ball Bearings.

9 in. Drive Wheels, Open Cylinder, Four Highest Grade Crucible Steel Knives, Spirally Formed and Self-Sharpening, 5½ in. Diameter Reel, Reel Bearings Automatically Adjusted, Screw-Adjusting Cutter Bar, Painted Blue and Gold Bronzed.

Width of Cut, Inches.....	**14**	**16**	**18**
Ap. Weight Each, Boxed, Lbs.	44	46	48
Each	**$8.35**	**8.90**	**9.45**

The Ball Bearing Parts of this Mower are of highest grade and the Cones of Tool Steel, tempered by a secret process and will never show the slighest wear during the life of the mower.

MELROSE, BALL BEARING



Self-Adjusting Ball Bearings.

10¼ in. Drive Wheels, Five Heavy Vanaduim Steel Knives, Oil Tempered and Ground, Self-Sharpening, 6 in. Diameter Reel, Top and Bottom Screw Cutter Bar Adjustment, Positive Ratchet, Case Hardened Double Lipped Pawls, Finished in Silver and Gold Bronze, Blue Decorations.

Width of Cut, Inches.....	**14**	**16**	**18**	**20**
Ap. Wt. Each, Boxed, Lbs..	60	62	64	67
Each	**$15.00**	**15.90**	**16.70**	**17.80**

A Mower of exceptional quality that will give the best of service under all conditions.

NEW AUTO, BALL BEARING

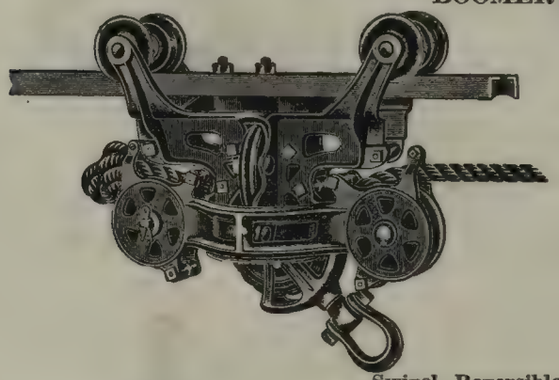
No. 35—Best Malleable Iron, Positive Two Piece Lock, for Steel Track **$6.15**

Weight Each About 30 Pounds.

BOOMER DOUBLE SWIVEL



Swivel Reversible, for Angular Steel Track.

Each

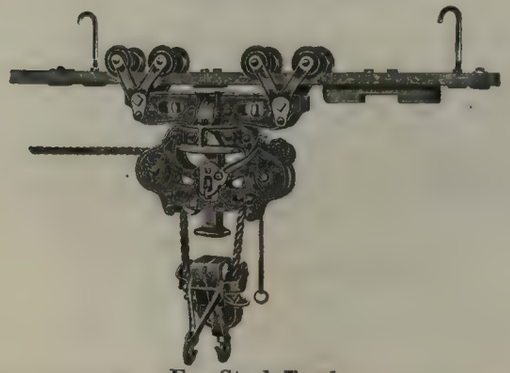
No. 38—High Grade Malleable Iron, Large Mouth Pattern, Simple and Positive Locking Device, Swivel Clevis and Swinging Yoke **$6.15**

Our Boomer Hay Carriers illustrated herewith are the latest and are made of high grade malleable iron. They are of the large mouth pattern, the fork pulley having the swivel clevis and swinging yoke which allows the malleable iron link to pass well up into the car where it is grasped by the dogs and firmly held. These features do away with any friction, or twisting strain on any part of the carrier and allow the operator to fill the barn to the highest point possible. The sheaves being large will carry any size rope up to one inch.

Weight Each Complete, 30 Pounds.

Hay Carriers.

SWIVEL SLING



For Steel Track.

Each

No. 45—Best Malleable Iron, Runs on Steel Track.... **$12.00**

Draws Hay or Grain up direct as the load stands with no twist in the rope. When one side of barn is filled all that is necessary is to take the pulley from the hook and carry pulley and rope to hook on opposite side of barn. Load can be raised to any desired point and tripped.

Weight Each About 64 Pounds.

Hay Carrier Track.

Angular Steel Track.

Per Foot

No. 12—For Leader, Boomer and Sling Hay Carriers, Complete with Couplings and Bolts..... **$0.18**

Weight Per Foot About 2 Pounds.

Snatch Pulley Blocks.

MILWAUKEE

Iron Wheel.

	Per Dozen
No. 35—Malleable Iron Frame	$10.00

Weight Per Dozen About 65 Pounds.

The Milwaukee Snatch Pulley Block is a pulley that every farmer should have if he has a Hay Fork and Hay Carrier. This device shortens the travel of the horse without reducing the elevating power. Tie a knot in the rope and put washer in front of the knot so that when the hay is going up the horse has a direct pull; but when the carrier is unlocked and the hay begins to move along the track, the rope doubles around the snatch pulley attached to the whiffletree; you will see that the horse travels only one-half the distance the hay is carried, a great saving; also the rope can be thrown off the snatch pulley and **fork be instantly returned to the load** without waiting for the return of the horse.

Hay Fork Pulleys.

5 in. Iron Wheel.

Per Dozen

No. 10—Malleable Iron Frame, Japanned, Loose Pin, Spring Key **$4.25**

An outfit should have one Sling Pulley and three Wagon Slings to take off entire load in three lots.

Hay Rack Brackets and Clamps.

MYERS' TAKE DOWN

Complete with Brackets, Upper Washers, Plates, Lower Clips, Nuts and Pins. Per Set

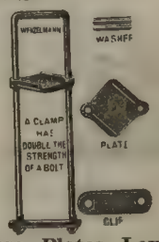
No. 6—Consists of Eight Wrought Steel Clamps to Clamp 2x8 in. Sill and 2x4 or 2x5 in. Cross Timbers, Weight Per Set About 16 Lbs. **$2.25**

No. 7—Consists of Eight Wrought Steel Clamps to Clamp 2x10 in. Sill and 2x6 in. Cross Timbers, Weight Per Set About 20 Lbs. **2.50**

The Take-Down Clamp is made so as to enable the user to handle the rack in two sections. This is done by the removal of two pins provided for the purpose of holding the rack together. The fact that the rack can be separated in two parts enables the user to place the rack on the wagon or remove it without assistance. In addition to this, it gives you the bottom sills and cross pieces as a separate device for hauling lumber, wood, sacked grain, etc., and can also by the use of a set of stake irons be transformed into a hog rack.

One Set in a Box.

WENZELMANN'S



Complete with Brackets, Upper Washers, Plates, Lower Clips and Nuts. Per Set

No. 1—Consists of Eight 14 in. Wrought Steel Clamps, to Clamp 2x4 in., 2x8 in. and 2x4 in., Weight Per Set About 17 Lbs. **$1.50**

No. 2—Consists of Eight 16 in. Wrought Steel Clamps, to Clamp 2x6 in., 2x8 in. and 2x4 in., Weight Per Set About 18½ Lbs. **1.60**

No. 3—Consists of Eight 18 in. Wrought Steel Clamps, to Clamp 2x6 in., 2x10 in. and 2x4 in., Weight Per Set About 21 Lbs. **1.70**

These Brackets make the strongest Hay Racks, as the wood is not weakened by boring holes for bolts where strength is more essential. By their use lighter material can be used. A Hay Rack made with these brackets is stronger and much more rigid than one made in the old way.

One Set in a Box.

Hay Rack Loops.

HALL'S

Wrought Steel. Per Set

No. G1—Consists of Eight Loops, Will Securely Hold 2x4 in. Stake, Bolt Holes are Arranged Zig-Zag to Avoid Splitting the 2x4, without Bolts **$1.10**

Designed to bolt on to the ends of Cross Timbers of the Hay Rack, so that the side Stakes of the Basket of the Rack will fit therein at the ends of the Timber.

LANE'S PATENT

Patented Steel Frame Used Exclusively in Lane Canvas Basket.

Steel Frame, Canvas.

	Per Dozen
No. 1—Capacity 80 Lbs. Anthracite Coal	$44.50
No. 2—Capacity 100 Lbs. Anthracite Coal	53.30
No. 3—Capacity 120 Lbs. Anthracite Coal	57.75

Lane Baskets are made of cotton duck, which forms the body part of the Basket, and a frame of round spring steel.

The top or rim is bound with leather, and the bottom of the steel frame where exposed is made in such a way as to avoid injury to the shoulder or back of carrier.

The cotton duck is strictly highest grade extra heavy weight, and is capable of withstanding a tremendous amount of tensile strain and abrasive wear.

Shipped F. O. B. Factory at Fond du Lac, Wis.

The Easy Change Combination Door is both a Screen and Storm Door in one. To change from Storm to Screen Door it is only necessary to take out the removable Storm Section and replace with Screen Sections or vice versa. Removable sections are both rabbeted to fit rabbeted opening in door which provides a double lap joint making the door dust and weather proof.

Steel Frame, Chain Fasteners, without Barrel.

Each

No. 75—36 in. Steel Wheels, Frame Work Painted Green, Wheels Yellow, Wood Handles.....$10.00
Weight Each About 75 Pounds.

This Cart carries the barrel directly on the axle. Has a device on the bottom which prevents the barrel from slipping off when handle is raised. Is provided with Chain Take-up device for the front to hold the barrel back against the frame. This combination allows the barrel to be tilted forward by raising the handle without losing its position on the axle.
One in a Bundle, K. D.

No. 85.

Platform Barrel Carts.

Steel Frame.

Each

No. 85—27x30 in. Wood Platform, Woodwork Painted Drab, Wheels Yellow, Iron Work Red, Hand Striped and Varnished, 36 in. Steel Wheels, Wood Handle.....$11.65

Unequalled for universal use about the farm. The low-down frame makes it easy to load and unload. It will hold five milk cans or will carry a barrel of water, and is a most convenient cart. Has parallel steel bands on the sides and additional wooden back rests which makes possible a wider range of use and permits carrying of small packages of merchandise, vegetables or grain in sacks.
Weight Each About 100 Pounds.
One in a Bundle, Knocked Down.

Plows.

Road Scrapers.

SLUSSER'S

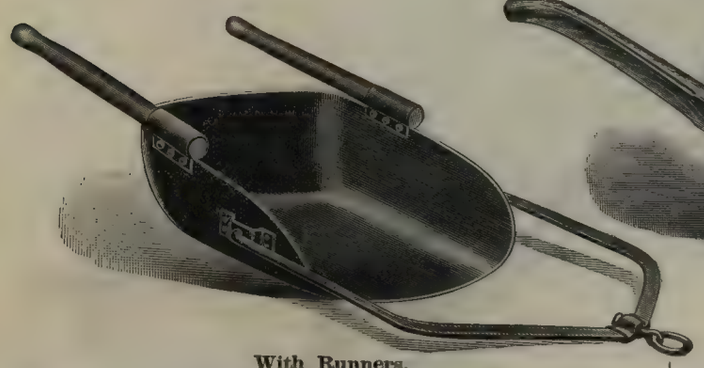
With Runners.

Square Back, Steel Bail with Extra Strong Swivel. — Each

No. 1—Capacity 7 Cubic Feet, Solid Steel, Wood Handles, Weight Each About 97 Lbs.....$8.90
No. 2—Capacity 5 Cubic Feet, Solid Steel, Wood Handles, Weight Each About 86 Lbs..... 8.35

This Scraper is made of Solid Steel. The Top of the Back is bent over the Tie Rod, adding greatly to the strength of the Back, and retaining all of the advantages of the Tie Rod in holding the Scraper firm. The Bottom of the Scraper is curved at the back, to prevent the sticking of the dirt. The bent up portion of the Bottom is riveted to the Back, where no wear can come on the rivets. The steel being double where the Back is riveted to the turned up Bottom, makes this Scraper extra strong at the Back. The Runners lighten the draft and prevent the wear from coming on bottom of Scraper.

CONTRACTORS' SPECIAL



With Runners.

Extra Heavy High Carbon Steel Bowl, Round Back, Solid Steel Bail with Extra Strong Swivel.

Each

No. 1—Capacity 7 Cubic Feet, Weight Each About 110 Lbs.....$10.60

Each	$5.80	4.35	3.60	2.90

This Hoist elevates, lowers, locks and unlocks with one rope, the operator having both hands free to control the load. The new patent adjustment gives an adjustment of nearly 90 degrees. Lock can be adjusted so as to allow the operator to assume almost any position desired when using the draft rope. The rope clamp is adjustable and automatic, allowing the use of different size ropes, etc.

Nos. 32 and 38.

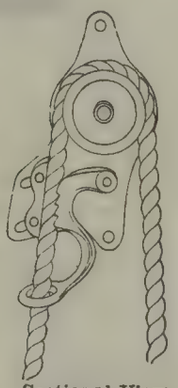
H7	2500	½ to ⅞	1	200	8	4.00
H8	5000	½ to ⅞	2	400	10	6.75
H9	8000	½ to ⅞	3	700	15	9.35

Will hold load at any desired point; the brake is absolutely safe; the heavier the load the better the grip. A slight movement of the hand to the right or left engages or disengages the brake. It elevates, lowers, locks and unlocks, **with one rope only.** They are indispensable in Factories of all kinds, and for Contractors, Carpenters, Masons, Farmers and Butchers. Can be used in any position or at any angle, in fact, any place where hoisting blocks are used.

Nos. 3, 6 and 9.



Sectional View Showing Adjustable Lock, Shoe and Dog.

Nos. 12 to 16.

MILWAUKEE

Best Malleable Iron.

Nos.	12	14	16
Capacity, Lbs.	2000	1500	1000
For Diameter Rope, Inches	¾	½	⅜
One Man Can Lift, Lbs.	600	600	500
Weight Each, Lbs.	16	7	3½
Each	$5.00	3.35	1.70

It elevates, lowers, locks and unlocks, with one rope only. The operator has only to move his hand to the right or left, and elevate or lower the load at will. The heavier the load the better it holds. It can be used in any position, perpendicular, horizontal, or at any angle.

Used in Factories, Foundries, Machine Shops, Mills, Warehouses and Quarries. It is also indispensable on the farm.

Hoisting Blocks.

Nos. 3 to 6.

SURE GRIP

Steel, Japanned, Automatic Brake, Single Reeved, Two Sheaves Each in Top and Bottom.

Nos.	3	4	5	6
Capacity, Lbs.	600	1000	1800	2500
For Rope, Inches	⅜	½	⅝	¾
One Man Can Lift, Lbs.	300	350	400	450
Ap. Weight Each, Lbs.	5	8	15	25
Each	$3.60	6.60	8.40	10.20

Will hold load at any point without backward slip, thus enabling a man to hoist with half the usual amount of exertion. The wedge-shaped brake has a double grip, and is absolutely automatic and very positive. Its efficiency is as great, proportionately, for raising heavy as light loads. Is susceptible of being disengaged by very slight pressure. Is quick lifting, quick lowering and light.

BURR SAFETY

Steel, Japanned, Automatic Locking, Without Rope.

Nos.	B2	B3	B4	B5	B6	B4½	B5½	B6½
Capacity, Lbs.	600	800	1500	2000	2500	3000	3500	5000
For Rope, Inches	¼	⅜	½	⅝	¾	⅞	⅝	¾
One Man Can Lift, Lbs.	250	300	350	400	450	600	700	850
Ap. Weight Each, Lbs.	2	4⅛	6½	11	17	10	20	28
Each	$1.05	1.60	2.90	3.70	4.50	5.25	6.30	7.35

Nos. B2 to B6½.

Will hold load at any point without fastening the Rope, thus enabling a man to hoist with half the usual amount of exertion. The brake has no teeth or claws to wear rope, and is absolutely automatic and very positive. Its efficiency is as great, proportionately, for raising heavy as light loads Is susceptible of being disengaged by very slight pressure. Is quick lifting, quick lowering and light

HARRINGTON'S IMPROVED SCREW HOIST

Double Chain.

Bronze Worm Gear with Square Hubs, Steel Worm, Reversible Load Wheels with Squared Hubs on Worm Gear, Swivel Load Chain Hook, Gearing Enclosed in Oil Tight Housing, Improved Hand Chain Guard.

Nos.	Capacity, Pounds.	Each.	Extra Lift, Per Foot.	Height of Lift, Feet.	Net Weight, Each, Pounds.
100	500	$37.50	$1.85	8	41
101	1,000	41.70	2.00	8	68
102	2,000	50.00	2.17	8	75

Hoisting Blocks.

DIRECT DIFFERENTIAL

Nos.	Capacity, Tons.	Price, Complete.	Height of Hoist, Feet.	Length of Chain, Feet.	Extra Chain, Each Additional Foot.	Net Weight, Complete, Pounds.
300	¼	$14.60	6	22	$0.57	20
301	½	17.00	7	26	.57	31
302	1	22.70	8	30	.61	53
303	1½	29.20	8½	33	.65	90
304	2	36.50	9	36	.70	128

Height of Hoist, as stated above, is the Number of Feet, which a Block, with regular length of Chain, will hoist from level on which the operator stands. Each additional Foot of Hoist requires four additional Feet of Chain. One man can lift 800 pounds about four feet per minute. They hold the load at any point, and can not run down.

MOORE'S ANTI-FRICTION

Anti-Friction, Improved Automatic Brake.

Double Pinion, Self-Lubricating Friction Surfaces, Self-Sustaining, Holding Load at Any Point, One Man Can Lift the Full Capacity of the Block.

Nos.	Capacity, Tons.	Price, Complete, with Chain.	Extra Main Chain, Per Foot.	Extra Hand Chain, Per Foot.	Height of Hoist, Feet.	Weight of Block, Complete, with Chain, Pounds.
400	½	$39.60	$0.64	$0.64	8	39
401	1	47.50	.70	.64	8	73
402	1½	63.30	.76	.64	8	90
403	2	79.20	.82	.64	9	128
404	3	110.75	.95	.64	10	195
405	4	150.30	1.12	.64	11	250
406	5	197.75	1.26	.64	12	353
407	8	316.35	2.00	.64	12	580
408	10	395.50	2.00	.64	12	625

The heaviest load may be lowered by a slight pull on the hand chain, a few pounds only, and yet is held with perfect safety at every point. The brake may be readily adjusted to lower more or less freely, or to take up wear. The lifting mechanism is simple and powerful. A perpetual compound lever; the highest efficiency; the greatest durability; light, compact and strong. With the sizes up to three tons, inclusive, one man, and with the larger sizes, two men, can lift to the full capacity of the Hoist. The load is self-sustained at every point. All working parts protected from weather and dust. The Hoist always hangs plumb.

For every Additional Foot of Hoist desired, Two Feet extra of both Main and Hand Chain will be necessary.

CYCLONE, HIGH SPEED

Graphite Bronze Bushed Bearings, Self-Lubricating. They Require no Oil and Will Run Indefinitely without Cutting. Eccentric Shafts, Automatic Brake.

The Lift Wheel, that is the Sprocket Wheel which carries the Lift Chain, is cast in one piece with the Spur Wheel that drives it.

Nos.	Capacity, Tons.	Each, Complete.	Height of Lift, Feet.	Extra Chain Per Foot of Lift.	Weight, Complete, with Chains, Pounds.	Chain Pull to Lift Full Load, Pounds.	One Foot, Feet of Chain Handled, to Lift Load
30	½	$62.20	8	$2.32	62	64	20½
31	1	80.00	8	2.46	85	79	33
31½	1½	106.60	8	2.56	107	100	39
32	2	124.35	9	2.74	160	109	47
33	3	160.00	10	3.02	195	115	69
34	4	195.40	10	3.37	250	115	91
35	5	248.65	12	3.75	386	104	123

Figures in fourth column denote approximate height, which blocks, with regular lengths of chain, will lift from level on which operator stands.

For every additional foot of lift desired, two feet extra of both main and hand chain will be necessary.

The automatic brake permits the spinning of the hand wheel in either direction when there is no load, locks the load with perfect safety, and yet permits its free lowering by a very slight reverse pull on the hand chain.

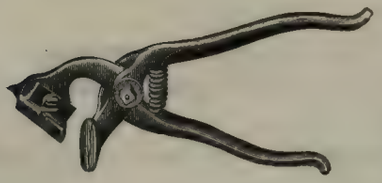
Hog Tamers and Ear Markers.

NEW IDEA



Cut shows Animal's Ear, with different shaped holes and notches made by the New Idea Hog Tamer when used as a Marker.

Anti-Rooter or Hog Tamer and Ear Marker Combined.

Per Dozen

No. 6—Malleable Iron, Aluminum Bronze Finish, Adjustable Cutters, Reversible Steel Blades, Steel Coil Spring, with Metal Anvil or Base to Cut On **$12.25**

With the metal base or anvil to cut on the farmer can sterilize or clean the instrument by dipping it into boiling water. This will prevent cholera or diseases being carried from one hog, or herd of hogs, to another, which is considered a very necessary thing to provide against.

Weight Per Dozen About 14 Pounds.
One-half Dozen in a Box.

DR. MILLER'S

Malleable Iron.

Per Dozen

No. 2—With One Cutting and One Marking Blade.. **$13.35**
Extra Marking Blades—Interchangeable, with Steel Cutters **4.50**

This tool cuts out a part of the rim of the nose in a circle, allowing the ends to turn to each side and heal in a few days into small knots, (which will positively prevent rooting.)

Weight Per Dozen About 15 Pounds.
One-half Dozen in a Box.

Pig Forceps.

Dehorning Tools.

KEYSTONE

Regular, Malleable Iron Frame. Each
Regular Keystone Dehorners—44 in. Long, Two Cast Steel V Shaped Knives, Giving Four Cutting Blades, 5 in. Opening, Rock Maple Handles... $20.55

Improved, Malleable Iron Frame. Each
Improved Keystone Dehorners—44 in. Long, Tapering Rack, Eccentric Gears, Two Cast Steel V Shaped Knives, Giving Four Cutting Edges, 5 in. Opening, Rock Maple Handles..... $25.00

When the Handles are placed together the Knives cut into the horns in four places, the action being very much like two pairs of shears working in opposite directions.

This Dehorner is made in but one size, and so designed as to cut any size horns. Does not crush the horn, as others do, on account of the V-shaped blade used. Has been tried at all Agricultural Experiment Farms in various states and has met with approval from all. Weight Each About 13 Pounds.

LEAVITT'S

Malleable Iron Frame and Handles. Each
No. 3—38 in. Long, V Shaped High Grade Crucible Steel Blades, Carefully Tempered, Giving Four Cutting Edges, 4x4 in. Opening, Will Clip Any Size Horn $10.25
